must necessarily be so short as to afford no draft of appropriate amount 5 Such is the case for example in locomotive engines in marine engines this is to some extent also true the chimney must be comparatively short 6 When sufficient length of chimney is not admissible we are compelled either to throw in the gases of combustion at a very high temperature so as to make up for want of height in the column or to adopt some other expedient for creating a draft 7 A wheel is **A Rudimentary Treatise on the Steam Engine** Dr Lardner, 2019 *A New Classified Catalogue of the Library of the Royal Institution of Great Britain* Royal Institution of Great Britain.
