Lubetkin Architecture And The Tradition Of Progress:

Berthold Lubetkin John Allan, 2012 Berthold Lubetkin John Allan, 2012 This is a comprehensive study on the life and work of modernist architect Berthold Lubetkin This book reveals the man behind the architecture a survivor of the Russian Revolution European traveller and social commentator an intellectual in Europe and a well known social activist in Britain throughout the 20th century Berthold Lubetkin John Allan, 2023-09-15 This book presents a compact and compelling account of the life and work of Berthold Lubetkin 1901 1990 widely regarded as the outstanding architect of his generation to practise in England It explores the key themes achievements and setbacks of his career drawing from the author's twenty year personal friendship with Lubetkin himself from discussions with former colleagues and from his direct experience of working with many of Lubetkin's buildings as a conservation architect The study reveals the significance of Lubetkin's Russian origins and European travels re-assesses his prime work of the 1930s and charts the extensive output of his often overlooked post war career It also considers Lubetkin's legacy in the later work of his key associates several of whom became significant architects in their own right Lubetkin is a legendary figure in architectural circles while still remaining slightly mysterious and misunderstood The author shines new light on the man and his ideas and assesses his unique place in modern architectural history Illustrations include original black white images as well as high quality colour studies of the buildings as they are now A complete List of Works and published commentaries also provide a valuable source of reference

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Betticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l'art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics

and accept without reservation that material transformations have always been at the origins of built form Berthold Lubetkin's Highpoint II and the Jewish Contribution to Modern English Architecture Deborah Lewittes, 2018-05-15 In 1935 the Russian born Jewish architect Berthold Lubetkin and his firm Tecton designed Highpoint a block of flats in London which Le Corbusier called revolutionary Three years later Lubetkin completed a companion design Yet Highpoint II felt very different and the sense that the ideals of modernism had been abandoned seemed hard to dispute Had modern architecture failed to take root in England This book challenges the belief that English architecture was on hiatus during the 1930s Using Highpoint II as a springboard Deborah Lewittes takes us on a journey through the defining moments of modern English architecture the high points of the period surrounding Highpoint II Drawing on Lubetkin's work and his writings the book argues that he advanced influential lasting theories which were rooted in his design for Highpoint II Lubetkin's work is explored within the context of wider Jewish emigration to London during the interwar years as well as the anti-Semitism that pervaded Britain during the 1930s As Lewittes demonstrates this decade was anything but quiet Providing a new perspective on twentieth century English architecture this book is of interest to students and scholars in architectural history urban studies Jewish studies and related fields *The Architecture of Edwin Maxwell Fry and Jane Drew* Iain Jackson, Jessica Holland, 2016-03-16 Maxwell Fry and Jane Drew were pioneers of Modern Architecture in Britain and its former colonies from the late 1920s through to the early 1970s As a barometer of twentieth century architecture their work traces the major cultural developments of that century from the development of modernism its spread into the late colonial arena and finally to its re-evaluation that resulted in a more expressive formalist approach in the post-war era This book thoroughly examines Fry and Drew's highly influential Tropical Architecture in West Africa and India whilst also discussing their British work such as their post World War II projects for the Festival of Britain Harlow New Town Pilkington Brothers Headquarters and Coychurch Crematorium It highlights the collaborative nature of Fry and Drew's work including schemes undertaken with Elizabeth Denby Walter Gropius Denys Lasdun Pierre Jeanneret and Le Corbusier Positioning their architecture writing and educational endeavours within a wider context this book illustrates the significant artistic and cultural contributions made by Fry and Drew throughout their lengthy careers **The Experience of Modernism** John R. Gold, 2013-12-16 Making extensive use of information gained from in-depth interviews with architects active in the period between 1928-1953 the author provides a sympathetic understanding of the Modern Movement's architectural role in reshaping the fabric and structure of British metropolitan cities in the post-war period and traces the links between the experience of British modernists and the wider international modern movement **The Coming of the Aerial War** Michele Haapamäki, 2014-01-08 In the first half of the 20th century the possibility of flight opened up entirely new avenues of thought and exploration In the age of H.G. Wells and Biggles the opening up of the air to balloons and planes the Royal Flying Corps was founded in 1912 appealed to concepts of courage and bravery which would be both encouraged and undermined by the

experiences of World War I The sky also held new terrors for everyday people who were now within reach of an airborne enemy these fears included the possibilities of bombing poison gas surveillance and social control This duality of fear and enthusiasm drove the Air Raid Precaution movement while vocal elements in the press and in parliament called for radical plans to cope with apocalyptic scenarios Here Michele Haapamaki charts the history of flight and of war in the air in the early twentieth century addressing the key issues of interwar historiography such as patriotism fear masculinity and propaganda
