Designing Learning Environments for Developing Understanding of Geometry and Space Richard Lehrer, Daniel Chazan, 1998 This volume reflects an appreciation of the interactive roles of subject matter teacher student and technologies in designing classrooms that promote understanding of geometry and space Although these elements of geometry education are mutually constituted the book is organized to highlight first the editors vision of a general geometry education second the development of student thinking in everyday and classroom contexts and third the role of technologies Rather than looking to high school geometry as the locus and all too often the apex of geometric reasoning the contributors to this volume suggest that reasoning about space can and should be successfully integrated with other forms of mathematics starting at the elementary level and continuing through high school Reintegrating spatial reasoning into the mathematical mainstream indeed placing it at the core of K 12 mathematics environments that promote learning with understanding will mean increased attention to problems in modeling structure and design and reinvigoration of traditional topics such as measure dimension and form Further the editors position is that the teaching of geometry and spatial visualization in school should not be compressed into a characterization of Greek geometry but should include attention to contributions to the mathematics of space that developed subsequent to those of the Greeks This volume is essential reading for those involved in mathematics education at all levels including university faculty researchers and graduate students

Teaching the Content Areas to English Language Learners in Secondary Schools Luciana C. de Oliveira, Kathryn M. Obenchain, Rachael H. Kenney, Alandeom W. Oliveira, 2019-01-17 This practitioner based book provides different approaches for reaching an increasing population in today s schools English language learners ELLs The recent development and adoption of the Common Core State Standards for English Language Arts and Literacy in History Social Studies Science and Technical Subjects CCSS ELA Literacy the Common Core State Standards for Mathematics the C3 Framework and the Next Generation Science Standards NGSS highlight the role that teachers have in developing discipline specific competencies This requires new and innovative approaches for teaching the content areas to all students The book begins with an introduction that contextualizes the chapters in which the editors highlight transdisciplinary theories and approaches that cut across content areas In addition the editors include a table that provides a matrix of how strategies and theories map across the chapters The four sections of the book represent the following content areas English language arts mathematics science and social studies This book offers practical guidance that is grounded in relevant theory and research and offers teachers suggestions on how to use the approaches described

Exploring Science through Young Adult Literature Paula Greathouse, Melanie Hundley, Stephanie Wendt, 2023-03-20 Giving students opportunities to read like scientists has the potential to move their

thinking and understanding of scientific concepts in monumental ways Each chapter presented in this volume provides readers with approaches and activities for pairing a young adult novel with specific science concepts Chapters include instructional activities for before during and after reading as well as extension activities that move beyond the text Through the reading and study of the spotlighted young adult novels in this volume students are guided to a deeper understanding of science while increasing their literacy practices

Biomedical Index to PHS-supported Research ,1993 *On the Art and Craft of Doing Science* Kenneth Catania,2025-02-18 A scientist's personal reflections on how to harness creativity and curiosity to generate new ideas and discover the unexpected Like any creative endeavor science can be a messy and chaotic affair On the Art and Craft of Doing Science shares the creative process of an innovative and accomplished scientist taking readers behind the scenes of some of his most pioneering investigations and explaining why the practice of science far from being an orderly exercise in pure logic is a form of creative expression like any other art Kenneth Catania begins by discussing how ideas set the stage for scientific breakthroughs and goes on to describe ways to approach experimental design He sheds light on the importance of art in making discoveries and demonstrates how to find and tell a compelling story about a scientific result while accurately communicating its findings What role does failure play in science Is it possible to fail better How do you define success Catania provides insights to these and other questions along the way sharing the lessons he's learned from diverse figures ranging from science philosopher Thomas Kuhn to novelist Stephen King Blending illuminating historical examples with insights from Catania's own groundbreaking research in biology and neuroscience On the Art and Craft of Doing Science draws parallels with art and writing to reveal the creative side to the practice of good science
