Reading and Understanding Joseph H. Danks, Kathy Pezdek, 1980 This monograph the sixth in a series on the development of the reading process is concerned with the development of reading comprehension In the first chapter Comprehension in Listening and Reading Same or Different Joseph H Danks analyzes the evidence for the proposition that the comprehension processes for language in print and language in speech are the same and for the contrary proposition that there are significant differences in the understanding of the message in print and speech In the second chapter Arguments for a Constructive Approach to Comprehension and Memory Kathy Pezdek reviews pertinent research literature on comprehension from the constructive memory approach to the issue She makes a case for the proposition that the meaning of a sentence is not simply the sum of the separate meanings of the individual words and that sentence comprehension is in a very real sense the determiner of the words of the sentence She also reviews factors of constructive memory that influence reading comprehension MKM

Resources in Education, 1998 **Orthography, Phonology, Morphology and Meaning** R. Frost, Marian Katz, 1992-10-20 The area of research on printed word recognition has been one of the most active in the field of experimental psychology for well over a decade However notwithstanding the energetic research effort and despite the fact that there are many points of consensus major controversies still exist This volume is particularly

concerned with the putative relationship between language and reading It explores the ways by which orthography phonology morphology and meaning are interrelated in the reading process Included are theoretical discussions as well as reviews of experimental evidence by leading researchers in the area of experimental reading studies The book takes as its primary issue the question of the degree to which basic processes in reading reflect the structural characteristics of language such as phonology and morphology It discusses how those characteristics can shape a language s orthography and affect the process of reading from word recognition to comprehension Contributed by specialists the broad ranging mix of articles and papers not only gives a picture of current theory and data but a view of the directions in which this research area is vigorously moving *Learning To Read* Laurence Rieben, Charles A. Perfetti, 2013-12-16 How does a young child begin to make sense out of squiggles on a page Is learning to read a process of extending already acquired language abilities to print What comprises this extension How children learn to read and especially how children are taught to read are problems of sustained scientific interest and enduring pedagogical controversy This volume presents conceptual and theoretical analyses of learning to read research on the very beginning processes of learning to read as well as research on phonological abilities and on children who have problems learning to read In so doing it reflects the important discovery that learning to read requires mastering the system by which print encodes the language The editors hope that some of the work offered in this text will influence future research questions and will make a difference in the way instructional issues are formulated

Singer, 2024-02-09 In the past frustration with experimental reports had caused educators to dismiss the entire reading research enterprise Originally published in 1982 this book attempts to abstract those experimental results relevant to developing effective reading programs The book concentrates on the more mechanical aspects of reading skill such as visual discrimination ability visual and auditory memory visual to phonetic translation skills and attentional strategies These skills it is argued account for the major proportion of variance in reading ability The research on both competent and incompetent reading indicates the special importance of such skills to reading The book contains three sections Section I reviews the experimental evidence on competent reading The review highlights consistent threads of evidence and provides a description of the competent reader's strategies for analyzing text Section II reviews research on poor reading This section evaluates the concept of dyslexia and stresses that reading problems are not uniform Section III maintains that the information about competent reading strategies and the impediments to acquiring those strategies should guide educators in evaluating instructional materials and facilitate the diagnosis of reading failure Today it can be read in its historical context *Bookbird*, 1981 **PISA for Development Assessment and Analytical**
