Rural Livelihoods And Diversity In Developing Countries:

Rural Livelihoods and Diversity in Developing Countries Frank Ellis, 2000-06-29 Rural families in developing countries make a living by engaging in diverse activities These range from farming to rural trade to migration to distant cities and even abroad This book explores the implications of rural livelihood diversity for key topics in development studies and for poverty reduction policies The livelihoods approach is gaining momentum and this is the first book to set it out in detail Rural Livelihoods and Diversity in Developing Countries Frank Ellis, 2012 Rural Livelihood Diversity in Developing Countries F. Ellis, 1996 This paper examines livelihood diversification as a survival strategy of rural households in developing countries Although still of central importance farming on its own is increasingly unable to provide a sufficient means of survival in rural areas The paper's objectives are first to increase awareness of livelihood diversification in approaches to rural development second to consider the interactions among diversification and poverty farm productivity natural resource management and gender relations in rural areas and third to advance the policy understanding of diverse rural livelihoods The Elgar Companion to Development Studies David Clark, 2006 If handbooks can be inspiring this is it Like a true companion it takes in its stride conversations both big and small Its entries do not just present an international and multidisciplinary mix but true to life they work on several different scales And importantly the book makes its authority evident For it is like an extended website but with all the added advantages of an encyclopaedia that actually tells you about the authors and the sources on which they have drawn The resulting compilation is highly intelligent thoughtful and above all usable Dame Marilyn Strathern University of Cambridge UK The Elgar Companion to Development Studies is a major production in the development studies field authored by a star studded cast of contributors With 136 entries covering a vast range of topics it should quickly establish itself as a leading work of reference We should all feel indebted to David Clark who has successfully brought this substantial publishing project to completion John Toye University of Oxford UK This is a most comprehensive handbook on development studies It brings together a wide varied array of carefully crafted summaries of 136 key topics in development by an international cast of well respected academics and other experts in respective areas of study The handbook is heavily interdisciplinary organically combining economic political historical social cultural institutional ethical and human aspects of development While the wide range of entries might appear as a simple glossary listing or an encyclopedic collection each of the 136 entries offers more depth and discussion than the average handbook Viewed in this light this companion is highly likely to become known as a leading reference work on the topic Highly recommended Ismael Hossein Zadeh Choice The Elgar Companion to Development Studies is an innovative and unique reference book that includes original contributions covering development economics as well as development studies broadly defined This major new Companion brings together an international panel of experts from varying backgrounds who discuss theoretical ethical and practical issues relating to economic social cultural institutional political and human aspects of

development in poor countries It also includes a selection of intellectual biographies of leading development thinkers While the Companion is organised along the lines of an encyclopaedia each of its 136 entries provide more depth and discussion than the average reference book Its entries are also extremely diverse they draw on different social science disciplines incorporate various mixes of theoretical and applied work embrace a variety of methodologies and represent different views of the world The Elgar Companion to Development Studies will therefore appeal to students scholars researchers policymakers and practitioners in the field of development as well as the interested layman *LIVELIHOODS AT THE MARGINS* James Staples, 2007-08-15 Sex workers street hawkers drug sellers cleaners they are people living on the margins of urban life who are ubiquitous but notably absent from mainstream economic analyses This volume cuts through the conventional narratives that romanticize victimize or demonize these populations *Rural Livelihoods and Poverty Reduction Policies* Frank Ellis, H. Ade Freeman, 2004-08-02 This important new collection of contributions brings together current thinking on poverty reduction and rural livelihoods in developing countries As well as leading economists in the field such as Frank Ellis and Chris Barrett there are a number of contributors from developing countries themselves The book examines both macroeconomic and microeconomic phenomena and contains wide range of case studies Skilfully exposing the gap that exists between the rhetoric of poverty reduction strategies in capital cities and the practice of public sector delivery in rural areas this key text will be essential reading for advanced students and researchers in the fields of rural development rural livelihoods poverty reduction strategies and Sub Saharan Africa development as well as advisors and practitioners in international organizations **Infectious Diseases and Rural Livelihood in Developing Countries** Fingani Annie Mphande, 2016-02-11 This book focuses on the effects of rural livelihood and the impact of infectious diseases on health and poverty It explores cultures and traditions in developing countries and their role in infectious disease management and prevention It highlights the associated healthcare systems and how these have contributed to some of the challenges faced and goes on to elaborate on the significance of community involvement in infectious disease prevention management and control It also emphasizes the importance of surveillance and setting up strategies on infectious disease management that are favourable for poor communities and developing countries *Infectious Diseases and Rural Livelihood in Developing Countries* allows students researchers healthcare workers stakeholders and governments to better understand the vicious cycle of health poverty and livelihoods in developing countries and to develop strategies that can work better in these regions Understanding Poverty and the Environment Fiona Nunan, 2015-03-27 Does poverty lead to environmental degradation Do degraded environments and natural resources lead to poverty Or are there other forces at play Is the relationship between poverty and the environment really as straightforward as the vicious circle portrayal of poverty leading to environmental destruction leading to more poverty would suggest Does it matter if the relationship is portrayed in this way This book suggests that it does matter Arguing that such a portrayal is unhelpful and misleading the book brings together a

diverse range of analytical frameworks and approaches that can enable a much deeper investigation of the context and nature of poverty environment relationships Analytical frameworks and approaches examined in the book include political ecology a gendered lens Critical Institutionalism the Environmental Entitlements framework the Institutional Analysis and Development approach the Sustainable Livelihoods Framework wellbeing analysis social network analysis and frameworks for the analysis of the governance of natural resources Recommended further reading draws on published material from the last thirty years as well as key contemporary publications giving readers a steer towards essential texts and authors within each subject area Key themes running through the analytical frameworks and approaches are identified and examined including power access institutions and scale

Diversity of Family Farming Around the World Pierre-Marie Bosc,Jean-Michel Sourisseau,Philippe Bonnal,Pierre Gasselín,Élodie Valette,Jean-François Bélières,2019-01-08 This book aims at explaining the nature and strength of the links between the families and their farms looking at their diversity throughout the world To do so it documents family farming diversity by using the sustainable rural livelihood SRL framework exploring their ability to adapt and transform to changing environments In 18 case studies in Asia Africa Latin America and Europe it shows how family farms resist under adverse conditions seize new opportunities and permanently transform Family farms far from being backwards are potential solutions to face the current challenges and shape a new future for agriculture taking advantage of their local knowledge and capacity to cope with external constraints Many co authors of the book have both an empirical and theoretical experience of family farming in developed and developing countries and their related institutions They specify what makes and means family in family farming and the diversity of their expertise draws a wide and original picture of this resilient way of farming throughout the world

Handbook on Tourism and Conservation Joseph E. Mbaiwa,Oluwatoyin D. Kolawole,Wame L. Hambira,Emmanuel Mogende,2023-11-03 The Handbook on Tourism and Conservation demonstrates the intrinsic nexus between tourism the environment and sustainable natural resources use It applies Ostrom s social ecological systems SESs theory as the analytical framework for reaching a consensus on divergent viewpoints within the context of global environmental change and emerging governance issues

At Risk Piers Blaikie,Terry Cannon,Ian Davis,Ben Wisner,2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer

world this revised edition is an important resource for those involved in the fields of environment and development studies

Inside Poverty and Development in Africa Marcel Rutten, André Leliveld, Dick Foeken, 2008-10-15 When discussing development issues in Africa it is not sufficient to simply stress the ubiquity of failure malnutrition disease predatory states and war one also has to recognize that important aspects in the lives of millions of ordinary people have been transformed over the last five decades The contributions in this book are rooted in extensive empirical research at local regional and or national level in different African countries Chad Ethiopia Kenya Lesotho South Africa and Uganda while some take a pan African view All however offer insight from different analytical perspectives into the heterogeneity of poverty and development processes in Sub Saharan Africa and confront the ideas concepts and assumptions that lie behind pro poor policies The volume also encourages policy makers to choose realistic policy prescriptions in an attempt to move people out of poverty

Dancing with the River Kuntala Lahiri-Dutt, Gopa Samanta, 2013-06-25 With this book Kuntala Lahiri Dutt and Gopa Samanta offer an intimate glimpse into the microcosmic world of hybrid landscapes Focusing on chars the part land part water low lying sandy masses that exist within the riverbeds in the floodplains of lower Bengal the authors show how both as real life examples and as metaphors chars straddle the conventional categories of land and water and how people who live on them fluctuate between legitimacy and illegitimacy The result a study of human habitation in the nebulous space between land and water charts a new way of thinking about land people and people's ways of life

Socio-Economic Issues of Climate Change Luni Piya, Keshav Lall Maharjan, Niraj Prakash Joshi, 2019-02-21 This book conducts a holistic analysis of climate change perceptions vulnerabilities impacts and adaptation based on the primary household data collected from the Chepang community residing in the rural Mid Hills of

Nepal Socio economic and demographic data from the household survey is integrated with meteorological and spatial data to conduct an integrated analysis Quantitative analysis is also supplemented by qualitative information Given the context of ongoing climate change the livelihoods issues of a highly marginalized Chepang community form the center point of analysis The book demonstrates that balanced assets possession is a prerequisite to strengthen the adaptive capacity of the households Furthermore the ability of translating adaptive capacity into adaptation actions is determined by the households ability to correctly perceive the changes and their access to various assets The book recommends to ensure the availability of non farm livelihood opportunities along with access to formal vocational education and skill development training as these are the key factors contributing to reduce the vulnerability The book concludes that mainstreaming of climate change into development efforts is a must for sustainable development
