# 1936-1940

LEFT: One of the early Ju 88s as used by the Luftwaffe in the early days of the war. Although the aircraft was not a true fighter-bomber, it was used in a variety of roles, including as a dive bomber. The aircraft was also used as a night fighter and as a bomber.

### August

The early days of August saw little combat activity; the main event to take place was the equipping of 1. Staffel, Erpr. Gr. 210 with fighter-bomber Bf 110 D-0/86. Conversion training to the use of the armed C-0 variant, 2. Staffel suffered the loss of two aircraft on 6 August; one was lost when it was pulled out of its dive too late during dive-bombing practice and crashed with the loss of both crewmen, and the other, on a test flight to check a repaired faulty engine, was abandoned by its crew when engine problems arose once more. In the latter aircraft the Bordfunkner's position was occupied by an engineer from Daimler-Benz to monitor engine performance; he baled out safely. The pilot, Uffr. Heinrich Schulteis, baled out but hit the frame of the aircraft and was killed.

### 8 August - Convoy 'Peewit'

Leaving Southampton on 7 August, convoy 'Peewit' was closely monitored by reconnaissance aircraft and was first attacked by German surface boats in the early hours of 8 August. The first attack on the convoy, shortly after 09:00 hours, was met with spirited opposition by defending RAF fighters. A second attack was launched in the early afternoon on the convoy, which had already suffered losses from the morning assault. On this occasion, fighter escort for the bombers was provided by the Bf 110s of I./ZG 1. Once again they tangled with intercepting British fighters, and once again their claims for victories were somewhat optimistic: 13. A feature of their claims was that they were all scored at low-level, between 500 and 1,000 metres. Set against that, 14. Staffel lost one Bf 110 and crew, with a further five returning to France with varying degrees of damage, one of whose pilots succumbed to his wounds.

### 11 August - central Channel and Thames estuary

Action early on 11 August involved the Bf 109s of 3./Erpr. Gr. 210 shooting down barrage balloons protecting Dover Harbour, and the Bf 110s of that unit then following up and bombing the harbour. All aircraft returned safely to Calais-Marck.

Later in the morning two major raids built up, both featuring Bf 110s, and the RAF reacted in strength to each of them. Heading out of the Cherbourg Peninsula towards the Dorset coast, the Luftwaffe formation was tracked by British radar. Both Gruppen of ZG 2 provided the fighter escort along with Bf 109s of JG 2 and JG 27 for Ju 88s and He 111s drawn from KG 54 and KG 27 respectively. Eight RAF squadrons rose to meet what was the largest raid yet to be sent against England.

Arriving at their holding point, the Bf 110s formed a large defensive circle to draw the RAF fighters away from the incoming bombers. The ruse worked, and soon a heavy dogfight developed between the Spitfires and Hurricanes and the Bf 110s of ZG 2. This was sufficient for the bombers to get through

ABOVE: Piloten Pte. Gerhard (left) of 13./GrGr 1 and Pte. Friedrich Lindemann of 14./GrGr 1. Jentsch was killed in action on 8 August in LI+KDL. Lindemann suffered the same fate in LI+CK on 27 September.

**Zerstörer** John J. Vasco, 2006-04 Wheeled armoured vehicles are as old as the motor car itself with early armoured cars first appearing before the start of World War 1 Within 20 years or so these crude early machines had become far more sophisticated powerful well protected and armed with considerable firepower In this fascinating new book accomplished military author Pat Ware tells the complete story of the development of the armoured car from its first blueprints to the significant role it ultimately played both in World Wars Developed for use in reconnaissance command control and communications these vehicles were far superior in speed and manoeuvrability to their tracked counterparts and provided a key supportive tool for the major combatants during World War 2 This book will be invaluable for all military enthusiasts who wish to have the fine detail on these magnificent powerful vehicles as it provides data on every armoured vehicle in use between 1939 and 1945 together with a comprehensive vehicle listing With an authoritative text and a staggering amount of detail and data this impressive work belongs on the shelf of all serious military historians and anyone who wishes to recreate this remarkable machine This new title will complement the author's previous volumes World War Two German Trucks and World War Two Military Vehicles Transport Halftracks building into a comprehensive library on World War 2 military vehicles

*Sea Eagles: 1939-41* Chris Goss, 2005 Using a similar format to the very popular Jagwagdwaffe series Sea Eagles offers readers a two volume study into maritime and anti shipping operations as conducted by the Luftwaffe over the English Channel North Sea the Far North and Baltic the Eastern Front and the Mediterranean For the first time these books contain a fascinating and eclectic mix of float planes and multi engined bombers converted to anti shipping duties There are also studies of some of the more interesting weaponry used by German bomber units operating in such a role such as the Rheinstahl PC 1400 X Fritz radio guided bomb and the Henschel 293 rocket driven remotely controlled stand off missile as used against destroyers in the Mediterranean as well as biographies of some of the leading anti shipping aces such as Aufhammer Alongside the photographic content much of which is previously unpublished the book also includes color artworks and first hand reminiscences from Luftwaffe pilots of the era The sea strike and maritime units are amongst the least known of the Luftwaffe's fighter force during World War II this new two volume work sets the record straight providing the aviation and military historian with a comprehensive and detailed study of this often ignored facet of the air war between 1939 and 1945

*Zerstörer, Volume One* John J. Vasco, 2005 The Luftwaffe Zerstörer units equipped with the twin engined Me 110 were first used to great effect in the escort and air superiority roles against the Polish Air Force in 1939 Later these units took part in the occupation of Norway and Denmark and during the Blitzkrieg against the west in 1940 when their numbers were expanded with the addition of new units Considered by G ring to be among the elite of the Luftwaffe the Zerstörer were deployed in the Battle of Britain in the Balkans North Africa and in the East where Zerstörergruppen accounted for significant numbers of Russian aircraft destroyed on the ground and in the air This is the first of two volumes covering the

history of the Zerster squadrons between 1939 and 1945 Each volume adopts the traditional Classic approach of a detailed narrative matched with a comprehensive selection of photos many previously unpublished and specially prepared color artworks **Flypast**, 2006 German Aircraft Industry and Production, 1933-1945 Ferenc A. Vajda, Peter Dancey, 1998

Beskriver den tyske flyindustri i perioden 1933-45 herunder de store forhold under 2 verdenskrig **A History of the Mediterranean Air War, 1940-1945** Christopher Shores, Giovanni Massimello, Russell Guest, Frank Olynyk, Winfried Bock, Andy Thomas, 2018-11-05 This fourth volume in the comprehensive series fills a gap in the existing narrative of WWII's Mediterranean air war Journal of Military History The fourth volume in this momentous series commences with the attacks on the Italian island fortress of Pantellaria which led to its surrender and occupation achieved almost by air attack alone The account continues with the ultimately successful but at times very hard fought invasions of Sicily and southern Italy as burgeoning Allied air power now with full US involvement increasingly dominated the skies overhead The successive occupations of Sardinia and Corsica are also covered in detail This is essentially the story of the tactical air forces up to the point when Rome was occupied just at the same time as the Normandy landings were occurring in northwest France With regards to the long range tactical role of the Allied heavy bombers only the period from May to October is examined while they remained based in North Africa with the narrative continuing in a future volume This volume also delves into the story of the soldiers' air force Frequently overshadowed by more immediate newsworthy events elsewhere the soldiers' struggle was often of an equally Homeric nature No future publication on the Mediterranean air war will be credible without use of this series Air Power History **Joint Operational Warfare** Milan N. Vego, 2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security But in addition by sustaining animals on natural vegetation and as part of local ecosystems these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with **The Rise of the Wehrmacht** Samuel W. Mitcham Jr., 2008-06-30 The Rise of the Wehrmacht is the first comprehensive work to deal with the German war effort in World War II from this point of view Its uniqueness lies in the fact that it covers the entire war effort from the point of view of the German military that actually conducted and fought the war something that has never been done before on this scale Excellent books have been written about the German Army Navy the Luftwaffe and the SS as well as about the Panzer branch the parachute arm the U Boat forces etc but this is the first to cover them all in depth Mitcham also covers the German Wehrkreise roughly translated as military district system in depth and recognizes its importance both in the formation and expansion of the

German Army before the war and in its continuing importance throughout the conflict He deals with the German rearmament in greater depth and detail than has been done before points out the importance of the police in the development of Germany's reserves before and during World War II and offers new insights into the evolution and development of the German military doctrine of Kesselschlacht the decisive battle of encirclement and annihilation In addition The Rise of the Wehrmacht explains the problems the Wehrmacht faced because of its too rapid expansion This expansion was far more rapid than the German generals intended and resulted in many problems especially in terms of equipment shortages and a shortage of qualified officers Finally Mitcham addresses the contributions of the Hitler Youth to the war effort where their work on farms fire and rescue crews in nursing and as postal workers for example provided essential services to German infrastructure **The**

**First and The Last** Adolf Galland, 2018-11-30 A fearless leader with 104 victories to his name Galland was a legendary hero in Germany's Luftwaffe Now he offers an insider's look at the division's triumphs in Poland and France and the last desperate battle to save the Reich The clearest picture yet of how the Germans lost their war in the air Time Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA Nigel Askey, 2013-11-01 Operation Barbarossa Volume IIA concerns the Wehrmacht All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I along with the contextual history An assessment of each weapon system's inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit's actual organisation and equipment All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units Landeschützen battalions and rail road and construction companies In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed

Wolfram Von Richthofen James S. Corum, 2008 The first book length biography of the Luftwaffe's top field commander Wolfram von Richthofen a master of the tactical and operational air war one of the key catalysts in the resurrection of the German air force and an ardent and unwavering follower of the Führer *Germany and the Second World War*, 1990 Volume VII of the Germany and the Second World War series looks at Germany and her Japanese ally on the defensive after the tide of war turned in 1943 An exhaustive study of the air war over the Reich and the Luftwaffe's growing impotence is followed by an account of the invasion of occupied France and the Allies advance to Germany's borders A final section examines Japan's defeat and capitulation and the creation of a new order in the Far East Germany and the Second World War Horst Boog, Werner Rahn, Reinhard Stumpf, Bernd Wegner, 2001-09-13 Annotation Unparalleled in scope and depth Germany and the Second World War is a magisterial ten volume history series that will prove indispensable to historians of the twentieth century This volume examines the transformation of a European war into a global conflict during the period

from 1941 1943 It focuses on the politics strategy and operations of the belligerent powers as Germany lost the initiative to the Allies and it spans both the climax and turning points of the war Its detailed analysis is supplemented by numerous maps diagrams and tables     **Information Bulletin** ,1943     **Zitadelle** Mark Healy,2016-08-04 Few battles attract interest so much as the Battle of Kursk Operation Zitadelle the code name given by Hitler to the Wehrmacht s last offensive on the Eastern Front in July 1943 has acquired an almost mythic status as one of the greatest clashes of armour in the history of warfare Long been depicted as the the swan song of the German tank arm by virtue of the huge tank losses experienced by the Germans the reality in light of the emergence of new information proved it to be anything but with historians previously accepting without question exaggerated Soviet accounts of the battle For all the resources devoted to this operation by the Germans Zitadelle was an abysmal failure and whilst they were not outfought by the Red Army at Kursk they were out thought by commanders of outstanding quality Zitadelle describes the German and Soviet tactics and explores the realities of the battles on sodden ground that culminated in the defeat of the panzers and the Soviet advance on the Reich     **Famous Fighters Of The Second World War, Volume One** William Green,2016-03-28 This volume is the 1960 follow up to the 1959 publication Famous Bombers of the Second World War Volume One William Green here covers a further extensive number of aircraft focussing on the fighters used by the Axis and Allies during the Second World War As before the types in approximate order of introduction to operational service and providing a brief developmental and operational history of each type Includes ME Komet Hawker Hurricane Supermarine Spitfire Mustang FW190 the Russian YAK series Hellcat Mitsubishi Zero BF109 and the Lockheed Lightning An Invaluable companion to Volume One as beautifully and comprehensively illustrated as before     *Germany and the Second World War: The Global War* ,1990     **The Luftwaffe's Secret WWII Missions** Dmitry Degtev,Dmitry Zubov,2020-12-28 Full of mystery and intrigue surrounding the Abwehr and the Luftwaffe secret missions supporting the insertion and less frequent extraction of agents Aviation News There are many vivid episodes in the operational service of the Luftwaffe s special and secret units which engaged in the delivery of agents and saboteurs in the rear of the enemy throughout the Second World War not just on the Eastern Front but across Asia and Europe The activities of the pilots and crews of these squadrons even in the Luftwaffe itself were closed and secret Information on the operations and missions of these units was known only to a limited number of people It was common practice for the crew of one aircraft in these units to know nothing about the assignments of their fellow airmen The area of activity of such units and aircraft covered the whole of Europe North Africa the Arctic circle the Urals the Caucasus and Central Asia including Iran Iraq and Afghanistan The Luftwaffe not only flew to these remote regions but also created secret bases for their aircraft Drawn from German and Russian sources much of the latter only recently declassified the authors expose for the very first time the Luftwaffe s secret operations and reveal the fate of many of the pilots agents and saboteurs in a story as breathtakingly dramatic as any blockbuster novel A most interesting account of the special Luftwaffe units that flew agents

into enemy territory during WWII What may surprise many readers is the extent of these operations that stretched deep into the Soviet Union and also into the Middle East and Afghanistan Firetrench      *Warfare and Armed Conflicts* Micheal Clodfelter,2017-05-23 In its revised and updated fourth edition this exhaustive encyclopedia provides a record of casualties of war from the last five centuries through 2015 with new statistical and analytical information Figures include casualties from global terrorism the wars in Iraq and Afghanistan and the fight against the Islamic State New entries cover an additional 20 armed conflicts between 1492 and 2007 not included in previous editions Arranged roughly by century and subdivided by world region chronological entries include the name and dates of the conflict precursor events strategies and details the outcome and its aftermath      **Ideas, concepts, doctrine** Robert Frank Futrell,1980
