## **Religion Business And Wealth In Modern Britain:**

**Religion, Business and Wealth in Modern Britain** David Jeremy, 2006-08-21 The relationship of economics capitalism and wealth to the ethics and morality of religion has intrigued and challenged policymakers pressure groups theologians sociologists economists and historians for centuries Here David Jeremy addresses these questions in the context of modern Britain His preliminary survey of historical controversies within religion and business and the accompanying chronology of significant events since the 1770s are an extremely useful introduction for those unfamiliar with the field

Entrepreneurship and Religion Léo-Paul Dana, 2010-01-01 I wish this book had been around when I tried to teach about entrepreneurship in its social context life would have been much easier with these informed sources Alistair R Anderson Aberdeen Business School UK This rich and detailed book makes a very timely contribution to extending our understanding of entrepreneurship in its social context Using selected examples the respected contributors show how the values developed in religious beliefs and practices shape entrepreneurship For too long the entrepreneur has been characterized as an isolated economically driven individual thus ignoring how enterprise and entrepreneurs are products of their society their culture and their religion This innovative book discusses both entrepreneurship and religion as well as indicating how the synthesis of beliefs and practices combine in entrepreneurial endeavours It provides a conceptually useful way of framing the individualistic entrepreneur in his or her social and cultural context demonstrating how entrepreneurial agency operates within and through a variety of religious contexts Illustrated with original photographs this captivating book will be warmly welcomed by students and researchers with interests in entrepreneurship sociology religion and cultural studies Government policy makers in immigration will also find this book an invaluable read

**Entrepreneurs and Capitalism since Luther** Ivan Light, Léo-Paul Dana, 2020-08-20 In *Entrepreneurs and Capitalism since Luther Rediscovering the Moral Economy* Ivan Light and L o Paul Dana study the history of business capitalism and entrepreneurship to examine the values of social and cultural capital Six chapters evaluate case studies that illustrate contrasting relationships between social networks vocational culture and entrepreneurship Light and Dana argue that in capitalism s early stages cultural capital is scarcer than social capital and therefore more crucial for business owners Conversely when capitalism is well established social capital is scarcer than cultural capital and becomes more crucial Light and Dana then trace moral legitimations of capitalism from the Reformation to the Enlightenment the Gilded Age and finally to Joseph Schumpeter whose concept of creative destruction freed elite entrepreneurs from moral restraints that encumber small business owners After examining the availability of social and cultural capital in the contemporary United States Light and Dana show that business owners social capital enforces conventional morality in markets facilitating commerce and legitimating small businesses the old fashioned way As their networks become more isolated elite entrepreneurs must claim and ultimately deliver successful results to earn public toleration of immoral or predatory conduct

*The Evangelical Age of Ingenuity in Industrial Britain* Joseph

Stubenrauch,2016-07-28 *The Evangelical Age of Ingenuity in Industrial Britain* argues that British evangelicals in the late eighteenth and early nineteenth centuries invented new methods of spreading the gospel as well as new forms of personal religious practice by exploiting the era's growth of urbanization industrialization consumer goods technological discoveries and increasingly mobile populations While evangelical faith has often been portrayed standing in inherent tension with the transitions of modernity Joseph Stubenrauch demonstrates that developments in technology commerce and infrastructure were fruitfully linked with theological shifts and changing modes of religious life This volume analyzes a vibrant array of religious consumer and material culture produced during the first half of the nineteenth century Mass print and cheap mass produced goods from tracts and ballad sheets to teapots and needlework mottoes were harnessed to the evangelical project By examining ephemera and decorations alongside the strategies of evangelical publishers and benevolent societies Stubenrauch considers often overlooked sources in order to take the pulse of vital religion during an age of upheaval He explores why and how evangelicals turned to the radical alterations of their era to bolster their faith and why serious Christianity flowered in an industrial age that has usually been deemed inhospitable to it **Friends, Neighbours, Sinners**

Carys Brown,2022-08-04 *Friends Neighbours Sinners* demonstrates the fundamental ways in which religious difference shaped English society in the first half of the eighteenth century By examining the social subtleties of interactions between people of differing beliefs and how they were mediated through languages and behaviours common to the long eighteenth century Carys Brown examines the graduated layers of religious exclusivity that influenced everyday existence By doing so the book points towards a new approach to the social and cultural history of the eighteenth century one that acknowledges the integral role of the dynamics of religious difference in key aspects of eighteenth century life This book therefore proposes not just to add to current understanding of religious coexistence in this period but to shift our ways of thinking about the construction of social discourses parish politics and cultural spaces in eighteenth century England *Faith of Our Fathers*

Richard C. Allen,Joan Allen,2009-03-26 The study of popular culture has been an abiding preoccupation of historians and other academics not just in the British Isles but elsewhere too This volume of essays explores the manifestations of popular culture and belief in England Ireland and Wales from the Reformation onwards As an interdisciplinary collection it brings together specialists in English Literature History Celtic and Religious Studies It offers new insights thematically via a selection of diverse contributions The nexus between religion and popular culture links the contributions together while the geographical spread of the topic facilitates a dynamic comparative methodology What emerges from these explorations of rites of passage festivals revivalism print culture and gender is the remarkable resilience of popular culture and the extent to which all levels of society were prepared to compromise *The Origins of Globalization* Karl Moore,David Charles Lewis,2009-06-02 *The Origins of Globalization* presents a startling look at the shape of known world globalization dating back to the Roman Empire and earlier including multicultural workforces tariff reduced zones interregional tax issues currency

risks and other phenomena      **Ecumenism and History** Anthony R. Cross, 2007-09-01 This collection of essays revolves around the two fields in which Professor John Briggs has contributed so much history particularly Baptist and Nonconformist and the ecumenical movement and many examine the interrelationship between them With contributions from colleagues and former research students from Britain Europe and North America *Ecumenism and History* provides wide ranging studies in important aspects of Christian history theology and ecumenical studies      *British Philanthropy in the Globalizing World* Roshan Allpress, 2024-02-16 Between 1756 and 1840 philanthropy in the British world grew from the domain of small associational committees to a vast enterprise of philanthropic and humanitarian societies with global reach *British Philanthropy in the Globalizing World* tells the story of this movement from its inception in small networks of mercantile and religious entrepreneurs to its signal projects and achievements in the abolition of slavery in evangelical missionary societies Bible societies and in the early indigenous rights movement It traces the lives and networks of hundreds of philanthropists across four generations showing how their social religious economic intellectual and cultural worlds intersected to foster philanthropic innovation through organisational models transnational networks and the creation of a unique formative culture It shows how groups such as the Clapham Sect including William Wilberforce Henry Thornton Hannah More James Stephen and others emerged in an intergenerational context and how they sought to effect social and cultural change across multiple spheres For every headline achievement there were many failed experiments inner wrestlings and long running intellectual collaborations that left a wide and deep imprint on the cultural and political landscape of the English speaking world Drawing on the separate historiographies of metropolitan philanthropy associational culture anti slavery moral reform Evangelicalism colonial missions and economic thought the study unites into one analytical frame both the imaginative and organizational realities of philanthropy offering a dual focus on individual philanthropists their inner lives daily practices and participation in collaborative communities and on mapping the networks that bound philanthropic societies and projects together in metropolitan London and at the far reaches of the British world In doing so it offers a very human portrait of these entrepreneurs and evangelicals as they pursued a philanthropic global vision      *Handbook of Strategy and Management* Andrew M Pettigrew, Howard Thomas, Richard Whittington, 2006-04-27 New in Paperback Publishing February 2006 If you had to read only one book to understand the roots and branches of the study of strategy it is also remarkably well organized and future oriented having the right balance between focus and diversity By critically taking stock of the field and by discussing future paths of strategy this Handbook will serve as an important stimulus for intellectual development for years to come Nicolai Foss Copenhagen Business School Finally We have a comprehensive reflective and critical overview of the field of strategy in the new *Handbook of Strategy and Management* The strategy literature has come of age with this mapping of the terrain by Andrew Pettigrew Howard Thomas and Richard Whittington The Handbook provides an useful overview of different streams of thought with contributions by leading scholars and researchers Equally importantly this

Handbook provides us with reflections on the past and insights into the future of the field Such a critique is an important aid in understanding and researching strategy for newcomers and experienced scholars alike Cynthia Hardy Head of Department of Management University of Melbourne The Handbook presents a major retrospective and prospective overview of the strategic management field and will be an important benchmark volume for management scholars worldwide The Handbook frames assesses and synthesizes the work in the field and helps to define and shape its current and future development The editors combine focus with diversity in the material and approaches covered thus providing a powerful critical analysis and synthesis of diverse disciplinary contributions to this rapidly growing body of knowledge Each of the four parts of this book concentrates on a specific area of strategy and management Within these parts leading international scholars provide historical overviews of the key strands delineating the topography of their particular themes address the central problems and approaches which have characterized these critically assess the state and quality of current theory and knowledge and set out agendas for future theoretical and empirical development The resulting volume is a unique overview of the inputs and dynamics that shape the core ideas and practices of strategy and management Reappraising State-Owned Enterprise

Franco Amatori,Robert Millward,Pier Angelo Toninelli,2013-06-17 After a quarter century of almost general condemnation and rebuttal of the entire nationalization experience it appears that there are second thoughts about governmental direct intervention in the economy Reappraising State Owned Enterprise deals with a topic often undervalued in the past decade but which now with the crisis of 2008 2009 calls for greater attention the direct intervention of the State as Entrepreneur The collection of essays in this volume prepared by some of the leading authorities in the field offers a contribution to this debate by providing a balanced assessment of two of the most relevant experiences of mixed economies the United Kingdom and Italy In this respect a comparison between these two countries is very much appropriate since in both nations the State played an important role as Entrepreneur starting in the early 20th century In Great Britain and Italy the heyday of the State as Entrepreneur was in the years right after WWII when it was used as a tool for promoting a modern society in which citizens acquired a stronger sense of belonging to their nations The UK and Italy saw the State take on a too pervasive role in the 70s the two nations responded in different ways In the 1980s Great Britain embarked on a harsh process of privatizations while Italians struggled on until finally submitting to privatizations in their nation in the following decade The deep crisis of the final years of the 21st century forced both nations to reconsider State interventions as an appropriate tool in order to protect the wellbeing of the national economy Family Fictions and Family Facts Brian Cooper,2007-05-07 Here Brian Cooper explores the role of economic theory in normalizing the family in the first half of the nineteenth century Drawing on a wide range of sources the book examines the impacts of these different forms on contemporary debate *The Routledge Research Companion to the History of Evangelicalism* Andrew Atherstone,David Ceri Jones,2018-07-11 Evangelicalism an inter denominational religious movement that has grown to become one of the most pervasive expressions of world

Christianity in the early twenty first century had its origins in the religious revivals led by George Whitefield John Wesley and Jonathan Edwards in the middle decades of the eighteenth century With its stress on the Bible the cross of Christ conversion and the urgency of mission it quickly spread throughout the Atlantic world and then became a global phenomenon Over the past three decades evangelicalism has become the focus of considerable historical research This research companion brings together a team of leading scholars writing broad ranging chapters on key themes in the history of evangelicalism It provides an authoritative and state of the art review of current scholarship and maps the territory for future research Primary attention is paid to English speaking evangelicalism but the volume is transnational in its scope Arranged thematically chapters assess evangelicalism and the Bible the atonement spirituality revivals and revivalism worldwide mission in the Atlantic North and the Global South eschatology race gender culture and the arts money and business interactions with Roman Catholicism Eastern Christianity and Islam and globalization It demonstrates evangelicalism s multiple and contested identities in different ages and contexts The historical and thematic approach of this research companion makes it an invaluable resource for scholars and students alike worldwide

#### **The Foundations of Female Entrepreneurship** Alison Kay,2012-08-21

The Foundations of Female Entrepreneurship explores the relationship between home household headship and enterprise in Victorian London It examines the notions of duty honor and suitability in how women s ventures are represented by themselves and others and engages in a comparison of the interpretation of historical female entrepreneurship by contemporaries and historians in the UK Europe and America It argues that just as women in business have often been hidden by men they have often also been hidden by the home and the conceptualization of separate spheres of public and private agency and of the entrepreneur Drawing on contextual evidence from 1747 to 1880 including fire insurance records directories trade cards newspapers memoirs the census and extensive record linkage this study concentrates on the early to mid Victorian period when ideals about gender roles and appropriate work for women were vigorously debated Alison Kay offers new insight into the motivations of the Victorian women who opted to pursue enterprises of their own By engaging in empirical comparisons with men s business it also reveals similarities and differences with the small to medium sized ventures of male business proprietors The link between home and enterprise is then further excavated by detailed record linkage revealing the households and domestic circumstances and responsibilities of female proprietors Using both discourse and data to connect enterprise proprietor and household The Foundations of Female Entrepreneurship provides a multi dimensional picture of the Victorian female proprietor and moves beyond the stereotypes It argues that active business did not exclude women although careful representation was vital and this has obscured the similarities of their businesses with those of many male business proprietors

#### ***Trademarks, Brands, and Competitiveness***

Teresa da Silva Lopes,Paul Duguid,2010-05-04 Trade Marks Brands and Competitiveness brings together scholars from a variety of disciplines to provide a critical account of the contribution of branding to economic growth the relationship

between trademark law and brand strategy and the building and repositioning of individual brands as case studies in the effects of competition

**Family Multinationals** Christina Lubinski, Jeffrey Fear, Paloma Fernández Pérez, 2013-07-18 In contrast to widespread assessments that family enterprises lack sufficient resources and capabilities to go global many family companies are competing successfully in an increasingly globalized business environment Worldwide a large number of thriving multinationals are still family owned and or under family control While there is abundant literature on the phenomenon of globalization from many different disciplines neither the literature on multinationals nor the growing field of family business studies have systematically investigated family multinationals yet This volume is one of the first to deal explicitly with family multinationals and the role of the family in internationalization It situates itself at the crossroads of internationalization studies on the one hand and family business research on the other Why do families continue to play such a large role in some of the most prominent firms in emerging and mature economies How did they manage to maintain ownership control yet divest of unrelated business ventures How did they internationalize yet maintain control This book identifies the idiosyncratic strategies and structures of family multinationals in different countries and at different points in time A comparative historical and case study approach allows us to explore the role of the family through the firms various internationalization pathways and understand long term developments and path dependencies

*The Power of Corporate Networks* Thomas David, Gerarda Westerhuis, 2014-08-27 Corporate networks the links between companies and their leaders reflect a country s economic organization and its corporate governance system Most research on corporate networks focuses on individual countries or particular time periods however making fruitful comparisons over longer periods of time difficult This book provides a unique long term analysis of the rise consolidation decline and occasional re emergence of these networks in fourteen countries across North and South America Europe and Asia in the 20th and early 21st centuries In this volume the editors bring together the most internationally well known specialists to investigate the long term development of corporate networks Using a combination of quantitative and qualitative research approaches the authors describe the main developments and changes in the corporate network over time by focusing on important network indicators in benchmark years and identify historical explanations for these developments This unique long term perspective allows readers insight into how and why national corporate networks have evolved over time

Organizing Global Technology Flows Pierre-Yves Donzé, Shigehiro Nishimura, 2013-11-12 Research on the international transfer of technology in economics and management literature has primarily focused on the role of countries and that of companies in particular multinational enterprises MNEs Similarly economic and business historians have tended to view international technology transfer as a way for economically backward countries to acquire new technologies in order to catch up with more developed economies This volume provides a more in depth understanding of how the international transfer of technologies is organized and in particular challenges the core periphery model that is still dominant in the extant literature By looking beyond national systems of innovation and

statistics on foreign trade patent registration and foreign direct investment the book sheds more light on the variety of actors involved in the transfer process including engineers entrepreneurs governments public bodies firms etc and on how they make use of a broad set of national and international institutions facilitating technology transfer Put differently the volume offers a better understanding of the complexity of global technology flows by examining the role and actions of the different actors involved By bringing together a number of original case studies covering many different countries over the period from the late 19th to the 21st century the book demonstrates how technology is being transferred through complex processes involving a variety of actors from several countries using the national and international institutional frameworks **Tin and**

**Global Capitalism, 1850-2000** Mats Ingulstad, Andrew Perchard, Espen Storli, 2014-09-04 For most of the twentieth century tin was fundamental for both warfare and welfare The importance of tin is most powerfully represented by the tin can an invention which created a revolution in food preservation and helped feed both the armies of the great powers and the masses of the new urban society The trouble with tin was that economically viable deposits of the metal could only be found in a few regions of the world predominantly in the southern hemisphere while the main centers of consumption were in the industrialized north The tin trade was therefore a highly politically charged economy in which states and private enterprise competed and cooperated to assert control over deposits smelters and markets Tin provides a particularly telling illustration of how the interactions of business and governments shape the evolution of the global economic trade the tin industry has experienced extensive state intervention during times of war encompasses intense competition and cartelization and has seen industry centers both thrive and fail in the wake of decolonization The history of the international tin industry reveals the complex interactions and interdependencies between local actors and international networks decolonization and globalization as well as government foreign policies and entrepreneurial tactics By highlighting the global struggles for control and the constantly shifting economic geographical and political constellations within one specific industry this collection of essays brings the state back into business history and the firm into the history of international relations

*Technological Innovation in Retail Finance* Bernardo Batiz-Lazo, J. Carles Maixé-Altés, Paul Thomes, 2010-11-23 In this edited volume the editors highlight the relative importance of European actors in the globalization of technological change by documenting developments in France Germany Great Britain The Netherlands Spain and Sweden Developments in Europe sit side by side with those in Mexico and the USA
