Diseases are generally understood to be medical conditions that involve a pathological process associated with a specific set of symptoms. The diseases that appear to increase in frequency as countries become more industrialized and people live longer can include arthritis, heart disease, diabetes, depression, etc. These lifestyle diseases can be associated with smoking and alcohol and drug abuse. Diseases may be prevented by using a number of strategies including proper sanitation, proper nutrition, frequent exercise, and vaccination. With this impending growth, new resources are needed in academic preparation, ongoing professional support, and certification for disease managers. *The Disease Manager's Handbook* by Rufus Howe RN MA sets the stage to formalize the disease management profession as a whole while providing disease managers with a reference and professional structure for their practice. Written on the tenet that disease management is a powerfully effective and efficient intervention, *The Disease Manager's Handbook* is the first and only text that spells out the practice of disease management, providing the reader with the knowledge and proficiency necessary to service their patients with expert knowledge, skills, and compassion. Howe writes concisely and clearly, providing easy-to-follow learning objectives and challenging questions at the end of each chapter designed to fuel critical thinking. **China's Capacity to Manage Infectious Diseases** Xiaoqing Lu, 2009 **Partha's Fundamentals of Pediatrics** A Parthasarathy, 2013-04-30 The second edition of Partha's *Fundamentals of Pediatrics* has been thoroughly revised to bring trainees and physicians fully up to date with the latest developments and rapidly changing concepts in the field of paediatrics.
