Reasoning With Complex Cases:

Reasoning with Complex Cases Friedrich Gebhardt, Angi Voß, Wolfgang Gräther, Barbara Schmidt-Belz, 2012-12-06 Reasoning with Complex Cases emphasizes case retrieval methods based on structured cases as they are relevant for planning configuration and design and provides a systematic view of the case reuse phase centering on complex situations So far books on case based reasoning considered comparatively simple situations only This book is a coherent work not a selection of separate contributions and consists largely of original research results using examples taken from industrial design biology medicine jurisprudence and other areas Reasoning with Complex Cases is suitable as a secondary text for graduate level courses on case based reasoning and as a reference for practitioners applying conventional CBR systems or techniques

Foundations of Soft Case-Based Reasoning Sankar K. Pal, Simon C. K. Shiu, 2004-06-17 Provides a self contained description of this important aspect of information processing and decision support technology Presents basic definitions principles applications and a detailed bibliography Covers a range of real world examples including control data mining and pattern recognition

Forensic DNA Trace Evidence Interpretation Duncan Taylor, Bas Kokshoorn, 2023-05-30 Forensic DNA Trace Evidence Interpretation Activity Level Propositions and Likelihood Ratios provides all foundational information required for a reader to understand the practice of evaluating forensic biology evidence given activity level propositions and to implement the practice into active casework within a forensic institution The book begins by explaining basic concepts and foundational theory pulling together research and studies that have accumulated in forensic journal literature over the last 20 years The book explains the laws of probability showing how they can be used to derive from first principles the likelihood ratio used throughout the book to express the strength of evidence for any evaluation Concepts such as the hierarchy of propositions the difference between experts working in an investigative or evaluative mode and the practice of case assessment and interpretation are explained to provide the reader with a broad grounding in the topics that are important to understanding evaluation of evidence

Activity level evaluations are discussed in relation to biological material transferred from one object to another the ability for biological material to persist on an item for a period of time or through an event the ability to recover the biological material from the object when sampled for forensic testing and the expectations of the prevalence of biological material on objects in our environment These concepts of transfer persistence prevalence and recovery are discussed in detail in addition to the factors that affect each of them The authors go on to explain the evaluation process how to structure case information and formulate propositions This includes how a likelihood ratio formula can be derived to evaluate the forensic findings introducing Bayesian networks and explaining what they represent and how they can be used in evaluations and showing how evaluation can be tested for robustness Using these tools the authors also demonstrate the ways that the methods used in activity level evaluations are applied to questions about body fluids There are also chapters dedicated to reporting of results and implementation of activity level evaluation in a working forensic laboratory Throughout the book four cases are used as examples to demonstrate how to relate the theory to practice and detail how laboratories can integrate and implement activity level evaluation into their active casework

Getting Our Act Together Anne

Schwenkenbecher, 2020-12-30 Winner of the 2022 North American Society for Social Philosophy Book Award Together we can often achieve things that are impossible to do on our own We can prevent something bad from happening or we can produce something good even if none of us could do it by ourselves But when are we morally required to do something of moral importance together with others This book develops an original theory of collective moral obligations These are obligations that individual moral agents hold jointly but not as unified collective agents The theory does not stipulate a new type of moral obligation but rather suggests that to think of some of our obligations as joint or collective is the best way of making sense of our intuitions regarding collective moral action problems Where we have reason to believe that our efforts are most efficient as part of a collective endeavor we may incur collective obligations together with others who are similarly placed as long as we are able to establish compossible individual contributory strategies towards that goal The book concludes with a discussion of massively shared obligations to major scale moral problems such as global poverty *Getting Out Act Together A Theory of Collective Moral Obligations* will appeal to researchers and advanced students working in moral political and social philosophy philosophy of action social epistemology and philosophy of social science *ECIAIR 2019*

European Conference on the Impact of Artificial Intelligence and Robotics Dr Paul Griffiths ,Dr. Mitt Nowshade Kabir ,2019-10-31 **The Evolution of Strategic Foresight** Tuomo Kuosa, 2016-03-16 Embracing the theory and practice of strategic foresight and illuminating how different schools of thought regard its role in policy making Tuomo Kuosa describes how something not traditionally considered an independent discipline is steadily becoming one In *The Evolution of Strategic Foresight* he explains how the practice of strategic foresight has long been closely associated with the military and politics Linking strategic thinking more broadly to futurology however it is quite new Since strategic foresight refers to the practice

of generating analyses of alternative futures and strategies based on available intelligence and foreknowledge the practice can and should be applied to companies business sectors national and trans national agencies of all descriptions and to all aspects of public policy making The author explains its practice in terms of structure process and knowledge domains and examines its methodologies and systems along with how strategic foresight can be used to produce better knowledge and be more effectively linked to policy making Using examples from 30 different countries and with access to interviews and workshops involving key experts The Evolution of Strategic Foresight will be valuable to scholars educators students engaged in strategy and future studies long range public policy and urban planners analysts risk assessment experts and consultants managers and decision makers in many organisations public and private Logic-Based Artificial Intelligence Jack Minker,2012-12-06 The use of mathematical logic as a formalism for artificial intelligence was recognized by John McCarthy in 1959 in his paper on Programs with Common Sense In a series of papers in the 1960 s he expanded upon these ideas and continues to do so to this date It is now 41 years since the idea of using a formal mechanism for AI arose It is therefore appropriate to consider some of the research applications and implementations that have resulted from this idea In early 1995 John McCarthy suggested to me that we have a workshop on Logic Based Artificial Intelligence LBAI In June 1999 the Workshop on Logic Based Artificial Intelligence was held as a consequence of McCarthy s suggestion The workshop came about with the support of Ephraim Glinert of the National Science Foundation IIS 9S2013S the American Association for Artificial Intelligence who provided support for graduate students to attend and Joseph JaJa Director of the University of Maryland Institute for Advanced Computer Studies who provided both manpower and financial support and the Department of Computer Science We are grateful for their support This book consists of refereed papers based on presentations made at the Workshop Not all of the Workshop participants were able to contribute papers for the book The common theme of papers at the workshop and in this book is the use of logic as a formalism to solve problems in AI Workshop on language, cognition and computation: lectures: Sala Prat de la Riba. Institut d'Estudis Catalans ,1993 **Infusing Ethics into the Development of Engineers** National Academy of Engineering,Center for Engineering Ethics and Society,Infusing Ethics Selection Committee,2016-02-17 Ethical practice in engineering is critical for ensuring public trust in the field and in its practitioners especially as engineers increasingly tackle international and socially complex problems that combine technical and ethical challenges This report aims to raise awareness of the variety of exceptional programs and strategies for improving engineers understanding of ethical and social issues and provides a resource for those who seek to improve ethical development of engineers at their own institutions This publication presents 25 activities and programs that are exemplary in their approach to infusing ethics into the development of engineering students It is intended to serve as a resource for institutions of higher education seeking to enhance their efforts in this area **A Practical Guide for Nurse Practitioner Faculty Using Simulation in Competency-Based Education** Pamela R. by expert simulation researchers educators nurse practitioner faculty and clinicians *A Practical Guide for Nurse Practitioner Faculty Using Simulation in Competency Based Education* looks at topics related to simulation design development and implementation for nurse practitioner and other graduate level nursing programs *Civil Judgments at First Instance* Zhixun Cao, 2025-02-19 This book provides an in depth discussion and introduction to Chinese civil procedure from both a theoretical and practical perspectives as well as a comparative study of its relevant systems with those of the West The subject matter of this book is Chinese civil judgments Judgments as the final judicial product which affects the legal relationship between both parties or even multiple parties provide a desirable objects to observe and evaluate the service of judicial proceedings and the protection of the parties procedural rights And since judgments are in most cases regarded as the default termination of any civil litigation there is no need to argue for a comparative study on this topic which has already inspired Chinese doctrines and newest reforms One of the aims of such research is to modernize Chinese civil justice considering the experience of leading legal counterparts Next to the theoretical analysis this book introduces empirical data in China to the English literature which could provide a vivid illustration for legal researchers to be better informed about the Chinese legal system and its real version of rule of law In other words this book likes to describe the real judicial practice in China and summarize how Chinese lawyers understand and facilitate the production of civil judgments Moreover this book intends to focus on the adjudicative techniques in the civil litigation which should constitute the mutual basis of most civil justice Even there is no well developed theory under the name of Adjudicate Techniques in some jurisdictions it is not uncommon to discover some principles methods institutions and practical operation which is functionally and substantially comparable to the ones in other civil justice systems **11th Annual Conference Cognitive Science Society Pod** Cognitive Science Society, 2014-01-02 First published in 1989 This Program discusses The Eleventh Annual Conference of the Cognitive Science Society August 1989 in Ann Arbor Michigan The book begins with 66 paper presentations and concludes with 59 poster presentations across over 1000 pages This program also includes a comprehensive author listing with affiliations and titles **IJCAI-97** International Joint Conferences on Artificial Intelligence, 1997 **Creative Model Construction in Scientists and Students** John Clement, 2008-06-10 How do scientists use analogies and other processes to break away from old theories and generate new ones This book documents such methods through the analysis of video tapes of scientifically trained experts thinking aloud while working on unfamiliar problems Some aspects of creative scientific thinking are difficult to explain such as the power of analogies the use of physical intuition and the enigmatic ability to learn from thought experiments The book examines the hypothesis that these processes are based on imagistic mental simulation as an underlying mechanism This allows the analysis of insight Aha episodes of creative theory formation Advanced processes examined include specialized conserving transformations Gedanken experiments and adjusted levels of divergence in thinking Student interviews are used to show that students have natural abilities for many of these basic reasoning and

model construction processes and that this has important implications for expanding instructional theories of conceptual change and inquiry I regard this work as the most comprehensive account ever attempted to show how imagistic analogic and sensory motor representations participate in creative thinking Professor Ryan Tweney **Knowledge and Its Limits** Timothy Williamson, 2002 Knowledge and its Limits presents a systematic new conception of knowledge as a fundamental kind of mental state sensitive to the knower's environment It makes a major contribution to the debate between externalist and internalist philosophies of mind and breaks radically with the epistemological tradition of analysing knowledge in terms of true belief The theory casts light on a wide variety of philosophical issues the problem of scepticism the nature of evidence probability and assertion the dispute between realism and anti realism and the paradox of the surprise examination Williamson relates the new conception to structural limits on knowledge which imply that what can be known never exhausts what is true The arguments are illustrated by rigorous models based on epistemic logic and probability theory The result is a new way of doing epistemology for the twenty first century **Discovery Science** Setsuo Arikawa, Koichi Furukawa, 2003-07-31 This book constitutes the refereed proceedings of the Second International Conference on Discovery Science DS 99 held in Tokyo Japan in December 1999 The 26 revised full papers presented together with 2 invited contributions and 25 poster presentations were carefully reviewed and selected from a total of 74 submissions The following topics are covered in their relation to discovery science logic inference algorithmic learning heuristic search database management data mining networking inductive logic programming abductive reasoning machine learning constructive programming intelligent agents statistical methods visualization HCI etc Journal of the Chemical Society Chemical Society (Great Britain), 1885 Titles of chemical papers in British and foreign journals included in Quarterly journal v 1 12
