Real Writing Walter H. Beale, 1986 **Real Writing** Walter H. Beale, Karen Meyers, Laurie L. White, 1982-01-01 **Learning from Language** Walter H. Beale, 2010-06-15 In *Learning from Language* Walter H Beale seeks to bring together the disciplines of linguistics rhetoric and literary studies through the concept of symmetry how words mirror thought society and our vision of the world Citing thinkers from antiquity to the present Beale provides an in depth study of linguistic theory development and practice He views the historic division between the schools of symmetry and asymmetry a belief that language developed as a structure independent of human experience as built into the character of language itself and as an impediment to literary humanism the combined study of language rhetoric and literature to improve the competence and character of the individual In his analysis Beale outlines and critiques traditional claims of symmetry then offers new avenues of approach to the subject In doing so he examines how important issues of human culture and consciousness have parallels in processes of language how linguistic patterns relate to pervasive human problems how language is an active participant in the expression performance and construction of reality the concepts of designating versus naming figurative language as a process of reenvisioning reality and the linking of style to virtue by the ancients Beale concludes that both asymmetrical and symmetrical elements exist in language each with their own relevance and that they are complementary rather than opposing philosophies The basic intuitions of symmetry that relate language to life are powerful and important to all of English studies Combined with a love for the workings sounds and structures of language Beale says an understanding of symmetry can help guide the pursuit of literary humanism
