

B. Individual and Collective Belief and Support

5. Group members possess and demonstrate belief and respect for their profession and discipline; they believe in, even love their area and communicate this to others.
6. Members of the group pay attention to social maintenance, trying to make their school, department, or faculty a 'good place' (MacBeath, 2006); members care for each other and their students as people and social and professional relationships are important.

Rationality And Collective Belief

Rationality And Collective Belief:

Rationality and Collective Belief Anthony R. Harris,1986 Collective Rationality and Collective Reasoning

Christopher McMahon,2001-08-06 This book examines the issue of rational cooperation especially cooperation between people with conflicting moral commitments The first part considers how the two main aspects of cooperation the choice by a group of a particular cooperative scheme and the decision by each member to contribute to that scheme can be understood as guided by reason The second part explores how the activity of reasoning itself can take a cooperative form The book is distinctive in offering an account of what people can accomplish by reasoning together of the role of deliberation in democratic decision making and of the negotiation of the proper use of concepts Presenting for the first time a detailed analysis of the general problem of cooperation and collective reasoning between people with different moral commitments this book will be of particular interest to philosophers of the social sciences and to students in political science sociology and economics Cambridge Press *Logic, Rationality, and Interaction* Natasha Alechina,Andreas Herzig,Fei Liang,2023-10-23 This LNCS book is part of the FOLLI book series and constitutes the proceedings of the 9th International Workshop on Logic Rationality and Interaction LORI 2023 held in Jinan China in October 2023 The 15 full papers presented together with 7 short papers in this book were carefully reviewed and selected from 40 submissions The workshop covers a wide range on the following topics such as agency argumentation and agreement belief representation probability and uncertainty belief revision and belief merging knowledge and action dynamics of informational attitudes intentions plans and goals decision making and planning preference and utility cooperation strategic reasoning and game theory epistemology social choice social interaction speech acts knowledge representation norms and normative systems natural language rationality philosophical logic **Rationality in Action** Paul K. Moser,1990-10-26 An anthology of previously published pieces that have proven long term importance to theoretical work in rational action

Belief Revision meets Philosophy of Science Erik J Olsson,Sebastian Enqvist,2010-10-27 Belief revision theory and philosophy of science both aspire to shed light on the dynamics of knowledge on how our view of the world changes typically in the light of new evidence Yet these two areas of research have long seemed strangely detached from each other as witnessed by the small number of cross references and researchers working in both domains One may speculate as to what has brought about this surprising and perhaps unfortunate state of affairs One factor may be that while belief revision theory has traditionally been pursued in a bottom up manner focusing on the endeavors of single inquirers philosophers of science inspired by logical empiricism have tended to be more interested in science as a multi agent or agent independent phenomenon *Stephen Turner and the Philosophy of the Social* Christopher Adair-Totteff,2021-02-08 In this volume the philosophical writings of Stephen Turner on social science and the social are examined critically in essays by major scholars in philosophy and sociology from all over Europe and the United States The topics covered include his intellectual trajectory and issues over the concepts of practices the belief desire

model of action explanation normativity and collectivities These issues form the core of the philosophy of social science and are central to the history of the social sciences In addition there are substantive discussions of the relation of cognitive science to economics and Weber of ethnography and of the legacy of Talcott Parsons The volume includes Turner s response to these essays which also presents a synthesis and retrospective overview With contributions by Christopher Adair Toteff Alban Bouvier David Henderson John Holmwood Terence Horgan Peter Olen Mark Risjord Paul Roth Theodore R Schatzki Karsten Stueber Sam Whimster Rafa Wierzchos awski and Julie Zahle as well as Stephen Turner himself Logic, Rationality, and Interaction Alexandru Baltag,Jeremy Seligman,Tomoyuki Yamada,2017-09-01 This LNCS volume is part of FoLLI book serie and contains the papers presented at the 6th International Workshop on Logic Rationality and Interaction LORI VI held in September 2017 in Sapporo Japan The focus of the workshop is on following topics Agency Argumentation and Agreement Belief Revision and Belief Merging Belief Representation Cooperation Decision making and Planning Natural Language Philosophy and Philosophical Logic and Strategic Reasoning The Epistemology of Group Disagreement Fernando Broncano-Berrocal,J. Adam Carter,2020-11-23 This book brings together philosophers to investigate the nature and normativity of group disagreement Debates in the epistemology of disagreement have mainly been concerned with idealized cases of peer disagreement between individuals However most real life disagreements are complex and often take place within and between groups Ascribing views beliefs and judgments to groups is a common phenomenon that is well researched in the literature on the ontology and epistemology of groups The chapters in this volume seek to connect these literatures and to explore both intra and inter group disagreements They apply their discussions to a range of political religious social and scientific issues The Epistemology of Group Disagreement is an important resource for students and scholars working on social and applied epistemology disagreement and topics at the intersection of epistemology ethics and politics **Rationality, Humility, and Spirituality in Christian Life** Dennis Hiebert,2020-02-27 As Euro American culture turns resolutely away from religiosity toward spirituality and becomes increasingly post Christian the ordinary everyday practice of Christian life is ever more questioned and in need of scrutiny In this interdisciplinary analysis Christians are first called to comprehend the excessive rationality that modernity has built into both the cognitive and organizational structure of contemporary Christian life They are then summoned to personify an authentic attitude of humility and in particular the virtue of intellectual humility that is most challenged and tested by religious convictions Going forward Christians are subsequently invited to live their faith more as an internally differentiated and open spirituality rather than an externally determined and regulated religiosity When we exhaust our rationality and are confronted with its limitations we are humbled by our finitude and animated by our spirituality *La philosophie contemporaine / Contemporary philosophy* Guttorm Fløistad,2012-12-06 The present publication is a continuation of two earlier series of chronicles Philosophy in the Mid Century Firenze 1958 59 and Contemporary Philosophy Firenze 1968 edited by Raymond Klibansky As with the earlier

series the present chronicles purport to give a survey of significant trends in contemporary philosophical discussion The time space covered by the present series is approximately 1966-1978 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic and the philosophy of language the convergence of interest though not necessarily of opinion of different traditions upon certain problems and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be of assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen the Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far four volumes have been prepared for the new series The present chronicles in Philosophy of Science Vol 2 follow the chronicles in the Philosophy of Language and Philosophical Logic Vol Rationality and Commitment Fabienne Peter, Hans Bernhard Schmid, 2007-12-13 List of Figures Schemata and Tables p vii List of Contributors p ix Acknowledgments p xii Introduction p 1 Rational Fools Rational Commitments Fabienne Peter and Hans Bernhard Schmid p 3 Part I Committed Action p 15 1 Why Exactly is Commitment Important for Rationality Amartya Sen p 17 2 Construing Sen on Commitment Philip Pettit p 28 3 Sympathy Commitment and Preference Daniel M Hausman p 49 Part II Rethinking Rationality p 71 4 Instrumental Rationality versus Practical Reason Desires Ends and Commitment Herlinde Pauer Studer p 73 5 The Grammar of Rationality Geoffrey Brennan p 105 6 The Rationality of Rational Fools The Role of Commitments Persons and Agents in Rational Choice Modelling Werner Guth and Hartmut Kliemt p 124 7 Rational Self Commitment Bruno Verbeek p 150 8 Rationality and Commitment in Voluntary Cooperation Insights from Experimental Economics Simon Gächter and Christian Thoni p 175 Part III Commitment Intentions and Identity p 209 9 Beyond Self Goal Choice Amartya Sen's Analysis of the Structure of Commitment and the Role of Shared Desires Hans Bernhard Schmid p 211 10 Cooperation and the We Perspective Raimo Tuomela p 227 11 Collective Intentions Commitment and Collective Action Problems Margaret Gilbert p 258 12 Theories of Team Agency Natalie Gold and Robert Sugden p 280 13 Identity and Commitment Sen's Fourth Aspects of the Self John B Davis p 313 Comment p 337 Rational Choice Discipline Brand Name and Substance Amartya Sen p 339 Index

Cognitive Autonomy and Methodological Individualism Francesco Di Iorio, 2015-05-28 Di Iorio offers a new approach to Hayek's Sensory Order linking neuroscience to the old Verstehen tradition and to contemporary theories of self organizing systems this should be on the reading list of everyone who is interested in Hayek's thought Barry Smith University

at Buffalo editor of *The Monist* This impressive and well researched book breaks new ground in our understanding of F A Hayek and of methodological individualism more generally It shows that methodological individualism sanctions neither an atomistic view of society nor a mechanical determinism The book carefully analyzes an important tradition in the social sciences and compares it to many important philosophical sociological and economic systems of thought This is an enlightening book for all scholars interested in the methodological problems of the social sciences Mario J Rizzo New York University One of Hayek s most important contributions is his linking of complex methodological individualism which deals with the emergence of spontaneous orders and unintended collective structures in complex self organizing social systems with a cognitive psychology What makes Francesco Di Iorio s book of great interest is that by building on Hayek s seminal book *The Sensory Order* it deepens the connections between cognition and rules of just conduct taking into account relevant theories on subjectivity and consciousness such as phenomenology hermeneutics and enactivism Jean Petitot cole des Hautes tudes en Sciences Sociales EHESS Paris In this thoughtful and enlightening book Francesco Di Iorio uses Hayek s cognitive psychology as the starting point for investigation of the relationship between the autonomy of the agent and socio cultural influences within methodological individualism The book provides an illuminating and innovative analysis of a central issue in the philosophy of social science by setting Hayek s view on mind and action in fruitful relation to approaches such as Gadamer s hermeneutics Merleau Ponty s phenomenology Varela s and Maturana s enaction Boudon s interpretative sociology Popper s fallibilism and Mises praxeology One of the most interesting aspects of this book is its argument that hermeneutics and fallibilism refer not to two different methods but to the same one Dario Antiseri Emeritus Professor at LUISS University Rome Francesco Di Iorio s book explores in an original way the connections between Hayek s methodological individualism and his fascinating idea that human mind is both an interpretative device and a self organizing system It is a brilliant clearly written work characterized by a certain intellectual courage which makes a remarkable contribution to the sociology of knowledge G rald Bronner Paris Diderot University *The Rational Inquirer* Michele Palmira, 2025-06-13 The *Rational Inquirer* offers an original account of the rational response to peer disagreement in terms of a duty to double check one s initial conclusions and a permission to retain an inquiry directing attitude of hypothesis toward those conclusions This allows for a vindication of the competing rational pressures to revise and retain one s original views that give rise to the distinctive puzzle of peer disagreement Michele Palmira conceives of peer disagreement as higher order evidence that generates a genuine epistemic duty to double check one s initial conclusions His inquiry theoretic approach contrasts with existing approaches that characterise the rational response to higher order evidence in terms of doxastic duties to revise or retain one s beliefs He develops a pluralist view of the aims of inquiry offers a definition of double checking and defends the genuine epistemic nature of the duty to double check Palmira shows that while the duty to double check is incompatible with rational belief retention it is compatible with the retention of an attitude of hypothesis whereby

two peers retain their cognitive leanings toward conflicting answers to the question at hand He also contends that hypothesis is a sui generis doxastic attitude that does not reduce to suspended judgement or credences develops a non evidentialist and consequentialist view of the central epistemic norm governing rational hypothesis and argues that the account on offer compares favourably with recent views that also appeal to doxastic attitudes other than belief and suspended judgement

Bursting Our Epistemic Bubbles Heather Rabenberg,2025-05-30 Due in large part to the increased personalization of various aspects of the Internet many people have become insulated from the epistemic influence of people with views different from their own This book develops a social epistemic framework that expands our understanding of epistemic normativity such that we can get a clearer view of phenomena like epistemic bubbles and echo chambers The book begins by arguing that as members of epistemic communities we are subject to epistemic norms and values that cannot be realized by a single individual Attention to these social epistemic values is crucial to getting to the core of the problems that plague our current social and political epistemic world After laying out a thoroughly social epistemic framework the author uses it to argue that there are epistemic norms specifically governing inquiry and trust These two concepts have often been relegated to the practical realm rather than the epistemic This is a mistake because understanding how we ought to trust and inquire is central to thinking about how to fix many of our social epistemic problems The author argues that assuming we must choose between trust and inquiry is often the source of our social epistemic problems Inquiring while trusting is a crucial epistemic balancing act which anchors us in epistemic communities and assists us in the pursuit of knowing with others **Bursting Our Epistemic Bubbles** will be of interest to scholars and advanced students working in social and political epistemology

Knowledge, Beliefs and Economics R. Arena,2006-01-01 The contributors to this book also suggest the need for a more integrated perspective on the meaning as well as the role of knowledge and beliefs in economics in the future Possible lines of future research such as the extension of the concept of rationality in economics or the focus on cognitive processes in economic action are discussed

The Philosophy of Sociality Raimo Tuomela,2007-08-16 Concepts based on full blown collective intentionality aboutness are central for understanding the social world The book systematically studies social groups collective commitment group intentions beliefs and actions especially authority based group attitudes and actions also addressing cooperation cultural evolution and responsibility

[Encyclopedia of Philosophy and the Social Sciences](#) Byron Kaldis,2013-03-07 This encyclopedia magnificently edited by Byron Kaldis will become a valuable source both of reference and inspiration for all those who are interested in the interrelation between philosophy and the many facets of the social sciences A must read for every student of the humanities Wulf Gaertner University of Osnabrueck Germany Like all good works of reference this Encyclopedia of Philosophy and the Social Sciences is not to be treated passively it provides clear and sometimes controversial material for constructive confrontation It is a rich resource for critical engagement The Encyclopedia conceived and edited by Byron Kaldis is a work of impressive scope and I am delighted to have it on my

bookshelf David Bloor Edinburgh University This splendid and possibly unique work steers a skilful course between narrower conceptions of philosophy and the social sciences It will be an invaluable resource for students and researchers in either or both fields and to anyone working on the interrelations between them William Outhwaite Newcastle University The Encyclopedia of Philosophy and the Social Sciences is the first of its kind in bringing the subjects of philosophy and the social sciences together It is not only about the philosophy of the social sciences but going beyond that it is also about the relationship between philosophy and the social sciences The subject of the Encyclopedia is purposefully multi and interdisciplinary Knowledge boundaries are both delineated and crossed over The goal is to convey a clear sense of how philosophy looks at the social sciences and to mark out a detailed picture of how the two are interrelated interwoven at certain times but also differentiated and contrasted at others The Entries cover topics of central significance but also those that are both controversial and on the cutting edge underlining the unique mark of this Encyclopedia the interrelationship between philosophy and the social sciences especially as it is found in fresh ideas and unprecedented hybrid disciplinary areas The Encyclopedia serves a further dual purpose it contributes to the renewal of the philosophy of the social sciences and helps to promote novel modes of thinking about some of its classic problems

Information Systems and Global Diversity Chrisanthi Avgerou, 2002 Drawing on experience and research in different societies this text explains the nature of organizational diversity in which ICT innovation takes place and also develops a conceptual approach to account for it

Magic, Science and Religion and the Scope of Rationality Stanley J. Tambiah, 1990-03-22 This accessible and illuminating book explores the classical opposition between magic science and religion
