industry worldwide It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania The main Romanian contributions to the world s technological heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published worldwide This is due among other reasons to the insufficient promotion in widely spoken languages of the history of Romanian technology The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches The present volume includes the following industries mining metallurgy oil natural gas machine building agricultural machinery military textiles and construction Folk technology the formation of the industrial system and mechanics are tackled in separate chapters For each field are engaged the collaboration of authors who have already published a history of their field Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its development

The Statistical Method in Economics and Political Science P. Sargant Florence,2018-04-09 Originally published in 1929 This balanced combination of fieldwork statistical measurement and realistic applications shows a synthesis of economics and political science in a conception of an organic relationship between the two sciences that involves functional analysis institutional interpretation and a more workmanlike approach to questions of organization such as division of labour and the control of industry The treatise applies the test of fact through statistical analysis to economic and political theories for the quantitative and institutional approach in solving social and industrial problems It constructs a framework of concepts combining both economic and political theory to systematically produce an original statement in general terms of the principles and methods for statistical fieldwork The separation into Parts allows selective reading for the methods of statistical measurement the principles and fallacies of applying these measures to economic and political fields and the resultant construction of a statistical economics and politics Basic statistical concepts are described for application with each method of statistical measurement illustrated with instances relevant to the economic and political theory discussed and a statistical glossary is included

Socialist Construction in China Abdol S. Soofi,2024-06-28 The Chairman of the State Planning Commission of the PRC in 1955 attributed the economic problems countering the development of the socialist economy to the anarchy of capitalist economy However after three decades of central planning the President of the Chinese Academy of Social Sciences exclaimed Today we are all recognizing the irrationality of an economic structure that has built up over the years The author of this book examines the economic policies and performances that brought such a radical transformation to the world outlook of China s leaders The book contains three parts The first part traces the historical roots of China s chaotic economic condition and hyperinflation in the 1940s and the early 1950s The second part deals with how the irrational economic system was formed The third part deals with the reasons for the emergence of economic irrationality resource misallocation the necessity of
