Karlos Jim Jorgen, 2016-01-05 After the disaster at Stalingrad Karlos von Ohr a Luftwaffe pilot returns to Berlin to discover that a small group of army officers is secretly plotting not only to bring an end to a losing stupid war but even to put an end to Hitler. Luckily Karlos is transferred to faraway Romania where his father is the chief flight instructor for the local air force. The local dictator Marshal Antonescu a friend of Hitler refuses to acknowledge that by the spring of 1943 the Third Reich is everywhere in retreat. In nearby Istanbul Karlos' uncle Siegfried runs an art gallery and does a little spying on the side. In that neutral city Karlos contrives to meet a friendly American agent who promises for a price to help Karlos defect to the Allied lines in Italy. Of course Karlos realizes that if he renounces his allegiance to Hitler and goes over to the enemy he will be denounced as a traitor by his countrymen. He can never go back home to Berlin. Karlos wonders Am I about to make the worst and last mistake of my life.

Evolution of the USAF Strategic Nuclear Bomber Deterrent George J. Refuto, 2023-04-28 About the Book In this research study former Defense Department consultant George Refuto traces the technological evolution of USAF long range strategic nuclear bomber aircraft during and after the Cold War as well as the development of their missions and utilization of US nuclear bombers in 21st century regional and global military threat scenarios. Five distinct periods are covered in this study: World War I 1914-1918, the Interwar Period 1919-1939, World War II 1939-1945, the Cold War 1946-1991, and the Post Cold War Period 1991-present with an emphasis on the latter two. In his writing Refuto focuses on developing a model that encompasses bombing and air defense for each period and showing how concepts, technologies and implementations of strategic bombing have changed and influenced the current level of development of the USAF strategic nuclear bomber force and doctrine and what is projected for the future.

About the Author George J. Refuto is a former Defense Department consultant who has extensive academic and professional experience in the fields of military history, weapon systems, technology, intelligence, surveillance, reconnaissance systems and US national security defense policy. He has worked in both the defense and intelligence communities and holds a master's degree in International Affairs from Columbia University with specializations in US-USSR strategic and theater tactical nuclear forces, undersea and airborne naval weapons systems and Russian/Soviet politics. He has previously published *Evolution of the US Sea-based Nuclear Missile Deterrent*, *Warfighting Capabilities* and is working on a third book on the US ICBM deterrent.

Targeting the Third Reich Robert S. Ehlers,

Jr.,2015-04-15 When large formations of Allied four engine bombers finally flew over Europe it marked the beginning of the end for the Third Reich Their relentless hammering of Germany totaling more than 1 4 million missions took out oil refineries industries and transportation infrastructures vital to the Reich s war effort While other accounts have focused on operational details this is the first book to reveal the crucial role of air intelligence in these dramatic campaigns Robert Ehlers reexamines these bombings through the lens of both air intelligence and operations a dual approach that shows how the former was so vital to the latter s success Air intelligence was essential to both targeting and damage assessment and by demonstrating its contributions to the Combined Bomber Offensive of 1943 1945 Ehlers provides a wealth of new insight into the war Ehlers describes the close ties that developed between the Royal Air Force s precision intelligence arm and the U S Army Air Force s precision bombardment forces telling how the RAF s photographic reconnaissance and signals intelligence steered both British and American bombers to the right targets at the right intervals with the right munitions He shows that the greatest strength of this partnership was its ability to orchestrate all aspects of damage assessment within an effective organizational structure so that by 1944 senior air commanders like the RAF s Arthur Bomber Harris and the AAF s Carl Tooeey Spaatz could gauge the accuracy of bombing with a high degree of precision analyze its effects on the German war effort and determine its effectiveness in helping the Allies achieve strategic objectives Ehlers focuses on three key offensives in 1944 against French and Belgian rail supply lines delivering German troops and supplies to Normandy against German oil refineries and against railroads and waterways inside the Reich that had a disastrous effect on the Nazi war effort In the process he underscores the degree to which bombers constituted part of a highly effective combined arms force giving Allied armies crucial advantages on the battlefield Drawing on a huge collection of bomb damage assessment photographs and a wealth of other archival sources he shows that the success of these and other efforts can be traced directly to the success of air intelligence Providing a deeper and more accurate understanding of the bomber campaigns role in the Allied victory Ehlers s study testifies to the strategic importance of these efforts in that war and provides a tool for understanding the importance of intelligence operations in future conflicts
