Conference proceedings. ICT for language learning Pixel,2015 **Abstract Mathematical Cognition** Wolfgang Grodd,Philippe Chassy,2016-08-09 Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts *How to Reach and Teach Children with Challenging Behavior (K-8)* Kaye Otten,Jodie Tuttle,2010-11-09 Interventions for students who exhibit challenging behavior Written by behavior specialists Kaye Otten and Jodie Tuttle who together have 40 years of experience working with students with challenging behavior in classroom settings this book offers educators a practical approach to managing problem behavior in schools It is filled with down to earth advice ready to use forms troubleshooting tips recommended resources and teacher tested strategies Using this book teachers are better able to intervene proactively efficiently and effectively with students exhibiting behavior problems The book includes research backed support for educators and offers Instructions for creating and implementing an effective class wide behavior management program Guidelines for developing engaging lessons and activities that teach and support positive behavior Advice for assisting students with the self regulation and management their behavior and emotions
