## Raw Guts:

*Restoring Your Digestive Health*: Jordan Rubin, Joseph Brasco, 2003-05-01 This title teaches readers how to love their guts and lose the medicine It provides a revolutionary wellbeing programme for the millions of people seeking a simple natural lifestyle change to help ease the pain of their debilitating digestive disorders     **Hakluytus Posthumus** Samuel Purchas, 1905     *No Guts, No Glory* Steven Lamm, M.D., Sidney Stevens, 2012-04-01 No matter when you make changes in your life you can still reap the benefits of bolstering your gut reinvigorating its digestive and immune capabilities and boosting your overall health     **Hakluytus Posthumus, Or, Purchas His Pilgrimes** Samuel Purchas, 1905     *Evolution of the Human Diet* Peter S. Ungar, 2007 We are interested in the evolution of hominin diets for several reasons One is the fundamental concern over our present day eating habits and the consequences of our societal choices such as obesity prevalent in some cultures and starvation in others Another is that humans have learned to feed themselves in extremely varied environments and these adaptations which are fundamentally different from those of our closest biological relatives have to have had historical roots of varying depth The third and the reason why most paleoanthropologists are interested in this question is that a species trophic level and feeding adaptations can have a strong effect on body size locomotion life history strategies geographic range habitat choice and social behavior Diet is key to understanding the ecology and evolution of our distant ancestors and their kin the early hominins A study of the range of foods eaten by our progenitors underscores just how unhealthy many of our diets are today This volume brings together authorities from disparate fields to offer new insights into the diets of our ancestors Paleontologists archaeologists primatologists nutritionists and other researchers all contribute pieces to the puzzle This volume has at its core four main sections Reconstructed diets based on hominin fossils tooth size shape structure wear and chemistry mandibular biomechanics Archaeological evidence of subsistence stone tools and modified bones Models of early hominin diets based on the diets of living primates both human and non human paleoecology and energetics Nutritional analyses and their implications for evolutionary medicine New techniques for gleaning information from fossil teeth bones and stone tools new theories stemming from studies of paleoecology and new models coming from analogy with modern humans and other primates all contribute to our understanding When these approaches are brought together they offer an impressive glimpse into the lives of our distant ancestors The contributions in this volume explore the frontiers of our knowledge in each of these disciplines as they address the knowns the unknowns and the unknowables of the evolution of hominin diets     **The Fish Gut Experiment** Ruth Starke, 2008 Jenna reads a weird book about using fish guts as a cure for old age She tries it on her parents first but she doesn't know that fish guts have a very strange effect on humans     *A New Dictionary of the English Language* Charles Richardson, 1867     **A View of the English Acquisitions in Guinea & the East Indies ... With a description of the Isle of St. Helena; and the Bay of Souldania ...** By R. B. i.e. Nathaniel Crouch R. B., 1700     **A New English Dictionary of the English Language**

Limits of Orientalism  
Seventeenth Century Representations of India challenges recent postcolonial readings of European and particularly English representations of India in the seventeenth century The book critiques Edward Said s discourse of Orientalism by destabilizing the notion of a homogeneous West the English interest was commercial unlike the colonially and religiously motivated Portuguese and therefore instead of representing Mughals as barbaric others the English travelers drew parallels between the Mughals and themselves in their writings associating with them as partners in trade and potential allies in war The Europeans praised Muslims civility and religious tolerance yet tended to be more conflicted with the Hindus but eventually their negative views underwent a transformation questioning the Orientalist notion of the homogeneous Indian By historicizing the European representations of India the book undercuts postcolonial analyses by critics such as Kate Teltscher Jyotsna Singh Nandini Bhattacharya Balachandra Rajan Gayatri Chakravorty Spivak Shankar Raman and others
