Tropical Conservation A. Alonso Aguirre, Raman Sukumar, 2016-09-13 The tropics and subtropics are home to about 75% of the global human population Cultural economic and political circumstances vary enormously across this vast geography of some 170 countries and territories The regions not only harbor the world's poorest countries but their human populations are growing disproportionately faster than in temperate zones Some countries are developing rapidly Brazil China India and Mexico being obvious examples while others still remain in the poverty trap This region contains an astonishing proportion of global biodiversity some 90% of plant and animal species by some measures Its contribution to human well being is astounding It was the birthplace for our species and it hosts a myriad of plant and animal species which products feed us keep us healthy and supply us with a variety of material goods The tropics and subtropics are also a natural laboratory where some of humanity's most important scientific discoveries have been made Such biodiversity has enormous implications for research priorities capacity building and policy to address the challenges of conserving this region Tropical Conservation Perspectives on Local and Global Priorities drew the majority of its contributors

from this growing pool of scientists and practitioners working in Latin America Africa and Asia It introduces important conservation concepts and illustrates their application as the authors directly capture real world experiences in their home countries in preventing biodiversity loss and sustaining ecological health Today no part of the world can be viewed in isolation and we further codify and integrate a range of approaches for addressing global threats to nature and environmental sustainability including climate change and emerging diseases Five sections structure the major themes
