Sharpes,2020-09-10 The preparation of suitably qualified teachers is vital for political social and economic growth in developing countries Some major problems have been caused by the enormous growth in primary enrolment and by the need to train more teachers without reducing standards exacerbated by the fact that in many cases the structure of teacher education is still in its formative stages However these problems can lead to innovative options and solutions Originally published in 1988 this book reports on research and practice in teacher education around the world It examines for example what happens to teacher education at times of great social change or political unrest as in South Africa or Cyprus how programmes in for example Nigeria or China approach minority education and how teachers are prepared for the teaching of indigenous populations such as the Saskatchewan Indians in Canada These examples of international teacher education practice are presented within a specific national regional and cultural context and provide important perspectives on the traditional views of how teachers are and should be prepared and professionally maintained The book will be of interest to all involved in teacher education adult education and curriculum design as well as to students of development studies **Resources in Education** ,2000 Changing Times In Teacher Education Marvin F. Wideen,Peter P. Grimmett,2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are

inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes
