Approaches to Computer Writing Classrooms Linda Myers, 1993-08-31 This text provides a variety of practical and theoretical approaches to computer classroom design Pedagogical ethical and political issues are discussed as well as nuts and bolts construction adapting teaching styles to a CAI environment use of specific hardware and software and speculation regarding future electronic learning environments      Cscl Timothy Koschmann, 2012-10-12 This book about a newly emerging area of research in instructional technology has as its title the acronym CSCL Initially CSCL was chosen as an acronym for Computer Supported Collaborative Learning However some would argue that collaborative is often not a descriptive term for what learners do in instructional settings further as the field develops the technology used to support collaboration may not always involve computers at least not in the direct ways they have been used to support instruction in the past To avoid getting bogged down in this terminological debate this book uses CSCL as a designation in its own right leaving open to interpretation precisely what words it stands for The authors talk a great deal about the theory underlying their work In part this is because that is what they were asked to do but it is also an indication of the state of the field In an established paradigm in which the theories and methods are well agreed upon such discussion is less central CSCL however has not yet reached the stage of normal science There is much to be worked out yet This book is offered with the hope that it will help to define a direction for future work in this field The chapters appear in alphabetical order except for the introductory chapter and the afterword not for lack of a better way to organize the chapters but rather because the organizational possibilities are too numerous and this order does not privilege one over another By not imposing a topical organizing structure on this collection it is hoped that readers will feel freer to explore the chapters in a way that best suits their needs COPY FOR BIND CARD CD ROM info There is an accompanying CD Rom for this proceedings that will become available September 1998 Purchasers of the proceedings may obtain a copy of this CD ROM at no cost by contacting

**Resource** Stuart C. Brown, Theresa Jarnagi Enos, 2005-04-11 The role of the writing program administrator is one of diverse activities and challenges and preparation for the position has traditionally come through performing the job itself As a result uninitiated WPAs often find themselves struggling to manage the various requirements and demands of the position and even experienced WPAs often encounter situations on which they need advice The Writing Program Administrator's Resource has been developed to address the needs of all WPAs regardless of background or experience It provides practical applicable tools to effectively address the differing and sometimes competing roles in which WPAs find themselves Readers will find an invaluable collection of articles in this volume addressing fundamental practices and issues encountered by WPAs in their workplace settings and focusing on the hows and whys of writing program administration With formal preparation and training only now beginning to catch up to the very real needs of the WPA this volume offers guidance and support from authoritative and experienced sources educators who have established the definitions and standards of the position who have run into obstacles and surmounted them and who have not just survived but thrived in their roles as WPAs Editors Stuart C Brown and Theresa Enos contribute their own experience and bring together the voices of their colleagues to delineate the intellectual scope and practices of writing program administration as an emerging discipline Established and esteemed leaders in the field offer insights advice and plans of action for the myriad scenarios encountered in the position encouraging WPAs and helping them to realize that they often know more than they think they do This resource is required reading for the new WPA and an essential reference for all who serve in the WPA role As a guidebook for WPAs it is destined to become a fixture on the desk of every educator involved with or interested in administering writing programs writing centers and writing across the curriculum efforts      *The Routledge Handbook of Digital Writing and Rhetoric* Jonathan

**Handbook of Literacy and Technology** David Reinking, Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, 1998-04-01 The major shift going on today in the technologies of reading and writing raises important questions about conventional conceptions of literacy and its role in education society and culture What are the important characteristics of electronic forms of reading and writing distinguishing them from printed forms To what extent and in what ways is literacy being transformed by new technologies This central question is addressed in this volume from diverse multidisciplinary perspectives The contributing authors focus on a guiding question in one of the following areas which correspond to the major sections of the book Transforming Texts What are the new differences between printed and electronic texts and what are the implications of new textual forms for defining literacy especially in regard to teaching and learning in schools Transforming Readers and Writers How do electronic reading and writing change conceptualizations of literacy development from childhood through adulthood Transforming Classrooms and Schools What are the effects of introducing new reading and writing technologies into schools and classrooms Transforming Instruction How can instruction be adapted in response to the changing literacy landscape and how can teachers and students exploit forms of reading and writing to enhance teaching and learning Transforming Society What are the broad societal implications of the increasing prevalence of electronic forms of reading and writing Transforming Literacy Research What are the questions that must be addressed as digital reading and writing become more common and what approaches to research will be most useful in addressing those questions This volume is the result of an interactive process The contributors met as a group to discuss drafts of their chapters at a one day meeting convened and sponsored by the National Reading Research Center and had read each others chapters prior to this gathering That meeting was followed by a two day conference attended by approximately 180 researchers educators and policymakers who responded to an open invitation to present papers and to attend sessions focusing on the six major themes of the book Contributors then revised their chapters based on interactions with fellow contributors conference participants and volume editors Thus this work is more than just a compilation of the individual authors views Rather it represents a synthesis of a broad range of current thinking about how literacy is being and may be
