Ruling The Root:

Ruling the Root Milton L. Mueller, 2009-01-23 In *Ruling the Root* Milton Mueller uses the theoretical framework of institutional economics to analyze the global policy and governance problems created by the assignment of Internet domain names and addresses The root is the top of the domain name hierarchy and the Internet address space It is the only point of centralized control in what is otherwise a distributed and voluntaristic network of networks Both domain names and IP numbers are valuable resources and their assignment on a coordinated basis is essential to the technical operation of the Internet Mueller explains how control of the root is being leveraged to control the Internet itself in such key areas as trademark and copyright protection surveillance of users content regulation and regulation of the domain name supply industry Control of the root originally resided in an informally organized technical elite comprised mostly of American computer scientists As the Internet became commercialized and domain name registration became a profitable business a six year struggle over property rights and the control of the root broke out among Internet technologists business and intellectual property interests international organizations national governments and advocates of individual rights By the late 1990s it was apparent that only a new international institution could resolve conflicts among the factions in the domain name wars Mueller recounts the fascinating process that led to the formation of a new international regime around ICANN the Internet Corporation for Assigned Names and Numbers In the process he shows how the vaunted freedom and openness of the Internet is being diminished by the institutionalization of the root

Who Rules the Net? Adam D. Thierer, Clyde Wayne Crews, 2003 The rise of the World Wide Web is challenging traditional concepts of jurisdiction governance and sovereignty Many observers have praised the Internet for its ubiquitous and borderless nature and argued that this global medium is revolutionizing the nature of modern communications Indeed in the universe of cyberspace there are no passports and geography is often treated as a meaningless concept But does that mean traditional concepts of jurisdiction and governance are obsolete When legal disputes arise in cyberspace or when governments attempt to apply their legal standards or cultural norms to the Internet how are such matters to be adjudicated Cultural norms and regulatory approaches vary from country to country as reflected in such policies as free speech and libel standards privacy policies intellectual property antitrust law domain name dispute resolution and tax policy In each of those areas policymakers have for years enacted myriad laws and regulations for realspace that are now being directly challenged by the rise of the parallel electronic universe known as cyberspace Who is responsible for setting the standards in cyberspace Is a U N for the Internet

or a multinational treaty appropriate If not whose standards should govern cross border cyber disputes Are different standards appropriate for cyberspace and real space Those questions are being posed with increasing frequency in the emerging field of cyber law and constitute the guiding theme of this book s collection of essays Book jacket Addressing the World Erica Schlesinger Wass,2003 Few people think of an Internet domain name like us or in as anything other than an address when in fact it often serves as a roadmap to national identities and priorities Addressing the World looks behind eleven of the 240 global domain names from the United States and Australia to Moldova and East Timor highlighting both the technology and the larger social constructs that make each distinct Stories and first person accounts by activists journalists Internet administrators lawyers and academics examine the sociological historical political and technological development of Internet country code top level domains ccTLDs Addressing the World reveals that technology is not just science and domain names are not just practical they are an entryway into cultural education and understanding Visit the author s website for additional information including chapter abstracts and pictures and bios of all contributors **Wonderful World of Numbers** Dr. Bhojraj Dwivedi, **Who Controls the Internet?** Jack Goldsmith,Tim Wu,2006-03-17 In this provocative new book the authors tell the fascinating story of the Internet s challenge to governmental rule in the 1990s and of the fate of one idea that the Internet might liberate users forever from government borders and even their physical selves

Inferences by Parallel Reasoning in Islamic Jurisprudence Shahid Rahman, Muhammad Iqbal, Youcef Soufi, 2020-01-13 This monograph proposes a new dialogical way of studying the different forms of correlational inference known in the Islamic jurisprudence as *qiy s* According to the authors view *qiy s* represents an innovative and sophisticated form of dialectical reasoning that not only provides new epistemological insights into legal argumentation in general including legal reasoning in Common and Civil Law but also furnishes a fine grained pattern for parallel reasoning which can be deployed in a wide range of problem solving contexts and does not seem to reduce to the standard forms of analogical reasoning studied in contemporary philosophy of science and argumentation theory After an overview of the emergence of *qiy s* and of the work of al Sh r z penned by Soufi Youcef the authors discuss al Sh r z s classification of correlational inferences of the occasioning factor *qiy s al illa* The second part of the volume deliberates on the system of correlational inferences by indication and resemblance *qiy s al dal la qiy s al shabah* The third part develops the main theoretical background of the authors work namely the dialogical approach to Martin L f s Constructive Type Theory The authors present this in a general form and independently of adaptations deployed in parts I and II Part III also includes an appendix on the relevant notions of Constructive Type Theory which has been extracted from an overview written by Ansten Klev The book concludes with some brief remarks on contemporary approaches to analogy in Common and Civil Law and also to parallel reasoning in general

Arsyad al-Banjari's Insights on Parallel Reasoning and Dialectic in Law Muhammad Iqbal, 2022-06-16 This book provides an epistemological study of the great Islamic scholar of Banjarese origin Syeikh Muhammad Arsyad al Banjari 1710 1812 who contributed to the development of Islam in Indonesia and in general Southeast Asia The work focuses on Arsyad al Banjari s dialectical use and understanding of *qiy s* or correlational inference as a model of parallel reasoning or analogy in Islamic jurisprudence This constituted the most prominent instrument he applied in his effort of integrating Islamic law into the Banjarese society This work studies how Arsyad al Banjari integrates *jadal* theory or dialectic in Islamic jurisprudence within his application of *qiy s* The author develops a framework for *qiy s* which acts as the interface between *jadal* dialogical logic and Per Martin L f s Constructive Type Theory CTT One of the epistemological results emerging from the present study is that the different forms of *qiy s* applied by Arsyad al Banjari represent an innovative and sophisticated form of reasoning The volume is divided into three parts that discuss the types of *qiy s* as well their dialectical and argumentative aspects historical background and context of Banjar and demonstrates how the theory of *qiy s* comes quite close to the contemporary model of parallel reasoning for sciences and mathematics
