Stevens, 2013-11-11 The idea for compiling a book on coccidioidomycosis first began to take shape in my mind in 1976 at an annual meeting of the Coccidioidomycosis Study Group see Chapter 23 in Palo Alto In my discussions with the chairman Demosthenes Pappagianis we agreed that considerable data had accumulated in the almost 20 years since the publication of Marshall Fiese's landmark book Coccidioidomycosis Charles C Thomas Springfield Ill 1958 Pappagianis encouraged me to consider writing a new book Also about this time my Stanford colleague Tom Merigan was collaborating in assembling a series of texts on infectious diseases and he added his encouragement to that of Pappagianis I planned to enlist the collaboration of my

colleagues for the multiauthored work I had conceived to encompass the various facets of coccidioidomycosis The more I worked the more I appreciated the effort that had gone into the Fiese book I hope the final product is a useful readable and comprehensive text and reference source for this disease and a worthy successor to the Fiese book This volume places greater emphasis on the basic science background of present clinical experience and attempts to examine critically the data base and how it fits with recommendations made in the clinical literature In some of the contributed chapters I made virtually no changes in others I battered them to fit my preconceptions

TOP 200 TALLARIDA,2013-11-11 **Topics in**

Topicals R. Marks,2012-12-06 Substances that are applied to the skin to heal it make it feel better or improve its appearance have much in common They can all do damage to the skin as well as perform the task for which they were designed They and the substances they contain are all absorbed through the skin to a greater or lesser extent In addition all these agents are constructed in the same general way For these reasons it seems odd and uneconomical to consider topical pharmaceuticals toiletry products and cosmetics separately This was the reasoning behind the holding of a small symposium of workers involved with one or another aspect of the formulation of substances destined for application to the skin Several aspects of the subject are covered in this book which is based on the symposium and the contents should be of interest to all who are concerned with the prescription assessment or formulation of topical agents

9 1 Acne Caused and Treated by Topical Agents W J CUNLIFFE The four main aetiological factors involved in the development of l acne are 1 an elevated sebum excretion rate 2 ductal hyper 3 keratinization 2 3 an abnormality of microbial function 4 host 4 inflammatory response Although opinions differ on both sides of the Atlantic most authorities in the United Kingdom believe that increased sebum excretion rate is the main drive to acne there being a definitive relationship between the severity of the acne and the seborrhoea of this disease

Rook's Textbook of Dermatology Tony Burns,Stephen M. Breathnach,Neil Cox,Christopher Griffiths,2008-04-15 The late Arthur Rook established the Textbook of Dermatologyas the most comprehensive work of reference available to the dermatologist and it enjoys instant name recognition Each subsequent edition has been expanded as the subject has developed and the book remains the ultimate source of clinical information for the trainee and practising dermatologist alike Rook's Textbook of Dermatology covers all aspects of skin disease from basic science through pathology and epidemiology to clinical practice Long recognized for its unparalleled coverage of diagnosis this clinical classic earned its reputation as a definitive source of information New features of this Seventh Edition include Two new Editors Neil Cox and Christopher Griffiths join the team Every chapter is updated and several are completely rewritten from scratch Completely new chapter on AIDS and the Skin Traditional emphasis on diagnosis preserved More coverage of treatment in each of the disease specific chapters

Skin Pharmacology and Toxicology Corrado L. Galli,Christopher N. Hensby,Marina Marinovich,2012-12-06 Major skin diseases including acne psoriasis and eczema affect the majority of the population at some time in their lives In general these diseases are physically and psychologically disfiguring for the sufferers furthermore by

their very chronic nature skin diseases unlike most other disease processes present both acute and chronic therapy problems In addition the chronic nature of these diseases can present certain economic problems Firstly chronic therapy is becoming increasingly expensive and secondly patients adhering to a strict treatment regimen will frequently be absent from their gainful employment for either medical consultation or treatment Given that in all NATO countries the average age of the population is continually increasing these chronic skin diseases will increase in importance in the coming years Furthermore as the average population age increases additional disease processes such as skin photodamage and carcinogenicity risk becoming major areas of therapeutic concern This book reviews in detail the major scientific areas of interest for research and clinical scientists working in skin pharmacology and toxicology The basic principles relating to an understanding of how drugs and chemicals may influence either the skin or the body as a whole are discussed in detail by recognized international scientific experts

Immunology of the Fungal Diseases Rebecca A. Cox, 2020-07-24 This informative text is divided into eight chapters each of which presents a comprehensive review of natural and acquired host defense mechanisms in a major mycotic disease The chapters are written by distinguished scientists whose studies have contributed significantly to the understanding of the immunology of the mycoses This text should provide a valuable reference for researchers practicing clinicians and new investigators entering this expanding field
