

En reformulering af bibliotekets rum og funktion i fremtidens uddannelsessystemer?

Af Mai Aggerbeck

Artiklen beskriver og diskuterer informationskompetencebegrebet med udgangspunkt i en empirisk undersøgelse 'Samarbejde mellem bibliotek og uddannelse omkring formidling af informationskompetence'. Undersøgelsens hovedkonklusioner perspektiveres i forhold til de nye tendenser i samfundet og de deraf følgende nye fordringer til uddannelserne. Centralt for den fremtidige biblioteksfunktion er en ændret forståelse af videnbegrebet og et øget fokus på læringsbegrebet. Det stiller biblioteksfunktionen overfor nye udfordringer i relation til form og betydningsindhold, men også i relation til den organisatoriske forståelsesramme.

Indledning

Anskuer man informationskompetence i dets indholdsmæssige betydning ud fra fire grundbetydninger som evnen til at kunne 1. identificere, 2. udvælge, 3. strukturere og 4. formidle viden, peger det for det første på, at der er tale om et begreb, der rummer mange facetter. For det andet peger det på informationskompetence som både en nødvendighed og en selvfølgelighed, når man arbejder med viden og læreprocesser.

Informationskompetence som begreb kan, ifølge min forståelsesramme, da heller ikke ses uafhængigt af dets kontekst. Det beror på en opfattelse af, at arbejdet med viden og videnshåndtering er situativt, hvilket vil sige bestemt af de omstændigheder, som brugeren befinder sig i (Jensen 2007). Det betyder, at en række situationelle faktorer er bestemmende for, hvorledes begrebet implementeres i den enkelte uddannelse og/eller de enkelte fag. Af væsentlige situationelle elementer kan nævnes studieordninger, fagbeskrivelser, den eller de videnskabsteoretiske paradigmer, en uddannelse bygger på, samt selve den pædagogiske tilrettelæggelse af undervisningen. Denne forståelse relaterer sig til erfaringer fra min egen organisation, hvor informationskompetence er gjort til en permanent del af undervisningen, og hvor antagelsen er, at informationskompetence ikke kun skal fremstå som et selvstændigt fag, men derimod er et fag, der skal være til stede i en lang række andre fag.

Denne forandringsproces har været faciliteret af en ambition om et opbrud fra de traditionelle rammer og den traditionelle forståelse af sammenhængen mellem bibliotek og uddannelse, og har affødt en omorganisering af biblioteksfunktionen. I det forløb blev der nedsat en række teams med deltagelse af undervisere, studieledere og bibliotekar, der med informationskompetence som referenceramme skulle sikre implementeringen af denne kompetence i undervisningen. Disse arbejdsfællesskaber gav anledning til nye tanker omkring bibliotek og uddannelse og til en revurde-

Conceptual Design Mogens Myrup Andreassen, Claus Thorp Hansen, Philip Cash, 2015-07-03 Maximising reader insights into the theory models methods and fundamental reasoning of design this book addresses design activities in industrial settings as well as the actors involved This approach offers readers a new understanding of design activities and related functions properties and dispositions Presenting a design mindset that seeks to empower students researchers and practitioners alike it features a strong focus on how designers create new concepts to be developed into products and how they generate new business and satisfy human needs Employing a multi faceted perspective the book supplies the reader with a comprehensive worldview of design in the form of a proposed model that will empower their activities as student researcher or practitioner We draw the reader into the core role of design conceptualisation for society for the development of industry for users and buyers of products and for citizens in relation to public systems The book also features original contributions related to exploration conceptualisation and product synthesis Exploring both the power and limitations of formal design process models methods and tools viewed in the light of human ingenuity and cognition the book develops a unique design mindset that adds human understanding to the list of methods and tools essential to design This insight is distilled into useful mindset heuristics included throughout the book

The Emergence of a Modern City Henriette Steiner, 2016-03-23 This book is an exploration of how urban life in Copenhagen in the period known as the Golden Age c 1800 to 1850 was experienced and structured socially institutionally and architecturally It draws on a broad historical source material spanning urban anecdotes biography philosophy literature and visual culture to do so The book argues that Copenhagen emerged as a modern city at this time despite the fact that the Golden Age never witnessed the appearance of the main characteristics of the modernisation of cities associated with industrialisation such as street lighting sewer systems and railroads The book outlines the historical and topographical context of Copenhagen in the Golden Age with a special focus on the works of the most prominent architect of the period C F Hansen The characterisation of the city is complemented by investigations into writings of three citizens the philosopher Soren Kierkegaard the novelist Thomasine Gyllembourg and the criminal Ole Kollerod who all take an interest in the city s institutional and urban structures as well as their own place in it From these different sources a picture is painted of urban life and thought at a time when the city began to take on characteristics of ambiguity and alienation in European thinking while at the same time the city itself retained some pre modern motifs of a symbolic order This transformation is set in a larger process of cultural re orientation from traditional Baroque culture to what might be termed Romantic culture The book reconsiders the significance of this transformation for the emergent order of the modern European city in the nineteenth century and thus of the very foundation on which our own urban culture rests
