Remote Control In The New Age Of Television:

The Remote Control in the New Age of Television James R. Walker, Robert V. Bellamy, 1993-08-23 Remote control tuning encourages a form of interactive television using a technology already available in 80 percent of American households. Editors Walker and Bellamy have compiled the first book of state of the art research on a topic of growing interest to media researchers, practitioners and students. Chapter authors combine survey measurements with recorded observations of viewing behavior, an analysis of the program sources accessed during grazing, experimental studies of remote control use and historical and critical analyses. Specific topics include the history of the remote control device, gender differences in its use, family communication and parental control of the device, remote controls and selective exposure to media messages, the impact of remote controls on programming and promotion, remote controls and critical perspective on television and future technologies. This volume is rooted in social scientific research but theoretically and methodologically broad in scope.

Netflix and the Re-invention of Television Mareike Jenner, 2018-07-24 This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television's existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge watching in its organisation and marketing, and Netflix's position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge watching, as Netflix's iteration of giving control to the viewers. By focusing on Netflix's relationship with the linear television schedule, its negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, **Netflix and the Re-invention of Television** illuminates the importance of Netflix's role within the processes of TV IV. **Television and the American Family** J. Alison Bryant, 2001 This second edition of a trend setting volume provides an updated examination of the interaction between families and the most pervasive mass medium, television. Charting the dynamic developments of the American family and television over the past decade, this volume provides a comprehensive representation of programmatic research into family and television and examines extensively the uses families make of television, how extensions of television affect usage, families evolving attitudes toward television, the ways families have been and are portrayed on television, the effects television has on families and the ways in which families can mediate its impact on their lives. The volume is an invaluable resource for scholars and students in the areas of media and society, children and media and family studies. **The Synchronized Society** Randall Patnode, 2023-03-17 The Synchronized Society traces the history of the synchronous broadcast experience of the twentieth century and the transition to the asynchronous media that dominate today. Broadcasting grew out of the latent desire by nineteenth century industrialists, political thinkers and social reformers to tame an unruly society by controlling how people used their time. The idea manifested itself in the form of the

broadcast schedule a managed flow of information and entertainment that required audiences to be in a particular place usually the home at a particular time and helped to create water cooler moments as audiences reflected on their shared media texts Audiences began disconnecting from the broadcast schedule at the end of the twentieth century but promoters of social media and television services still kept audiences under control replacing the schedule with surveillance of media use Author Randall Patnode offers compelling new insights into the intermingled roles of broadcasting and industrial post industrial work and how Americans spend their time *Mass Communications Research Resources* Christopher H.

The Mass Audience James Webster, Patricia F. Phalen, 2013-11-05 In the early 20th century a new and distinctive concept of the audience rose to prominence The audience was seen as a mass a large collection of people mostly unknown to one another that was unified through exposure to media This construct offered a pragmatic way to map audiences that was relevant to industry government and social theorists In a relatively short period of time it became the dominant model for studying the audience Today it is so pervasive that most people simply take it for granted Recently media scholars have reopened inquiry into the meaning of audience They question the utility of the mass audience concept characterizing it as insensitive to differences among audience members inescapably bound up with discredited notions of mass society or serving only a narrow set of industrial interests The authors of this volume find that these assertions are often false and unwarranted either by the historical record or by contemporary industry practice Instead they argue for a rediscovery of the dominant model by summarizing and critiquing the very considerable body of literature on audience behavior and by demonstrating different ways of analyzing mass audiences Further they provide a framework for understanding the future of the audience in the new media environment and suggest how the concept of mass audience can illuminate research on media effects cultural studies and media policy
