William Ernest Henley, 1921 *Artful Immorality - Variants of Cynicism* Daniel Scott Mayfield, 2015-09-14 When a term is overused it tends to fall out of fashion Cynicism seems to be an exception Its polytropic versatility apparently prevents any discontinuation of its application Everyone knows that cynicism denotes that which is deemed deleterious at a given time and every time will specify its toxicities the apparent result being the term's non specificity This study describes the cynical stance and statement so as to render the term's use scholarly expedient Close readings of textual sources commonly deemed cynical provide a legible starting point A rhetorical analysis of aphorisms ascribed to the arch Cynic Diogenes facilitates describing the design of cynical statements as well as the characteristic features of the cynical stance These patterns are identifiable in later texts generally labeled cynical above all in Machiavelli's *Principe* With recourse to the Diogenical archetype cynicism is likewise rendered describable in Gracian's *Orculo manual* Diderot's *Le neveu de Rameau* and Nietzsche's *Posthumous Fragments* This study's description of cynicism provides a phenomenon otherwise considered amorphous with distinct contours renders transparent its workings and tenders a dependable basis for further analyses

[With] Suppl. 3 vols.; Index and epitome [and] Errata* Dictionary, 1895 *The Power of Language in the Making of International Law* Stephane Beaulac, 2004-04-01 The purpose of this book is to enter into the history of the mental social phenomena that are the word sovereignty and the myth of Westphalia Given the circularity of language the project proposes to examine the reality creating role of language as an organic instrument of social power within humanity In semiotic terms

the complex structures of words and also myths form part of sign systems in which they can both represent and create reality. These are the passive and active functions of language which explain that words and myths not only represent and describe reality but may also play a leading part in creating and transforming reality thus demonstrating and being used to carry fabulous power within humanity. The Peace of Westphalia is analysed to show that in spite of what actually took place in 1648 Westphalia has had an incredible social effect in international law standing for the proposition that it signalled the beginning of a new era based on state sovereignty. However it is argued that Westphalia constitutes a myth, an aetiological myth which has provided a way for society to explain itself to itself that is a way for international society to explain its genesis to itself. As regards sovereignty it is shown that Jean Bodin introduced the word in *Six Livres* for the purpose of having the French ruler enjoy supreme power in the hierarchical organisation structure of society. This is the original creative and transforming social effect on the shared consciousness of humanity for which the linguistic sign must be credited which has continued unaltered to this day. With respect to *Droit des Gens* it is demonstrated that Emer de Vattel utilised and actually changed the reality associated with sovereignty also for a specific reason namely to carry out its externalisation the ruling entity was now to enjoy exclusive power to govern which entailed being the sole representative of the people both internally and externally and also meant that it could not be submitted to any foreign state or to any higher law externally. Vattel's use of the word has had an extraordinary effect on the shared consciousness of society including that of the emerging international society which is still very much present today. These two archetype cases in which sovereignty developed show how this word has really had two paradigms over the years that is it has represented and created the two distinct realities of the internal and the international.
