Leonard, 1988 *European Communities* John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era. It aimed for nothing less than a complete economic union so that goods, people, and capital would be able to pass over national boundaries of member countries as freely as they move within any one country. As the Community's target date of 1992 for economic integration draws closer, the need for information, both current and historical, becomes more urgent. The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts, combining older publications with new. The literature on the EC is vast and issues. The Community itself nearly 3000 publications a year. The range of material covered in this volume is distinguished by its great scope. Historical sections provide listings on the postwar years of economic recovery, the development of the EC, and biographies of the leading personalities involved. Policy-oriented sections encompass such subjects as labor, transportation, environment, energy, and education. The political ramifications of economic union, financial and fiscal affairs, relations between the EC and the Third World, and foreign relations in general are dealt with in separate sections. The volume concludes with a listing of major European Community publications. The sheer bulk of published material on the EC, much of it duplicated, has made keeping up with its developments difficult for small and medium businesses in Europe and elsewhere. This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992. **Information Market Guide (I'M Guide): Commission of the European Communities** DIANE

The European Union Munir Hussain,2016-12-17 This book outlines the foreign and security policy of the European Union as envisaged under the Common Foreign and Security Policy CFSP Since establishing the CFSP in the 1990s the European Union EU has showed its enthusiasm for global leadership empowering European citizenship and developing its international standing as an economic and political supranational organization In particular the book examines the EU s peacekeeping and conflict resolution dynamics in order to analyze the political and security dimensions of the EU It argues that due to the loose collective foreign policy and inter bloc dilemmas the EU has failed to perform as an actor of substance in international politics However at the regional level the EU s peacekeeping efforts have enjoyed considerable success The book further explains the dynamics of successful regional and unsuccessful extra regional peacekeeping and conflict resolution efforts on the part of the EU with the help of a case study The case study assesses two key hypotheses that the stronger an EU member state s collective Europeanization approach is the higher the success of the EU is in inter bloc disputes and that the weaker an EU member state s execution of the CFSP on international disputes is the less successful the EU is in the context of international peacekeeping
