Technology II is a branch of mechanical engineering which extensively deals with the production of industrial goods with the help of advanced tools and machinery. This subject gives information which covers the more practical knowledge than the theory. It provides a tool to enable production of manufacturing goods efficiently. The subject gives an idea to maximise product quality and to minimise the production cost. It also gives information about the different surface finishing techniques. My hope is that this book through its careful explanations of concepts, practical examples and figures bridges the gap between knowledge and proper application of that knowledge. *Challenges Confronting the Machine Tool Industry* United States.

Economic Efficiency of Manufacturing Technology Integration Stefan Tönissen, 2014-11-26. Manufacturing technology integration is an arising paradigm that aims at the functional integration of diverse manufacturing technologies into machine tools. This dissertation applies models of production cost and queuing theory to identify conditions under which manufacturing technology integration leads to greater productivity, lower cost and smaller throughput times than a manufacturing system consisting of conventional single technology machine tools.
