music     **Messiaen's Musical Techniques: The Composer's View and Beyond** Gareth Healey, 2016-04-22 Despite Messiaen's position as one of the greatest technical innovators of the twentieth century his musical language has not been comprehensively defined and investigated The composer's 1944 theoretical study *The Technique of My Musical Language* expounds only its initial stages and while his posthumously published *Traité de rythme, de couleur, et d'ornithologie* contains detailed explanations of selected techniques in most cases the reader is left to define these more precisely by observing them in the context of Messiaen's analyses of his own works Technical processes are nevertheless in many cases the primary components of a work or movement For instance *Personnages* dominate *Joie du sang des toiles* from the *Turangala* symphonie and in certain cases such as *Le change* from the *Vingt regards sur l'Enfant Jésus* the process asymmetric augmentation is the only structuring element present Given this reliance on idiosyncratic techniques clear comprehension of the music is impossible without a detailed knowledge of Messiaen's methods Gareth Healey charts their development and interconnections considers their relationship with formal structures and applies them in refined and extended form to works for which Messiaen himself left no published analysis     *The Composer As Intellectual* Jane F. Fulcher, 2005-08-25 Their consciousness raised by the First World War and the xenophobic nationalism of official culture some joined parties or movements allying themselves with and propagating different sets of cultural and political social goals Jacket

*Neuroscience and Art* Amy Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with the natural and social environment In this artists from all genres are incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect

with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

*Late Style and its Discontents* Gordon McMullan, Sam Smiles, 2016-09-01 Late style is a critical term routinely deployed to characterise the work of selected authors composers and creative artists as they enter their last phase of production often but not only in old age Taken at face value this terminology merely points to a chronological division in the artist's oeuvre late being the antonym of early or the third term in the triad early middle late However almost from its inception the idea of late style or late work has been freighted with aesthetic associations and expectations that promote it as a special episode in the artist's creative life Late style is often characterised as the imaginative response made by exceptional talents to the imminence of their death In their confrontation with death creative artists critics claim produce work that is by turns a determination to continue while strength remains a summation of their life's work and a radical vision of the essence of their craft And because this creative phenomenon is understood as primarily an existential response to a common fate so late style is understood as something that transcends the particularities of place time and medium Critics seeking to understand late work regularly invoke the examples of Titian Goethe and Beethoven as exemplars of what constitutes late work proposing that something unites the late style of authors composers and creative artists who otherwise would not be bracketed together and that lateness per se is a special order of creative work The essays in this collection resist this position Ranging across literature the visual arts music and scientific work the material assembled here looks closely at the material biographical and other contexts in which the work was produced and seeks both to question the assumptions surrounding late style and to prompt a more critical understanding of the last works of writers artists and composers

*Accenting the Classics* Deborah Mawer, Barbara L. Kelly, Rachel Moore, Graham Sadler, 2023 Brings new insights to the music of well known European composers by telling a fascinating little known story about French music publishing specifically through the lens of Jacques Durand's edition *Classique* French composers performers and musicologists acted as editors of eighteenth and nineteenth century European classics primarily for piano Among these editors were Fauré Saint-Saëns Debussy Ravel and Dukas the objects of their enquiries included core works by Rameau Bach Mozart Beethoven Mendelssohn Schumann and Chopin Presenting six composer-editor case studies the volume shows that the French accent both musical and cultural upon this predominantly Austro-German music was highly varied Editorial responses range from scholarly approaches to those directed by performance or compositional agendas and from pan-European to strongly patriotic stances Intriguing intersections are revealed between old and new and between French and cross-European canons Beyond editing the book explores the edition's role in pedagogy and performance including by pianists Robert Casadesu and Yvonne Loriod and in the

reassertion of contemporary French composition especially regarding innovation around neoclassicism It will interest a wide readership including musicologists performers and concert goers cultural historians and other humanities scholars **What Killed the Great and Not So Great Composers?** Joseph W. Lewis, Jr., M.D.,2010-04-23 From a personally assembled database of 13 859 classical musicians What Killed the Great and not so Great Composers delves into the medical histories of a wide variety of composers from both a musical and medical standpoint Biographies of musicians from Johann Sebastian Bach of the Baroque period to Benjamin Britten of the Modern era explore in depth their illnesses and the impact their diseases had on musical productivity Other chapters referenced to specific composers are devoted to such diverse ailments as deafness mental disorders sexually transmitted diseases surgery and war injuries to name a few A unique section of statistics and demographics analyzes various aspects of composers lives such as their longevity related to contemporaneous nonmusical populations the incidence of various illnesses they experienced over the centuries and the type of medical problems suffered by the so called top 100 classical musicians Although a precise and complete accounting of the great composers ailments may never be possible a general understanding of the medical problems experienced by these unique individuals nevertheless can heighten one's appreciation of their creative processes despite the hardships imposed by their physical and mental illnesses Although some individuals surrendered to their disabilities for a variety of reasons others were able to rise above their infirmities and produce the wonderful music mankind has enjoyed through the centuries
