economies The book also looks at what has happened to income inequality in the context of superior growth performance It makes comparative assessments and examines the implications for the three nations Since free markets have nothing in them to produce a reduction in income inequality among persons households one must at best hope for equality of opportunity notably reflected in identical schooling for all identical health care for all and minimal rather than vulgar inequality in housing This book is particularly useful for both China and India which may wish to study and learn from Singapore in regard to the policies programmes and projects aimed at ensuring equality of opportunity The book is backed by considerable expertise on the part of the researchers with demonstrated expertise through their publications spawning a few decades It is invaluable to those who are concerned with designing policies for developing countries aimed at rapid and inclusive economic growth This book has been made possible by the intellectual and financial support extended by the Global Asia Institute National University of Singapore

Song, 2005-03-24 China's remarkable economic transition and capacity for dynamic growth has stunned the world. Throughout the period of economic reform, China has been moving towards the creation of a labour market. The scale of this transformation is unprecedented. New economic incentives, vast labour migration, draconian retrenchment of state workers, and sharply rising wage inequality are all characteristic of this unique transition. Drawing on more than a decade of survey-based research, the authors systematically document and analyse this important transformation. They use economic and sociological theory, institutional analysis, and political economy to fully explain the causes, pressures, obstacles, and consequences of the move towards a labour market in China. It is argued that much progress has been made towards the creation of a labour market, but that the process is far from complete.
