Mr Palomar:

Mister Palomar Italo Calvino, 1985 Italo Calvino's last fictional work is a witty elegant fantastic rendering of the ultimate observer whose name Mr Palomar deliberately evokes the famous telescope Beautiful nimble solitary feats of imagination The New York Times Book Review Calvino is the acclaimed author of *Difficult Loves* and *Invisible Cities* [Children of Silence](#) Michael Wood, 1999-10-06 On 20th century fiction **Understanding Italo Calvino** Beno Weiss, 1993 Highlights Calvino's fascination with folk tales knights social political allegories science fiction **Borges and His Successors** Edna Aizenberg, 1990 In the first book devoted to the impact made by Borges on the contemporary aesthetic imagination Aizenberg brings together specially commissioned essays from international scholars in a variety of disciplines to provide a wide ranging assessment of Borges's influence on the fiction literary theory and arts of our time Publishers website *Exercises in Constructive Imagination* Ermanno Bencivenga, 2001 Philosophy in this century has often self consciously presented itself as aiming at the destruction or deconstruction of the philosophical tradition or even of theorizing as such The basis for such self description may well be a deep seated anxiety about death but whatever its grounds the procession of distinguished intellectuals who seem mostly concerned with who gets to turn off the light on philosophy on his/her way out is one main reason why philosophy seems to have lost its grip on public opinion and public policy Which is ironical because there is often considerable constructive work going on under the pretence of all this destruction but the superficial rhetoric has more currency and impact than the substance of that work This book brings back the spirit of bold imaginative even outrageous theorizing into philosophy and contains a series of examples of it venturing playfully into quantum mechanics and political theory psychoanalysis and environmental ethics philosophy of language and sociology without any attempt at systematically exhausting these disparate fields but rather using them as suggestive excuses and arenas for the display of intellectual creativity There are numerous echoes among the various pieces and between them and other works by the same author but again these resonances are not systematized The result is more to be seen as a collection of snapshots of an intellectual landscape than as a hierarchical regimentation of it [Environmental Sociology](#) Michael D. The New York Times Guide to the Arts of the 20th Century: 1900-1929, 2002 Reviews news articles interviews and essays capturing 100 years of art architecture literature music dance theater film and television **Interstitial Writing** Paolo Bartoloni, 2003 This book pushes literary theory into unexplored grounds to articulate the modern and contemporary condition of interstitiality through an innovative discussion of literary and philosophical underpinnings and interpretation of works by Calvino Caproni Sereni and Svevo It will appeal to Italianists and anyone studying Italian literature

Postmodern/drama Stephen Watt, 1998 Scrutinizing the critical tendency to label texts or writers as postmodern scholar Stephen Watt argues that reading post modernly merely implies reading culture more broadly In contemporary drama Watt considers postmodernity less a question of genre or media than a mode of subjectivity shared by both playwright

and audience 6 illustrations **Blueprints** Marcus du Sautoy, 2025-09-09 A stunning book a thrilling read Peter Frankopan that reveals how creative people can harness the profound and productive relationship between mathematics and the arts When Shakespeare has the Three Witches cast Macbeth's lot he uses something very weird to do it not simply eye of newt and toe of frog but the number seven And when Hamlet claims To be or not to be that is the question Shakespeare reaches for eleven For Shakespeare prime numbers were magical And he is not alone As Marcus du Sautoy showcases in Blueprints creativity is inseparable from mathematics The designs of Le Corbusier and Leonardo the music of Glass Bach and Debussy the wild visions of Dali the choreography of Laban the animation of Pixar all are shot through with mathematics from primes and fractals to the weirder worlds of Hamiltonian cycles and hyperbolic geometry And Du Sautoy argues that the relationship runs both ways Just as mathematics inspires new art the artistic mindset is a necessity for discovering new mathematics Blueprints will expand your mind but more importantly it shows how to ignite your imagination Anyone who wants to create needs this book **We Are Not Users** Eswaran Subrahmanian, Yoram Reich, Sruthi Krishnan, 2024-10-29 A call to reclaim and rethink the field of designing as a liberal art where diverse voices come together to shape the material world We live in a material world of designed artifacts both digital and analog We think of ourselves as users the platforms devices or objects provide a service that we can use But is this really the case We Are Not Users argues that people cannot be reduced to the entity called user we are not homogenous but diverse That buzz of dissonance that we hear reflects the difficulty of condensing our diversity into one size fits all This book proposes that a new understanding of design could resolve that dissonance and issues a call to reclaim and rethink the field of designing as a liberal art where diverse voices come together to shape the material world The authors envision designing as a dialogue simultaneously about the individual and the social an act enriched by diversity of both disciplines and perspectives The book presents the building blocks of a language that can conceive designing in all its richness with relevance for both theory and practice It introduces a theoretical model terminology examples and a framework for bringing together the social cultural and political aspects of designing It will be essential reading for design theorists and for designers in areas ranging from architecture to software design and policymaking **Finders Keepers** Seamus Heaney, 2025-08-22 Whether autobiographical topical or specifically literary these writings circle the central preoccupying questions of Seamus Heaney's career How should a poet properly live and write What is his relationship to be to his own voice his own place his literary heritage and the contemporary world Along with a selection from the poet's three previous collections of prose Preoccupations The Government of the Tongue and The Redress of Poetry the present volume includes Heaney's finest lectures and a rich variety of pieces not previously collected in volume form ranging from short newspaper articles to radio commentaries In its soundings of a wide range of poets Irish and British American and Eastern European predecessors and contemporaries Finders Keepers is as its title indicates an announcement of both excitement and possession **Juvenescence** Robert Pogue Harrison, 2014-11-21 A meditation on the

human condition in an age when the old aspire to be young from the author of *Forests The Shadow of Civilization Children s Literature* How old are you The more thought you bring to bear on the question the harder it is to answer For we age simultaneously in different ways biologically psychologically socially And we age within the larger framework of a culture in the midst of a history that predates us and will outlast us Looked at through that lens many aspects of late modernity would suggest that we are older than ever but Robert Pogue Harrison argues that we are also getting startlingly younger in looks mentality and behavior We live he says in an age of juvenescence Like all of Robert Pogue Harrison s books *Juvenescence* ranges brilliantly across cultures and history tracing the ways that the spirits of youth and age have inflected each other from antiquity to the present Drawing on the scientific concept of neotony or the retention of juvenile characteristics through adulthood and extending it into the cultural realm Harrison argues that youth is essential for culture s innovative drive and flashes of genius At the same time however youth which Harrison sees as more protracted than ever is a luxury that requires the stability and wisdom of our elders and the institutions A heady deeply learned excursion rich with ideas and insights *Juvenescence* could only have been written by Robert Pogue Harrison No reader who has wondered at our culture s obsession with youth should miss it Harrison explores our culture s understanding of age youth and aging his book will provide mature wisdom indeed Publishers Weekly

The Measure of Times Past Donald J. Wilcox, 1987 In this extraordinary work Donald J. Wilcox seeks to discover an approach to narrative and history consistent with the discontinuous relative time of the twentieth century He shows how our B C A D system intimately connected to Newtonian concepts of continuous objective and absolute time has affected our conception and experience of the past He demonstrates absolute time s centrality to modern historical methodologies and the problems it has created in the selection and interpretation of facts Inspired by contemporary fiction and Einsteinian concepts of relativity he concludes his analysis with a comparison of our system with earlier pre Newtonian time schemes to create a radical new critique of historical objectivity

Five Bay Landscapes Karen Lutsky, Sean Burkholder, 2022-12-06 Threatened by issues of environmental health climate change population growth and industrial demands the coastal zone of the Great Lakes reflects an increasingly dysfunctional relationship between the people of the basin and the resources that support them Perhaps no place is the physical manifestation of this struggle more evident than in the basin s shallow bays While many regional and local responses to these issues focus on methods of control *Five Bay Landscapes* argues that responses should begin with critical experiential and pluralistic understandings of place Through a series of five narratives each located on a bay within the Great Lakes the authors share their practice of curious site explorations These explorations both written and visual consider the nuances and systems of these shorelines along with the lessons these findings might offer for future design and planning interventions Using the Great Lakes as a context *Five Bay Landscapes* illuminates a dynamic and robust landscape system and establishes a series of methods for understanding analyzing and intervening within the changing landscape
