China's Changing Economy Curtis Andressen, 2016-05-20 One of the most dramatic events in the global economy over the past few decades has been the rise of China as a global economic power. From humble beginnings in the late 1970s, the policy shift in China from a planned to market economy has led to economic growth of tremendous speed. This book examines the changes taking place in China's economy today and the impacts of these changes in China and abroad. The central theme is that the rapid economic growth has come at a cost, as many problems have emerged as a result in China's economy and society, including a dramatic rich-poor gap, labour issues, problems in the banking sector, and severe inflation in the cost of housing, as well as challenges with respect to China's external trade. The Chinese government recognizes these problems and is taking steps to rebalance its economy and society. The book takes a political economy perspective in order to investigate the interplay between the political system in China and the way in which the economy is structured and the manner in which economic changes take place. Demonstrating that in order for China to achieve sustained economic growth and social improvement, it must undertake serious policy changes, it also highlights that if countries are going to deal with China in a stable and productive manner, a thorough understanding of key contemporary developments in that country is vital. Covering a range of the most pertinent issues facing China today, this book will be of interest to students and scholars of Chinese Economics, Economic Development, and Political Economy. **China Urbanizes** Shahid Yusuf, Anthony

Saich, 2008-01-22 The key challenges facing China in the next two decades derive from the ongoing process of urbanization. China's urbanization rate in 2005 was about 43%. Over the next 10-15 years, it is expected to rise to well over 50%, adding an additional 200 million, mainly rural migrants, to the current urban population of 560 million. How China copes with such a

large migration flow will strongly influence rural urban inequality the pace at which urban centers expand their economic performance and the urban environment The growing population will necessitate a big push strategy to maintain a high rate of investment in housing and the urban physical infrastructure and urban services To finance such expansion will require a significant strengthening and diversification of China's financial system Growing cities will greatly increase consumption of energy and water Containing this without at the same time constraining the economic performance of cities or the improvement in the standards of living will call for enlightened policies strategies careful urban planning and significant technological advances This volume identifies the key developments to watch and discusses the policies which would affect the course as well as the fruitfulness of change

China, India and Southeast Asia Edmund Terence Gomez, Kee Cheok Cheong, Vamsi Vakulabharanam, 2018-12-07 This volume studies the outcomes of the two way flow of investments and people between China and India and Southeast Asia These cross border flows have led to new settlements in Southeast Asia from which new outlooks have emerged among locally born generations that have given rise to new forms of solidarity and identification The advent of new generations of ethnic Chinese and Indians in Southeast Asia with no ties to China or India has spawned important debates about identity shifts which have not been registered by government leaders in Southeast Asia China and India as reflected in policy statements and investment patterns Identity changes are assessed in forms where they best manifest themselves in social life and in business ventures forged or unsuccessfully nurtured through tie ups involving foreign and domestic capital A state society distinction is employed to determine how the governments of these rapidly developing countries envision development through state intervention as well as with the employment of highly entrepreneurial ethnic groups and the outcomes of this on their societies and on their economies The chapters were originally published as a special issue in The Round Table

emerging economies exploring their economic social environmental and governance dimensions and other challenges It brings together multi disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS how BRICS are impacting African economies and how other emerging economies including Chile Mexico Turkey and others in Africa and Central Asia compare It observes the impact of governance challenges both within individual countries and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations
