Religion And Science In The Context Of Chinese Culture:

Religion and Science in the Context of Chinese Culture Deguang Chen, Yi-Jia Tsai, Frank Budenholzer, 2006 Religion and science in the context of Chinese culture A Theology of Engagement Science Theology S *Chinese Culture, Western Culture* Tai Ng, 2007-02 This book explores how complementary Chinese and Western cultures are how they should learn from each other to establish a dynamic balance and how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization *Darwin and Catholicism* Louis Caruana, 2009-10-06 An exploration of the interaction between Darwinian ideas and Catholic doctrine *Confucianism as Religion* Yong Chen, 2012-11-08 On the Rhetoric of Defining Confucianism as a Religion tackles the perennially controversial question of whether Confucianism is a religion and proposes a holistic and contextual approach to the issue *The scientific dialogue linking America, Asia and Europe between the 12th and the 20th Century*. Fabio D'Angelo, 2018-06-11 The first volume of Viaggiatori Curatele series seeks to recreate some scientific dialogues namely meetings exchanges and acquisition of theoretical and practical scientific knowledge thus linking the cultural historical and geographical context of America Asia Europe and Mediterranean Sea between the 16th and the 20th century More specifically the main objective is to consider the role of travellers as passeurs as intermediaries for building and allowing the circulation of knowhow and the practical and theoretical knowledge from one continent to another

societies today by underscoring transformations in eight key areas Market and Branding Contemporary Ethics and Virtues Intimate Identities Transnational Movements Diasporic Communities Responses to Diversity National Tensions and Reflections on Religion These themes demonstrate the handbook's new topics and approaches that move beyond existing agendas Bringing together scholars of all ages and stages of career from around the world the handbook showcases the dynamism of religion in global societies It is an accessible introduction to new ways of approaching the study of religion practically theoretically and geographically

Evolutionary Theories and Religious Traditions Bernard Lightman, Sarah Qidwai, 2023-11-21 Before the advent of radio conceptions of the relationship between science and religion circulated through periodicals journals and books influencing the worldviews of intellectuals and a wider public In this volume historians of science and religion examine that relationship through diverse mediums geographic contexts and religious traditions Spanning within and beyond Europe and North America chapters emphasize underexamined regions New Zealand Australia India Argentina Sri Lanka Egypt and the Ottoman Empire and major religions of the world including Christianity Hinduism Buddhism Confucianism and Islam interactions between those traditions as well as atheism monism and agnosticism As they focus on evolution and human origins contributors draw attention to European scientists other than Darwin who played a significant role in the dissemination of evolutionary ideas for some those ideas provided the key to understanding every aspect of human culture including religion They also highlight central figures in national contexts many of whom were not scientists who appropriated scientific theories for their own purposes Taking a local national transnational and global approach to the study of science and religion this volume begins to capture the complexity of cultural engagement with evolution and religion in the long nineteenth century

Christianity and Chinese Culture Mikka Ruokanen, Paulos Huang, Baoluo Huang, 2010-11-23 The rapidly growing Chinese Protestant Church faces a significant challenge it must adapt itself to the unique dimensions of Chinese culture leaving behind the trail of old missionary theology and molding an authentically Chinese approach to biblical interpretation and Christian life an approach that works within both the traditional and the contemporary dimensions of Chinese society Rising from an extraordinary 2003 Sino Nordic conference on Chinese contextual theology which brought Chinese university scholars and church theologians together for the first time Christianity and Chinese Culture addresses ways in which the church in China is responding to that challenge The essays collected here highlight both the stunning complexities confronting Protestant Christianity in China and its remarkable potential This is a most timely publication on the current issues and research on Christianity and Chinese culture in the PRC previously unavailable in English The list of scholars in the collection reads like a Who's Who in Christian studies in China including both secular academics and Christian theologians The final part on theological reconstruction is of particular interest given its importance for the Protestant churches in the last decade This book should be on the shelf of any scholar interested in the
