Machinery and Economic Development Martin Fransman,1986-10-24 **Machinery and Economic Development** Martin Fransman,1986-01-01 **Used Machinery and Economic Development** Dilmus D. James,1974 Monograph on the potential role of second hand equipment in economic development of developing countries covers choice of technology maintenance and equipment cost considerations the evaluation of social costs and benefits of used machinery supply and other aspects of the used machinery market etc Bibliography pp 197 to 206 references and statistical tables *China's Economic Development* Cai Fang,2022-10-20 Cai Fang is one of China s most distinguished economists This book elucidates the worldwide significance of China s economic development over the past 70 years from the perspectives of economic history and growth theory The Chinese economy has undergone an unprecedented period of growth and development since the reform and opening up in the late 1970s a process which the hallmarks of neoclassic economic theory have often proved inadequate to explain Examining the Chinese economy in the light of Chinese history and the development of the world economy as a whole the book charts the milestones and critical reforms of China s economic development providing insights into unique attributes as well as more generic patterns The discussion covers multiple hot topics in the field including the so called Great Divergence dual sector economic development real world experience of the reform and opening up rural reform urbanization economic reform poverty reduction the latter day slowdown of China s economic growth and China s role in and response to globalization global supply domination and other headwinds The book will be a must read for students scholars and general readers interested in the Chinese economy economic development political economy and development economics

Machines and Economic Growth Natalie McPherson,1994-10-26 The historical record concerning industrialization since 1770 is consistent with the classical view of economic growth but not with the currently accepted neo classical growth theory Flaws in the logic and empirical short comings of the neo classical theory suggest that it should be rejected Specifically ideas that originate in static concepts cannot be applied to growth a dynamic process Nineteenth century industrialization the world wars and the Depression the post war boom and the more recent slowdown in growth are discussed The Economic Development of Continental Europe 1780-1870 Alan Milward,S. B. Saul,2013-05-13 Upon its initial publication in 1973 this was the first textbook to present a unified view and comprehensive treatment of the economic development of Europe from a continental rather than a British perspective At the same time it is more than mere textbook it is an interpretive analysis of a wide range of research on the subject in many countries which explores the objective validity of earlier theories and provides an ideal starting point for further research into economic development and European history The work deals mainly with Western Europe but in principally studying both France and Germany up to 1870 the authors by no means neglect the smaller countries Indeed the work is unusual in dealing fully with the Scandinavian countries and others such as Switzerland and Belgium This is a reissue of the fully revised and corrected second edition of the work first

published in 1979 **Production Organizations in Japanese Economic Development** Tetsuji Okazaki, 2007-01-18 In this important new book the authors explore how production was organized in the context of the economic development of modern Japan Production organizations are taken to mean the long term relationships which economic agents create for production based on employment contracts or long term transactions This includes hierarchical organizations such as factories and corporations but also flexible arrangements such as subcontracting Modern Japanese economic development is characterized by the co evolution of these two types of production organizations while American economic development in the modern period is characterized by the development of a mass production system based on large hierarchical organizations The question is raised as to why and how a certain type of organization proliferated in a certain industry in a certain period and what the role of that organization was in coordinating production and giving incentives to the economic agents involved The result is a comparative institutional analysis of the organizational foundations of Japanese economic development in the modern period *The Economic Development of France and Germany 1815-1914* John Harold Clapham, 1955 **The Machinery Question and the Making of Political Economy 1815-1848** Maxine Berg, 1982-02-04 Dr Berg argues that technical change was one of the foremost theoretical concerns of Ricardo and his successors and the foundation for their distinctly optimistic view of the future She shows how the Machinery Question fostered the social conditions in which the status of Political Economy as a discipline was established and concludes that by the 1840s the divisions over machinery were firmly embedded in the great rival creeds of the future liberalism and socialism *The Economic Development of France and Germany, 1815-1914* Sir John Harold Clapham, 1928 [Proceedings of the 2022 International Conference on Bigdata Blockchain and Economy Management \(ICBBEM 2022\)](#) Daowen Qiu, Yusheng Jiao, William Yeoh, 2022-12-28 This is an open access book As a leading role in the global megatrend of scientific innovation China has been creating a more and more open environment for scientific innovation increasing the depth and breadth of academic cooperation and building a community of innovation that benefits all These endeavors have made new contribution to globalization and creating a community of shared future With the rapid development of modern economic society in the process of economic management informatization has become the mainstream of economic development in the future At the same time with the emergence of advanced management technologies such as blockchain technology and big data technology real market information can be quickly obtained in the process of economic management which greatly reduces the operating costs of the market economy and effectively enhances the management level of operators thus contributing to the sustained rapid and healthy development of the market economy Under the new situation the innovative application of economic management research is of great practical significance 2022 International Conference on Bigdata Blockchain and Economic Management ICBEM 2022 will be held on March 25 27 2022 in Wuhan China ICBEM 2022 will focus on the latest fields of Bigdata Blockchain and Economic Management to provide an international platform for experts professors scholars and
