Reality And Reason Dialectic And The Theory Of Knowledge:

Victorian Science and Victorian Values James G. Paradis, Thomas Postlewait, 1981 **Politics and the Criteria of Truth** A. Shomali, 2010-02-10 In the post positivist era in which Cartesian epistemology must be overcome we require a normative criterion of truth Without it rationality of our beliefs and justifiability of our political acts are in question This study seeks an epistemological criterion of truth that is attentive to the sociopolitical conditions that determine meaning **The Principle of Contradiction** Edward Conze, 2016-09-30 Conze's monograph *The Principle of Contradiction On the Theory of Dialectical Materialism* is his most important philosophical work and the foundation for his later publications as a Buddhist scholar and translator The openly Marxist work was published under considerable risk to both printer and author alike in December 1932 in Hamburg Germany Only months later in May 1933 almost all of the five hundred copies of the first edition were destroyed during the Nazi book burning campaign It is only now more than eighty years later that Conze's key philosophical work is made available to a broad audience in this English translation In the work Conze sets out to develop a detailed account of the historical and material conditions that support the emergence production and transmission of theoretical knowledge as exemplified by the principle of contradiction and furthermore to show that under different social and historical conditions the allegedly necessary truth and indubitable content of the principle would dissolve and be replaced by a radically different understanding of the principle of contradiction a dialectic understanding of the principle that would compel a rejection of the Aristotelian dogma From a Marxist perspective the analysis and critique of the principle of contradiction is a crucial and necessary step towards a dialectical understanding of philosophical and political theory and practice Conze's monograph which attempts to clear the ground for a deeper understanding of the very foundation of classical Marxist thought may very well be the most comprehensive Marxist critique of the Aristotelian principle of contradiction available to this day However Conze's pioneering 1932 monograph goes well beyond the constraints of an orthodox Marxist analysis His erudite and scholarly account of the history and evolution of the principle of contradiction illuminates the thought of Aristotle Marx and Buddha and provides the groundwork for a new cross cultural and interdisciplinary approach to philosophical theory and practice Marxist Phoenix Murray E.G. Smith, 2014-05-05 Looking to an increasingly perilous and inequitable future many progressive activists and scholars are seriously questioning the capacity of global capitalism to guarantee the conditions for human well being and sustainability in the 21st century This development inspires the central inquiry of *Marxist Phoenix* Will the intensifying contradictions and multiple crises of contemporary capitalism incite the emergence of a mass socialist workers movement committed not merely to the reform of capitalism but to its overthrow This collection of new and previously published essays articles and book chapters written over the last two decades makes the case for the indispensability of the Marxist socialist project to the emancipation of humanity from material insecurity and ever worsening social antagonism Only a global workers movement committed to the

fundamental tenets of Marxism a triumphant Marxist Phoenix rising from the ashes of the multiple defeats of the 20th century can open the road to real social progress Interdisciplinary rigorous and critically engaged with many currents in contemporary academic discourse this volume is a timely contribution to the rebirth of a Marxist socialism that is at once scientific emancipatory and internationalist in its commitments Reexamining Engels's Legacy in the 21st Century Kohei Saito,2021-02-02 While the deepening structural crisis of capitalism in the 21st century has led to a revival of interest in Marx all over the world Marx's life long comrade Frederick Engels has largely remained marginalized To commemorate the bicentenary of Engels birth this edited collection aims to rectify this gap in academic scholarship by gathering a diverse group of scholars to consider the legacy of Engels's thought and work and critically examine his theoretical relevance in today's world The contributors of this volume provide new stimulating reading of Engels's works to revive some of Engels's key ideas The Legacy of Engels in the 21st Century integrates the most recent discoveries and achievements of Marxian scholarship employing the historical critical method developed in the Marx Engels Gesamtausgabe to shed light on the forgotten aspects of Engels's critique of capitalism and vision of postcapitalism Dance of the Dialectic Bertell Ollman,2003 Bertell Ollman has been hailed as this country's leading authority on dialectics and Marx's method by Paul Sweezy the editor of Monthly Review and dean of America's Marx scholars In this book Ollman offers a thorough analysis of Marx's use of dialectical method Marx made extremely creative use of dialectical method to analyze the origins operation and direction of capitalism Unfortunately his promised book on method was never written so that readers wishing to understand and evaluate Marx's theories or to revise or use them have had to proceed without a clear grasp of the dialectic in which the theories are framed The result has been more disagreement over what Marx really meant than over the writings of any other major thinker In putting Marx's philosophy of internal relations and his use of the process of abstraction two little studied aspects of dialectics at the center of this account Ollman provides a version of Marx's method that is at once systematic scholarly clear and eminently useful Ollman not only sheds important new light on what Marx really meant in his varied theoretical pronouncements but in carefully laying out the steps in Marx's method makes it possible for a reader to put the dialectic to work in his or her own research He also convincingly argues the case for why social scientists and humanists as well as philosophers should want to do so **Marx After Marxism** Tom Rockmore,2008-04-30 Marx After Marxism encourages readers to understand Karl Marx in new ways unencumbered by political Marxist interpretations that have long dominated the discussions of both Marxists and non Marxists This volume gives a broad and accessible account of Marx's philosophy and emphasizes his relationship to Hegel German Idealism and the Problem of Knowledge: Nectarios G. Limnatis,2008-10-14 The problem of knowledge in German Idealism has drawn increasing attention This is the first attempt at a systematic critique that covers all four major figures Kant Fichte Schelling and Hegel The book offers a fresh and challenging analysis Anthropology and the Human Subject Brian Morris,2014-04-07 The German philosopher Immanuel

Kant famously defined anthropology as the study of what it means to be a human being. Following in his footsteps, *Anthropology and the Human Subject* provides a critical, comprehensive and wide-ranging investigation of conceptions of the human subject within the Western intellectual tradition, focusing specifically on the secular trends of the twentieth century. Encyclopaedic in scope, lucidly and engagingly written, the book covers the manifold currents of thought within this tradition. Each chapter deals with a specific intellectual paradigm, ranging from Marx's historical materialism and Darwin's evolutionary naturalism, and their various offshoots, through to those currents of thought that were prominent in the late twentieth century, such as, for example, existentialism, hermeneutics, phenomenology and poststructuralism. With respect to each current of thought, a focus is placed on their main exemplars, outlining their biographical context, their mode of social analysis and the ontology of the subject that emerges from their key texts. The book will appeal not only to anthropologists, but to students and scholars within the human sciences and philosophy, as well as to any person interested in the question: What does it mean to be human? Ambitious in scope and encyclopaedic in execution, his style is always lucid. He makes difficult work accessible. His prose conveys the unmistakable impression of a superb and meticulous lecturer at work. Anthony P. Cohen, *Journal of the Royal Anthropological Institute*. There is a very little I can add to the outstanding criticism. Brian Morris, *Levels at Deep Ecology*. Insightful as well as incisive. I have found his writings an educational experience. Murray Bookchin, *Institute of Social Ecology*. **Encyclopedia of Case Study Research** Albert J. Mills, Gabrielle Durepos, Elden Wiebe, 2010. This is the authoritative reference work in the field. An interdisciplinary set, it investigates the extensive history, design and methods of case study research.
