Lucys Legacy Sex And Intelligence In Human Evolution:

Lucy's Legacy Alison Jolly, 2001 Takes a look at human evolution focusing on the long line of women and of female behavior that was to follow the age of the much studied oldest human remains

The Shortest History of Sex David Baker, 2024-02-06 A wild and satisfying ride through two billion years of sexual evolution The Shortest History books deliver thousands of years of history in one riveting fast paced read From the first microbial exchanges of DNA to Tinder and sexbots how did sex begin and how did it evolve to be so varied and complex in humans What influence do our genetic ancestors have on our current love lives And what might sex look like in the future With acuity humor and respect for human diversity The Shortest History of Sex reveals where the many facets of our sexuality chemical anatomical behavioral social come from Chasing down our evolutionary family tree from the first aquatic creatures to primate societies David Baker sheds light on our baffling array of passions impulses and fetishes and guides us toward a clear understanding of one of the deepest most abiding forces of human nature The Shortest History of Sex also charts how sex changed for humans across the foraging agrarian and modern eras showing how even as our biology and sexual instincts have remained the same the current nature of our sex lives has no historical or evolutionary precedent The result is a revealing utterly unique insight into history and human behavior and the profound forces of nature and nurture compelling our most intimate relationships The Shortest History books deliver thousands of years of history in one riveting fast paced read

Evolutionary Perspectives on Human Development Robert G. Burgess, Kevin MacDonald, 2005 This new edition of Evolutionary Perspectives on Human Development is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It s clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field David P Barash University of Washington Evolutionary Perspectives on

Human Development Second Edition considers the role of evolutionary theory in the field of developmental psychology to examine key topics of individual human development This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues The book emphasizes both domain general evolved psychological mechanisms and domain specific processes The text also integrates behavior genetic research with evolutionary and developmental principles In this contributed volume editors Robert L Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments Evolutionary Perspectives on Human Development applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view Key Features Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology

Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science International History Review A thoughtful book that can challenge some of our comfortable assumptions Journal of Military

History Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College

A Short History of Nearly Everything Bill Bryson, 2012-05-15 Bill Bryson's quest to understand everything that has happened in the history of the earth from the Big Bang theory to the rise of civilization and beyond revised to reflect the last two decades of scientific advancement How did we get from being nothing at all to where we are today How did the age of the dinosaurs eventually give way to the age of the iPhone In this completely revised update to the international phenomenon *A Short History of Nearly Everything* Bill Bryson returns to answer these questions and many more Bryson brings a groundbreaking account of life itself to a new generation of readers and wonderers as he takes subjects often passed off as boring and incomprehensible and renders them accessible fascinating and outright amusing to anyone who's ever wondered about the world around them Introducing readers to a long list of the world's most impressive archaeologists paleontologists physicists astronomers anthropologists and mathematicians from their offices and laboratories to dig sites and field camps Bryson embarks on a journey to discover answers to the biggest questions about the universe and ourselves *A Short History of Nearly Everything 2.0* is a profoundly enlightening surprisingly humorous and charmingly clever adventure into the realm of human knowledge as only Bryson can render it His revamped *Short History* is a thrilling journey through time and space and his writing will make readers both new and old see the world in a whole new way

Echoes of Our Origins Shirley C. Strum, 2025-09-09 This book follows Dr Shirley Strum's 50 year journey with baboons in Kenya challenging assumptions about primate behavior and offering insights into human nature science and conservation Provided by publisher

Archaeology Kevin Greene, 2002 A substantially revised and expanded edition of one of the most widely used and respected general introductions to the field of archaeology

The Development of the Mediated Mind Joan M. Lucariello, Judith A. Hudson, Robyn Fivush, Patricia J. Bauer, 2004-07-19 In this work the contributors examine ways in which cognition is embedded in everyday meaningful activities and the role of social context and cultural symbol systems such as language and text influence children's developing concepts and thought

Birthing Techno-Sapiens Robbie Davis-Floyd, 2021-03-30 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the social sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and

delivery of maternity services *Vulnerable Subjects* G. Thomas Couser, 2018-08-06 My primary concern is with the ethics of representing vulnerable subjects persons who are liable to exposure by someone with whom they are involved in an intimate or trust based relationship unable to represent themselves in writing or unable to offer meaningful consent to their representation by someone else Of primary importance is intimate life writing that done within families or couples close relationships or quasi professional relationships that involve trust rather than conventional biography which can be written by a stranger The closer the relationship between writer and subject the greater the vulnerability or dependency of the subject the higher the ethical stakes and the more urgent the need for ethical scrutiny from the Preface *Vulnerable Subjects* explores a range of life writing scenarios from the celebrity to the ethnographic and a number of life writing genres from parental memoir to literary case studies by Oliver Sacks G Thomas Couser addresses complex contemporary issues he investigates the role of disability in narratives of euthanasia and explores the implications of the Human Genome Project for life writing practices in any age when many regard DNA as a code that scripts lives and shapes identity Throughout his book is concerned with the ethical implications of the political and economic as well as the mimetic aspects of life writing The Real Chimpanzee Christophe Boesch, 2009-07-23 The Real Chimpanzee encapsulates the fascinating behaviour of wild chimpanzees and discusses the differences observed in different populations across the species and across the many levels of their social behaviour It explains why sex competition and predation pressures in a forest chimpanzee population made the females of the group highly social and gave the males a high level of within group solidarity making them very xenophobic towards outsiders Love is what makes war possible Christophe Boesch brings back to the table the debate over ecological pressures and social organization and the influence they have over issues such as the evolution of warfare co operation altruism and the position of females Written in an accessible style for a general audience as well as for undergraduate and graduate students he presents insightful views to give readers the background information to understand the struggle for survival of our closest living relative the chimpanzee and through this to find some keys to the ever so intriguing question of what makes us human Against the Grain Richard Manning, 2025-05-21 In this provocative wide ranging book *Against the Grain* Richard Manning offers a dramatically revisionist view of recent human evolution beginning with the vast increase in brain size that set us apart from our primate relatives and brought an accompanying increase in our need for nourishment For 290 000 years we managed to meet that need as hunter gatherers a state in which Manning believes we were at our most human at our smartest strongest most sensually alive But our reliance on food made a secure supply deeply attractive and eventually we embarked upon the agricultural experiment that has been the history of our past 10 000 years The evolutionary road is littered with failed experiments however and Manning suggests that agriculture as we have practiced it runs against both our grain and nature s Drawing on the work of anthropologists biologists archaeologists and philosophers along with his own travels he argues that not only our ecological ills overpopulation erosion pollution but our social and

emotional malaise are rooted in the devil's bargain we made in our not so distant past And he offers personal achievable ways we might re contour the path we have taken to resurrect what is most sustainable and sustaining in our own nature and the planet's

The Ethics of Nature Celia Deane-Drummond, 2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity's treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science

Thank You, Madagascar Alison Jolly, 2015-03-12 An enchanting book poignant and passionate Geographical A captivating and absorbing account Sir David Attenborough Madagascar is one of the world's natural jewels with over ninety per cent of its wildlife found nowhere else on Earth Few people knew it better than the pioneering primatologist and conservationist Alison Jolly Thank You Madagascar is her eyewitness account of the extraordinary biodiversity of the island and the environment of its people At the book's heart is a conflict between three different views of nature Is the extraordinary forest treasure house of Madagascar a heritage for the entire world Is it a legacy of the forest dwellers' ancestors bequeathed to serve the needs of their living descendants Or is it an economic resource to be pillaged for short term gain and to be preserved only to deliver benefits for those with political power Exploring and questioning these different views this is a beautifully written diary and a tribute to Madagascar

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology

Storytelling Apes Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy

Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Knowledge And Civilization Barry Allen, 2018-02-15
Offers a new original way of framing questions about knowledge *Knowledge and Civilization* advances detailed criticism of philosophy's usual approach to knowledge and describes a redirection away from textbook problems of epistemology toward an ecological philosophy of technology and civilization Rejecting theories that confine knowledge to language or discourse Allen situates knowledge in the greater field of artifacts technical performance and human evolution His wide ranging considerations draw on ideas from evolutionary biology archaeology anthropology and the history of cities art and technology
