the relationship between bureaucratic and interest group politics In this pioneering book Daniel Carpenter contributes to our understanding of institutions by presenting a unified study of bureaucratic autonomy in democratic regimes He focuses on the emergence of bureaucratic policy innovation in the United States during the Progressive Era asking why the Post Office Department and the Department of Agriculture became politically independent authors of new policy and why the Interior Department did not To explain these developments Carpenter offers a new theory of bureaucratic autonomy grounded in organization theory rational choice models and network concepts According to the author bureaucracies with unique goals achieve autonomy when their middle level officials establish reputations among diverse coalitions for effectively providing unique services These coalitions enable agencies to resist political control and make it costly for politicians to ignore the agencies ideas Carpenter assesses his argument through a highly innovative combination of historical narratives statistical analyses counterfactuals and carefully structured policy comparisons Along the way he reinterprets the rise of national food and drug regulation Comstockery and the Progressive anti vice movement the emergence of American conservation policy the ascent of the farm lobby the creation of postal savings banks and free rural mail delivery and even the congressional Cannon Revolt of 1910

**Agriculture in the Midwest, 1815-1900** R. Douglas Hurt, 2023-07 2024 Jon Gjerde Prize Winner for best book in Midwestern History After the War of 1812 and the removal of the region's Indigenous peoples the American Midwest became a paradoxical land for settlers Even as many settlers found that the region provided the bountiful life of their dreams others found disappointment even failure and still others suffered social and racial prejudice In this broad and authoritative survey of midwestern agriculture from the War of 1812 to the turn of the twentieth century R Douglas Hurt contends that this region proved to be the country's garden spot and the nation's heart of agricultural production During these eighty five years the region transformed from a sparsely settled area to the home of large industrial and commercial cities including Chicago Milwaukee Cleveland and Detroit Still it remained primarily an agricultural region that promised a better life for many of the people who acquired land raised crops and livestock provided for their families adopted new technologies and sought political reform to benefit their economic interests Focusing on the history of midwestern agriculture during wartime utopian isolation and colonization as well as political unrest Hurt contextualizes myriad facets of the region's past to show how agricultural life developed for midwestern farmers and to reflect on what that meant for the region and nation

Farmers Helping Farmers Nancy K. Berlage,2016 Introduction Organizational structure the rise of the local farm bureau Organizational strategy economic political and social functions Science cultural authority and the farm bureau bovine tuberculosis Home bureaus and the sciences of separate spheres Women and the agricultural occupation Reproducing the farm family youth clubs gender and science Conclusion **Dickinson** Emily Dickinson,Helen Vendler,2010-09-07 The unrivaled doyenne of close reading offers an interpretive introduction to Emily Dickinson s brilliant enigmatic verse In commentaries accompanying 150 selected poems Helen Vendler explores Dickinson s major thematic preoccupations while highlighting the poet s startling imagination and the ingenuity of her linguistic invention *Roots of Reform* Elizabeth Sanders,1999-08 Offering a revision of the understanding of the rise of the American regulatory state in the late 19th century this book argues that politically mobilised farmers were the driving force behind most of the legislation that increased national control **Better Living by Their Own Bootstraps** Cherisse Jones-Branch,2023-04-28 The first major study to consider Black women s activism in rural Arkansas Better Living by Their Own Bootstraps foregrounds activists quest to improve Black communities through language and foodways as well as politics and community organizing In reexamining these efforts Cherisse Jones Branch lifts many important figures out of obscurity positioning them squarely within Arkansas s agrarian history The Black women activists highlighted here include home demonstration agents employed by the Arkansas Agricultural Cooperative Extension Service and Jeanes Supervising Industrial Teachers all of whom possessed an acute understanding of the difficulties that African Americans faced in rural spaces Examining these activists through a historical lens Jones Branch reveals how educated middle class Black women worked with their less educated rural sisters to create all

female spaces where they confronted economic educational public health political and theological concerns free from white regulation and interference Centered on the period between 1914 and 1965 *Better Living by Their Own Bootstraps* brings long overdue attention to an important chapter in Arkansas history spotlighting a group of Black women activists who uplifted their communities while subverting the formidable structures of white supremacy **Rural Worlds Lost** Jack Temple Kirby,1986-12-01 Immediately following the Civil War and for many years thereafter southerners proclaimed a New South implying not only the end of slavery but also the beginning of a new era of growth industrialization and prosperity Time has shown that those declarations at least in terms of progress and prosperity were premature by several decades Life for an Alabama tenant farmer in 1920 did not differ significantly from the life his grandfather led fifty years earlier In fact the South remained primarily a land of poor farming folks until the 1940s Only then and after World War II did the real New South of industrial growth and urban development begin to emerge Jack Temple Kirby s massive and engaging study examines the rural southern world of the first half of this century its collapse and the resulting modernization of southern society The American South was the last region of the Western world to undergo this process and *Rural Worlds Lost* is the first book to so thoroughly assess the profound changes modernization has wrought Kirby painstakingly charts the structural changes in agriculture that have occurred in the South and the effects these changes have had on people both at work and in the community He is quick to note that there is not just one South but many emphasizing the South s diversity not only in terms of race but also in terms of crop type and topography and the resultant cultural differences of various areas of the region He also skillfully compares southern life and institutions with those in other parts of the country noting discrepancies and similarities Perhaps even more significant however is Kirby s focus on the lives and communities of ordinary people and how they have been transformed by the effects of modernization By using the oral histories collected by WPA interviewers Kirby shows firsthand how rural southerners lived in the 1930s and what forces shaped their views on life He assesses the impact of cash upon traditional rural economies the revolutionary effects of New Deal programs on the rich and poor and the forms and cultural results of migration Kirby also treats home life recording attitudes toward marriage and sex health maintenance and class relationships not to mention sports and leisure moonshining and the southerner s longstanding love hate relationship with the mule *Rural Worlds Lost* based on exceptionally extensive research in archives throughout the South and in federal agricultural censuses definitively charts the enormous changes that have taken place in the South in this century Writing about Kirby s previous book *Media Made Dixie* Time Magazine noted Kirby s scholarship of rare lucidity That same high level of scholarship as well as an undeniable affection for the region is abundantly evident in this new path breaking book *Regulation and the Revolution in United States Farm Productivity* Sally H. Clarke,2002-07-25 This book explains how US government activity in the 1930s led to gains in farm productivity **Rural Democracy** Marilyn P. Watkins,2019-05-15 What happens to social movements in rural settings when they do not face the divisive issues of race and

class Marilyn Watkins examines the stable political climate built by successive waves of Populism socialism the farmer labor movement and the Grange in turn of the century western Washington She shows how all of these movements drew upon the same community base empowered farmers and encouraged them in the belief that democracy independence and prosperity were realizable goals Indeed they were in a setting where agriculture was diversified farmers were debt free and critically women enjoyed equal status as activists in social movements Rural Democracy illuminates the problems that undermined Populism and other forms of rural radicalism in the South and the Midwest by demonstrating the political success of those movements where such problems were notably absent in Lewis County Washington By so doing Watkins convincingly demonstrates the continuing value of local community studies in understanding the large scale transformations that continue to sweep over rural America

**Mama Learned Us to Work** Lu Ann Jones,2003-10-16 Farm women of the twentieth century South have been portrayed as oppressed worn out and isolated Lu Ann Jones tells quite a different story in Mama Learned Us to Work Building upon evocative oral histories she encourages us to understand these women as consumers producers and agents of economic and cultural change As consumers farm women bargained with peddlers at their backdoors A key business for many farm women was the butter and egg trade small scale dairying and raising chickens Their earnings provided a crucial margin of economic safety for many families during the 1920s and 1930s and offered women some independence from their men folks These innovative women showed that poultry production paid off and laid the foundation for the agribusiness poultry industry that emerged after World War II Jones also examines the relationships between farm women and home demonstration agents and the effect of government sponsored rural reform She discusses the professional culture that developed among white agents as they reconciled new and old ideas about women s roles and shows that black agents despite prejudice linked their clients to valuable government resources and gave new meanings to traditions of self help mutual aid and racial uplift
