Paludi, 2014-05-28 Written by experts in psycho oncology

this book synthesizes the findings of the latest research on women's cancers to empower women to make informed choices about treatment options. Each year hundreds of thousands of women are diagnosed with cancer in the United States alone. The total number affected is larger still comprising siblings, parents, partners, and children of these women. In this single volume work, an international team of experts address the physical, medical, and psychological matters that are triggered by a diagnosis of having a form of women's cancer: breast, cervical, endometrial, gestational, ovarian, uterine, vaginal, and vulvar, being some of the more common. The handbook examines and explains each type of women's cancer, covering the specifics of incidence, diagnosis, treatment options, and more, providing an up-to-date guide for women and their families to assist in making informed choices about their treatment options. The book includes personal accounts from women who survived cancers and beat their emotional challenges, addresses myths versus realities regarding women's cancers, and covers relevant related topics such as race, sexual orientation, religion, and cancer coping. Special attention is given to the impact of women's cancers on relationships, intimacy, and body image, as well as psychological factors such as anxiety, depression, and fear.

A Comprehensive Guide to Geriatric Rehabilitation E-Book Timothy L. Kauffman, Ronald W. Scott, John O. Barr, Michael L. Moran, 2014-09-05

Now in its third edition, this trusted clinical guide enables both the busy practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes, as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging, which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems, respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit, while aging-related conditions of the cardiovascular, pulmonary, integumentary, and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients. Extensive coverage over 84 chapters, each written by an expert in the field. Includes imaging, vision, and the aging ear. Cross-referenced, providing the complexity and interrelatedness of co-morbidities common to aging patients. Collaborative international perspective. Chapters on the aging spine, frailty, safe pilates for bone health, health care for older people. Additional renowned editor Ronald W. Scott. Revised title to reflect the

Multidisciplinary

Management of Head and Neck Cancer Ravi A. Chandra, Ryan J. Li, 2022-09-09 This book is a multidisciplinary guide to head and neck cancer. Head and neck cancer remains one of the most technically complex cancer subsites to manage. This field involves highly specialized multidisciplinary management and collaboration amongst surgeons, radiation oncologists, medical oncologists, radiologists, pathologists, and other health disciplines. The clinical and research landscape for head and neck oncology continues to evolve at a rapid pace. This multidisciplinary book provides the latest updates in the contemporary understanding and management of these tumors. The text incorporates updates in surgical techniques, minimally invasive and robotic techniques, reconstructive approaches, radiation medicine, new data on dose and fields, oligometastatic, oligoprogressive disease, retreatment, medical oncology, targeted immunotherapy, and molecular agents, in addition to other overarching topics such as side effects, biomarkers, nanotechnology, and epidemiology. Written by experts in their respective fields, chapters include the most up-to-date scientific and clinical information with perspectives from each relevant subspecialty. These sections are concise and accessible yet comprehensive. Palliative medicine, pathologic and imaging principles, and health systems/economics considerations are also described. This book is an ideal resource for clinicians, trainees, and researchers dealing with and interested in this challenging malignancy.
