Pathways From The Periphery The Politics Of Growth In The Newly Industrializing Countries:

Pathways from the Periphery Stephan Haggard, 1990 *Pathways from the Periphery* is an innovative interpretation of the development of the newly industrializing countries NICs which now dominate Third World industry and manufacturing trade. While such countries as Brazil and Mexico have achieved industrialization through strategies intended to foster self reliance, the East Asian NICs South Korea, Taiwan, Hong Kong and Singapore have grown rapidly through an aggressive policy promoting the export of manufactured goods. Stephan Haggard provides the first comprehensive comparison of the politics of industrialization in these East Asian and Latin American countries and offers new evidence on current issues in comparative political economy including the implications of different growth paths for dependency, equity and democracy. Recognizing the influence on development strategies of external shocks such as depression, war and reduced access to foreign capital, Haggard emphasizes the importance of domestic political institutions for economic decision making. The East Asian NICs are characterized by close but regulated business government alliances, weak labor movements and politically insulated and administratively capable states. Factors Haggard shows that have facilitated flexible and coherent industrial policies. He argues that domestic policy choices can shape the external constraints states face. The author considers in detail why Latin America's long standing efforts to achieve self reliance have ironically resulted in a dependence on international capital greater than that of the East Asian countries. Addressing a long standing debate on the relationship between industrialization strategy and regime type, Haggard carefully assesses the connection between growth and democratic politics. Despite their authoritarian growth models, the Asian NICs have, he observes, achieved greater equity than their Latin American counterparts. Although the success of export led growth has in the past been associated with authoritarian rule, Haggard argues that no compelling theoretical reasons preclude democratic governments from achieving strong economic performance. Breaking new ground in theoretical inquiry and empirical research, *Pathways from the Periphery* will be welcomed by political economists, scholars and students of comparative politics, historians of Asian and Latin American public policy and others concerned with the challenge of economic development. *Pathways from the Periphery* Stephan Haggard, 1984

The Politics of Economic Adjustment Stephan Haggard, Robert R. Kaufman, 2018-06-05 In the 1980s some developing countries adopted orthodox market oriented policies in response to international economic crises, others experimented with alternative programs and still others failed to develop coherent adjustment strategies of any sort. Building on the case studies in *Economic Crisis and Policy Choice*, these essays offer comparative analysis of these divergent experiences with macroeconomic stabilization and structural adjustment. Barbara Stallings and Miles Kahler explore the external pressures on governments. Peter Evans and John Waterbury examine the role of the state in the adjustment process. Evans through the lens of earlier historical experience with economic restructuring. Waterbury by focusing on the politics of privatization. Joan Nelson analyzes the politics of income distribution in the adjustment process and Haggard and Kaufman

Hard Times in the Lands of Plenty Benjamin Smith, 2011-05-02 That natural resources can be a curse as well as a blessing is almost a truism in political analysis In many late developing countries the resource curse theory predicts the exploitation of valuable resources will not result in stable prosperous states but rather in their opposite Petroleum deposits for example may generate so much income that rulers will have little need to establish efficient tax extracting bureaucracies leading to shallow poorly functioning administrations that remain at the mercy of the world market for oil Alternatively resources may be geographically concentrated thereby intensifying regional ethnic or other divisive tensions In *Hard Times in the Land of Plenty* Benjamin Smith deciphers the paradox of the resource curse and questions its inevitability through an innovative comparison of the experiences of Iran and Indonesia These two populous oil rich countries saw profoundly different changes in their fortunes in the period 1960 1980 Focusing on the roles of state actors and organized opposition in using oil revenues Smith finds that the effects of oil wealth on politics and on regime durability vary according to the circumstances under which oil exports became a major part of a country s economy The presence of natural resources is he argues a political opportunity rather than simply a structural variable Drawing on extensive primary research in Iran and Indonesia and quantitative research on nineteen other oil rich developing countries

Smith challenges us to reconsider resource wealth in late developing countries not as a simple curse or blessing but instead as a tremendously flexible source of both political resources and potential complications

Politician's Dilemma Barbara Geddes, 1994 In Latin America as elsewhere politicians routinely face a painful dilemma whether to use state resources for national purposes especially those that foster economic development or to channel resources to people and projects that will help insure political survival and reelection While politicians may believe that a competent state bureaucracy is intrinsic to the national good political realities invariably tempt leaders to reward powerful clients and constituents undermining long term competence Politician's Dilemma explores the ways in which political actors deal with these contradictory pressures and asks the question when will leaders support reforms that increase state capacity and that establish a more meritocratic and technically competent bureaucracy Barbara Geddes brings rational choice theory to her study of Brazil between 1930 and 1964 and shows how state agencies are made more effective when they are protected from partisan pressures and operate through merit based recruitment and promotion strategies Looking at administrative reform movements in other Latin American democracies she traces the incentives offered politicians to either help or hinder the process In its balanced insight wealth of detail and analytical rigor Politician's Dilemma provides a powerful key to understanding the conflicts inherent in Latin American politics and to unlocking possibilities for real political change

Democratization in Confucian East Asia: Citizen Politics in China, Japan, Singapore, South Korea, Taiwan, and Vietnam , *Nationalism, Liberalism, and Progress: The rise and decline of nationalism* Ernst B. Haas, 1997 Has global liberalism made the nation state obsolete Or on the contrary are primordial nationalist hatreds overwhelming cosmopolitanism To assert either theme without serious qualification according to Ernst B Haas is historically simplistic and morally misleading Haas describes nationalism as a key component of modernity and a crucial instrument for making sense of impersonal rapidly changing and heterogeneous societies He characterizes nationalism as a feeling of collective identity a mutual understanding experienced among people who may never meet but who are persuaded that they belong to a community of kindred spirits Without nationalism there could be no large integrated state Nationalism comes in many varieties some revolutionary in rejecting the past and some syncretist in seeking to retain religious traditions Haas asks whether liberal nationalism is particularly successful as a rationalizing agent noting that liberalism is usually associated with collective learning and that liberal secular nationalism delivers substantial material benefits to mass populations He also asks whether liberal nationalism can lead to its own transcendence He explores nationalism in five societies that had achieved the status of nation states by about 1880 the United States Britain France Germany and Japan Several of these nation states became exemplars for later nationalists A second forthcoming volume will consider ten societies that modernized more recently many of them aroused to nationalism by the imperialism of these old nation states
