The British Carrier Strike Fleet after 1945 David Hobbs, 2015-10-30 A comprehensive study of the bittersweet post WWII history of British naval aviation will become a standard reference for its subject Firetrench In 1945 the most powerful fleet in the Royal Navy s history was centered on nine aircraft carriers This book charts the post war fortunes of this potent strike force its decline in the face of diminishing resources its final fall at the hands of uncomprehending politicians and its recent resurrection in the form of the Queen Elizabeth class carriers the largest ships ever built for the Royal Navy After 1945 experts prophesied that nuclear weapons would make conventional

forces obsolete but British carrier borne aircraft were almost continuously employed in numerous conflicts as far apart as Korea Egypt the Persian Gulf the South Atlantic East Africa and the Far East often giving successive British Governments options when no others were available In the process the Royal Navy invented many of the techniques and devices crucial to modern carrier operations angled decks steam catapults and deck landing aids while also pioneering novel forms of warfare like helicopter borne assault and tactics for countering such modern plagues as insurgency and terrorism This book combines narratives of these poorly understood operations with a clear analysis of the strategic and political background benefiting from the author s personal experience of both carrier flying and the workings of Whitehall It is an important but largely untold story of renewed significance as Britain once again embraces carrier aviation Makes a timely and welcome appearance will make compelling reading for those with serious concern for our naval affairs St Andrews in Focus

Britain's Glory William Sutherland,1729 **British Submarines in the Cold War Era** Norman Friedman,2020-09-30

The first comprehensive technical history on the subject with photos A must read for all professionals designers and scholars of modern submarines Australian Naval Institute The Royal Navy s greatest contribution to the Allied success in World War II was undoubtedly the defeat of the U boat menace in the North Atlantic a victory on which all other European campaigns depended The underwater threat was the most serious naval challenge of the war so it was not surprising that captured German submarine technology became the focus of attention for the British submarine service after 1945 It was quick to test and adopt the schnorkel streamlining homing torpedoes and less successfully hydrogen peroxide propulsion Furthermore in the course of the long Atlantic battle the Royal Navy had become the world s most effective anti submarine force and was able to utilize this expertise to improve the efficiency of its own submarines However in 1945 German submarine technology had also fallen into the hands of the Soviet Union and as the Cold War developed it became clear that a growing Russian submarine fleet would pose a new threat Britain had to go to the US for its first nuclear propulsion technology but the Royal Navy introduced the silencing technique that made British and US nuclear submarines viable anti submarine assets and it pioneered in the use of passive silent sonars in that role Nuclear power also changed the role of some British submarines which replaced bombers as the core element of British Cold War and post Cold War nuclear deterrence As in other books in this series this one shows how a combination of evolving strategic and tactical requirements and new technology produced successive types of submarines It is based largely on unpublished and previously classified official documentation and to the extent allowed by security restrictions also tells the operational story HMS Conqueror is still the only nuclear submarine to have sunk a warship in combat but there are many lesser known aspects of British submarine operations in the postwar era

Britain's Historic Ships Paul Brown,2016-10-06 The British Isles have a long rich and celebrated seafaring history stretching from the earliest times through the victories of Drake and Nelson the voyages of discovery of Cabot and Cook and the defence of the realm by vessels of all types in the present century Much of this history is recorded in literature and in

museums but reaches its most tangible form in the large number of historical ships that have been preserved and are continually restored as monuments to a proud past This lavish book explores 20 of the most celebrated and accessible ships and offers a comprehensive history of each vessel s design construction active service and subsequent restoration and preservation Presented in order of each ship s launch date each entry is written by the acknowledged expert on a particular vessel gives full specification details and is sumptuously illustrated with contemporary photographs historical illustrations and a full set of scale plans In addition to the featured entries an appendix presents all of the necessary contact details and opening times where applicable The appendix also lists and provides details for other vessels of historical importance including a small number of working replicas such as the Matthew and the recently commissioned eighteenth century frigate The Grand Turk featured in the recent Hornblower television series Principal vessels include Mary Rose HMS Victory HMS Trincomalee SS Great Britain Cutty Sark RRS Discovery HMS Warrior HMS Belfast HMY Britannia HMS Alliance HMS Cavalier Gypsy Moth IV and HMS Plymouth

From Versailles to Mers el-Kébir George E Melton, 2015-10-15 The two decades before World War II were some of the most unsettled in modern history From Versailles to Mers el K bir examines one of the most unlikely and perhaps least studied relationships to form during that turbulent era the alliance of the Royal Navy and the French fleet Beginning from a global perspective and gradually narrowing George E Melton brings new insights to the diplomacy that led to this often strained cooperation and reinterprets some of the most important events of early World War II By the mid 1930s the Royal Navy and French fleet had overextended themselves with global defense commitments owing mainly to the collapse of the world war alliances and to an ominous shift in the balance of world naval power To maximize their power England and France combined their assets in a naval alliance Successful in keeping both Italy and Japan neutral early in the war that alliance brought the French and English success against German surface raiders and U boat operations in the Atlantic The two powers were on such good terms that in 1939 during a joint operation to the north of Scotland HMS Hood and its escorts served for a week under the command of Vice Admiral Marcel Gensoul French commander of the Dunkerque Afterward the British seamen affectionately referred to the Dunkerque as the friend of the Hood Still the union was not an altogether happy one The global defense imperatives of the Admiralty frustrated the regional ambitions of the Rue Royale The union ultimately came to a violent end when the British attacked the French squadron at Mers el K bir in the summer of 1940 after France had signed an armistice with Germany What followed was a poorly constructed cover up to mask the operation as a regrettable but necessary action Melton s study challenges this popular myth Thoroughly researched and documented From Versailles to Mers el K bir concludes that the operation was a disastrous failure
