conflicts Second within the framework of their established institutional structures Western societies do not have the sufficient tools for conflict resolution that are adequate to the conditions of modern diversified societies and the complex challenges of sustainable development They need to implement institutional reforms that switch institutional structures towards deliberation Third by switching to deliberation Western societies can reach the high level of governance that enables them to achieve environmentally sustainable development that will bring them significant economic and social benefits and as a result may reach far beyond their borders This volume offers a novel transdisciplinary approach to sustainable development and governance in Western societies It will be of great interest to students and scholars of sociology economics politics environmental studies and philosophy as well as professionals and policymakers working in the area of sustainable development
