Rule Based Expert Systems:

Verification and Validation of Rule-Based Expert Systems Suzanne Smith, Abraham Kandel, 2018-10-08 This book presents an innovative approach to verifying and validating rule based expert systems It features a complete set of techniques and tools that provide a more formal objective and automated means of carrying out verification and validation procedures Many of the concepts behind these procedures have been adapted from conventional software while others have required that new techniques or tools be created because of the uniqueness of rule based expert systems Verification and Validation of Rule Based Expert Systems is a valuable reference for electrical engineers software engineers artificial intelligence experts and computer scientists involved with object oriented development expert systems and programming languages

An Introduction to Expert Systems, 1991 *RULE BASED EXPERT SYSTEMS: A PRACTICAL INTRODUCTION*, 1993

Rule Based Systems for Big Data Han Liu, Alexander Gegov, Mihaela Cocea, 2015-09-09 The ideas introduced in this book explore the relationships among rule based systems machine learning and big data Rule based systems are seen as a special type of expert systems which can be built by using expert knowledge or learning from real data The book focuses on the development and evaluation of rule based systems in terms of accuracy efficiency and interpretability In particular a unified framework for building rule based systems which consists of the operations of rule generation rule simplification and rule representation is presented Each of these operations is detailed using specific methods or techniques In addition this book also presents some ensemble learning frameworks for building ensemble rule based systems

Rule-based Expert Systems Bruce G. Buchanan, Edward Hance Shortliffe, 1984 Artificial intelligence or AI is largely an experimental science at least as much progress has been made by building and analyzing programs as by examining theoretical questions MYCIN is one of several well know programs that embody some intelligence and provide data on the extent to which intelligent behavior can be programmed As with other AI programs its development was slow and not always in a forward direction The book shares the results of nearly a decade of work the experiments performed and present a coherent picture of the work It presents a critical analysis of several pieces of related research performed by a large number of scientists The whole field of AI will benefit from detailed retrospective examinations of experiments for this is the way the scientific foundations of the field will gradually be defined This is the reason this analysis of the MCYIN experiments is being offered to readers

Expert Systems in Chemistry Research Markus C. Hemmer, 2007-12-13 Expert systems allow scientists to access manage and apply data and specialized knowledge from various disciplines to their own research Expert Systems in Chemistry Research explains the general

scientific basis and computational principles behind expert systems and demonstrates how they can improve the efficiency of scientific workflows

The Handbook of Applied Expert Systems Jay Liebowitz, 2019-07-23 The Handbook of Applied Expert Systems is a landmark work dedicated solely to this rapidly advancing area of study Edited by Jay Liebowitz a professor author and consultant known around the world for his work in the field this authoritative source covers the latest expert system technologies applications methodologies and practices The book features contributions from more than 40 of the world's foremost expert systems authorities in industry government and academia The Handbook is organized into two major sections The first section explains expert systems technologies while the second section focuses on applied examples in a wide variety of industries Key topics covered include fuzzy systems genetic algorithm development machine learning knowledge representation and much more

Rule-Based Programming Thaddeus J. Kowalski, Leon S. Levy, 2012-12-06 Rule Based Programming is a broad presentation of the rule based programming method with many example programs showing the strengths of the rule based approach The rule based approach has been used extensively in the development of artificial intelligence systems such as expert systems and machine learning This rule based programming technique has been applied in such diverse fields as medical diagnostic systems insurance and banking systems as well as automated design and configuration systems Rule based programming is also helpful in bridging the semantic gap between an application and a program allowing domain specialists to understand programs and participate more closely in their development Over sixty programs are presented and all programs are available from an ftp site Many of these programs are presented in several versions allowing the reader to see how realistic programs are elaborated from back of envelope models Metaprogramming is also presented as a technique for bridging the semantic gap Rule Based Programming will be of interest to programmers systems analysts and other developers of expert systems as well as to researchers and practitioners in artificial intelligence computer science professionals and educators

[Handbook of Research on Emerging Rule-Based Languages and Technologies: Open Solutions and Approaches](#) Giurca, Adrian, Gasevic, Dragan, Taveter, Kuldar, 2009-05-31 This book provides a comprehensive collection of state of the art advancements in rule languages Provided by publisher

The Electrical Engineering Handbook Wai Kai Chen, 2004-11-16 The Electrical Engineer's Handbook is an invaluable reference source for all practicing electrical engineers and students Encompassing 79 chapters this book is intended to enlighten and refresh knowledge of the practicing engineer or to help educate engineering students This text will most likely be the engineer's first choice in looking for a solution extensive complete references to other sources are provided throughout No other book has the breadth and depth of coverage available here This is a must have for all practitioners and students The Electrical Engineer's Handbook provides the most up to date information in Circuits and Networks Electric Power Systems Electronics Computer Aided Design and Optimization VLSI Systems Signal Processing Digital Systems and Computer Engineering Digital Communication and Communication Networks Electromagnetics and Control and Systems

About the Editor in Chief Wai Kai Chen is Professor and Head Emeritus of the Department of Electrical Engineering and Computer Science at the University of Illinois at Chicago He has extensive experience in education and industry and is very active professionally in the fields of circuits and systems He was Editor in Chief of the IEEE Transactions on Circuits and Systems Series I and II President of the IEEE Circuits and Systems Society and is the Founding Editor and Editor in Chief of the Journal of Circuits Systems and Computers He is the recipient of the Golden Jubilee Medal the Education Award and the Meritorious Service Award from the IEEE Circuits and Systems Society and the Third Millennium Medal from the IEEE Professor Chen is a fellow of the IEEE and the American Association for the Advancement of Science 77 chapters encompass the entire field of electrical engineering THOUSANDS of valuable figures tables formulas and definitions Extensive bibliographic references

Knowledge Based Expert Systems in Transportation Louis Franklin Cohn, Roswell A. Harris, 1992 This synthesis will be of interest to engineering managers design engineers traffic engineers computer personnel and others interested in advanced computer applications for highway design and operations Information is provided on the history of knowledge based expert systems KBES current applications of these systems in transportation departments potential applications and hardware and software requirements Additionally some detailed programming information from two operational expert systems is included There is growing use of computers in transportation departments and KBES represent an area in which several highway agencies are gaining experience and obtaining promising results This report of the Transportation Research Board describes the current state of the practice with respect to KBES as well as the historical development of expert systems and the more general field of artificial intelligence Experience with expert systems in transportation is summarized including discussions of expert systems in operation and in development based on a review of the literature and a survey of the states and experts in this field

Topics in Expert System Design C. Tasso, G. Guida, 2014-06-28 Expert Systems are so far the most promising achievement of artificial intelligence research Decision making planning design control supervision and diagnosis are areas where they are showing great potential However the establishment of expert system technology and its actual industrial impact are still limited by the lack of a sound general and reliable design and construction methodology This book has a dual purpose to offer concrete guidelines and tools to the designers of expert systems and to promote basic and applied research on methodologies and tools It is a coordinated collection of papers from researchers in the USA and Europe examining important and emerging topics methodological advances and practical experience obtained in specific applications Each paper includes a survey introduction and a comprehensive bibliography is provided

Expert Systems and Probabilistic Network Models Enrique Castillo, Jose M. Gutierrez, Ali S. Hadi, 2012-12-06 Artificial intelligence and expert systems have seen a great deal of research in recent years much of which has been devoted to methods for incorporating uncertainty into models This book is devoted to providing a thorough and up to date survey of this field for researchers and students

Database and Expert Systems Applications

A Min Tjoa, Isidro Ramos, 2012-12-06 The Database and Expert Systems Application DEXA conferences are mainly oriented to establish a state of the art forum on Database and Expert System applications But Practice without Theory has no sense as Leonardo said five centuries ago In this Conference we try a compromise between these two complementary aspects A total of 5 sessions are application oriented ranging from classical applications to more unusual ones in Software Engineering Recent research aspects in Databases such as activity deductivity and or Object Orientation are also present in DEXA 92 as well as the implication of the new data models such as OO Model Deductive Model etc included in the Modelling sessions Other areas of interest such as Hyper Text and Multimedia application together with the classical field of Information Retrieval are also considered Finally Implementation Aspects are reflected in very concrete fields A total of of nearly 200 papers submitted from all over the world were sent to DEXA 92 Only 90 could be accepted A Poster session has also been established DEXA 90 was held in Vienna Austria DEXA 91 in Berlin Germany and DEXA 92 will take place in Valencia Spain where we are celebrating the discovery of the New World just five centuries ago in Leonardo's age Both the quality of the Conference and the compromise between Practice and Theory are due to the credit of all the DEXA 92 authors
