Lyme Landscape with Figures Muriel A. Arber, 1988-01-01 *The School Arts Book*, 1906 **The Role of Women in the History of Geology** Cynthia V. Burek, Bettie Higgs, Geological Society of London, 2007 This book is a first as it unravels the diverse roles women have played in the history and development of geology as a science predominantly in the UK Ireland and Australia and selectively in Germany Russia and US The volume covers the period from the late eighteenth century to the present day and shows how the roles that women have played changed with time These included illustrators museum collectors and curators educationalists researchers and geologists Originally as wives sisters or mothers many were assistants to their male relatives This book looks at all these forgotten women and for the first time historians and scientists together explore the contribution they made to this male dominated subject *Women in the Biological Sciences* Carol A. Biermann, Louise S. Grinstein, Rose K. Rose, 1997-07-16 Biology textbooks and books on the history of science generally give a limited picture of the roles women have played in the growth and development of the biological sciences mentioning primarily the Nobel laureates This book provides a definitive archival collection of essays on a larger group of women profiling both their work and their lives The volume includes 65 representative women from different countries and eras and from as many branches of biological investigation as possible In addition to biographical information and an evaluation of the woman's career and significance each entry provides a full bibliographic listing of works by and about the subject The volume includes entries on women who have gained recognition through attainment of advanced degrees despite familial and societal pressures innovative research results influence exerted in teaching and guidance of students active participation and leadership in professional societies extensive scholarly publication participation on journal editorial boards extensive field experience and influence on public and political scientific policymaking A woman was considered eligible for inclusion if she met several of these criteria Providing a historical perspective the book is limited to women who were born before 1930 or are deceased Report of the Federal Security Agency United States. Office of Education, 1913 *Report of the Commissioner of Education [with Accompanying Papers]*. United States. Bureau of Education, 1912 **Report of the Commissioner of Education Made to the Secretary of the Interior for the Year ... with Accompanying Papers** United States. Bureau of Education, 1910 **Interpreting Landscapes** Christopher Tilley, 2016-06-03 This book takes a new approach to writing about the past Instead of studying the prehistory of Britain from Mesolithic to Iron Age times in terms of periods or artifact classifications Tilley examines it through the lens of their geology and landscapes asserting the fundamental significance of the bones of the land in the process of human occupation over the long dur e Granite uplands rolling chalk downlands sandstone moorlands and pebbled hilltops each create their own potentialities and symbolic resources for human settlement and require forms of social engagement Taking his findings from

years of phenomenological fieldwork experiencing different landscapes with all senses and from many angles Tilley creates a saturated and historically imaginative account of the landscapes of southern England and the people who inhabited them This work is also a key theoretical statement about the importance of landscapes for human settlement **The International Studio** ,1918 **A Record of My Artistic Life** John Burley Waring,1873 Disguised as the Devil M. M. Drymon,2008 This work began as a history of Lyme disease Looking in the historical records for places where this disease is now endemic the author noted that witch afflictions kept appearing in these same spots What unfolds is a journey of discovery looking back into the forested and deforested landscapes of Europe America's past that were abound with acorns deer pigs along with human societies creating cultural practices that had environmental ramifications Drawing upon the latest in scientific and historical research this study will become essential reading for those interested in controversies surrounding this disease in disguise It also explores the etiology of the witch and tells a compelling tale about the timeless importance of the interaction between humanity and the invisible world of bacteria Provided by publisher **Art Bulletin** ,1904 **Ecology of Fragmented Landscapes** Sharon K. Collinge,2009-06 Ask airline passengers what they see as they gaze out the window and they will describe a fragmented landscape a patchwork of desert woodlands farmlands and developed neighborhoods Once contiguous forests are now subdivided tallgrass prairies that extended for thousands of miles are now crisscrossed by highways and byways Whether the result of naturally occurring environmental changes or the product of seemingly unchecked human development fractured lands significantly impact the planet's biological diversity In *Ecology of Fragmented Landscapes* Sharon K Collinge defines fragmentation explains its various causes and suggests ways that we can put our lands back together Researchers have been studying the ecological effects of dismantling nature for decades In this book Collinge evaluates this body of research expertly synthesizing all that is known about the ecology of fragmented landscapes Expanding on the traditional coverage of this topic Collinge also discusses disease ecology restoration conservation and planning Not since Richard T T Forman's classic *Land Mosaics* has there been a more comprehensive examination of landscape fragmentation *Ecology of Fragmented Landscapes* is critical reading for ecologists conservation biologists and students alike **Annual Report of the Department of the Interior** United States. Department of the Interior,1912 **Special Exhibition Catalogue** ,1911 Landscape as Territory Clara Olóriz,2020-01-28 *Landscape as Territory* is a cartographic book project that critically addresses the agency of architects in the so called Urban Age understanding the notion of territory as a field of design praxis through which Interconnected landscapes are produced Territory understood as a political technology has the capacity to involve architects and designers into complex social political technical legal strategic and economic processes that are both historical and geographical engines of contemporary urbanization Islands in Northern Norway Territorial praxis is interrogated in a collection of threaded theory and design contributions where essays pose key questions that are addressed through projective
