**Stories of Art** James Elkins, 2024-07-31 A thoughtful, engaging, and intimate history of art that offers a critical analysis of the assumptions on which the entire discipline of art history depends. Concise and original, this accessible second edition continues to act as an antidote to the behemoth art history textbooks of the past. Cultures have their own stories about themselves, about other cultures, and to hear them all is one way to hear the multiple stories that art tells. James Elkins persuasively demonstrates there can never be one story of art, now that art historians are concerned with gender diversity, inclusiveness, and decolonization. *Stories of Art* is an interactive, iconoclastic text encouraging readers to imagine how they would present art history in an age of multiple narratives. Elkins discusses decolonizing the discipline, representing race and ethnicity, Eurocentrism, post-nationalism, and indigenous voices while examining histories of art written in China, Persia, Turkey, and India. This new edition features QR codes to 27 short videos that introduce challenging ideas about art and history in a clear and open way, encouraging active reading and including ideas for writing exercises and class conversations. A must-read for students and scholars interested in exploring the cultural function of art history.

**The Moon and the Western Imagination** Scott L. Montgomery, 2022-03-29 The Moon is at once a face with a thousand expressions and the archetypal planet. Throughout history, it has been gazed upon by people of every culture in every walk of life. From early perceptions of the Moon as an abode of divine forces, humanity has in turn accepted the mathematized Moon of the Greeks, the naturalistic lunar portrait of Jan van Eyck, and the telescopic view of Galileo. Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages, revealing the faces it has presented to philosophers, writers, artists, and scientists for nearly three millennia. To do this, he has drawn on a wide array of sources that illustrate mankind's changing concept of the nature and significance of heavenly bodies, from classical antiquity to the dawn of modern science. Montgomery especially focuses on the seventeenth century when the Moon was first mapped, and its features named. From literary explorations such as Francis Godwin's *Man in the Moone* and Cyrano de Bergerac's *L'autre monde* to Michael Van Langren's textual lunar map and Giambattista Riccioli's *Almagestum novum*, he shows how Renaissance man was moved by the lunar orb, how he battled to claim its surface, and how he in turn elevated the Moon to a new level in human awareness. The effect on human imagination has been cumulative: our idea of the Moon, and therefore the planets, is multilayered and complex, having been enriched by associations played out in increasingly complicated harmonies over time. We have shifted the way we think about the lunar face from a perfect body to an earthlike one with corresponding changes in verbal and visual expression. Ultimately, Montgomery suggests, our concept of the Moon has never wandered too far from the world we know best: the Earth itself. And when we finally establish lunar bases and take up some form of

residence on the Moon's surface we will not be conquering a New World fresh and mostly unknown but a much older one ripe with history     **The Publishers Weekly** ,1972     *Europe in the Sixteenth Century* H.G. Koenigsberger, George L. Mosse, G.Q. Bowler, 2014-06-06 This bestselling seminal book a general survey of Europe in the era of Renaissance and Reformation was originally published in Denys Hay's famous Series A General History of Europe It looks at sixteenth century Europe as a complex but interconnected whole rather than as a mosaic of separate states The authors explore its different aspects through the various political structures of the age empires monarchies city republics and how they functioned and related to one another A strength of the book remains the space it devotes to the growing importance of town life in the sixteenth century and to the economic background of political change     **Perspectives On Western Art** Linnea Wren, 2018-02-22 This anthology of readings related to Western art history explains specific works of art illustrated in Janson's History of Art and De la Croix and Tansey's Gardner's Art Through the Ages in terms of the ideas beliefs and concerns of the people and cultures who created the art It brings a new understanding of art because it shows the social and cultural basis of major works of art through history The ten sections are Ancient Near East Egyptian Aegean Greek Etruscan Roman early Christian Byzantine and Islamic early Medieval Romanesque and Gothic The readings have been drawn from many areas of intellectual and social history including religion philosophy literature science economics and law Each selection is preceded by an introductory note which discusses the readings in terms of its subject and theme its source and usage and its relevance to the study of the work of art     Catalogue of the Harvard University Fine Arts Library, The Fogg Art Museum Harvard University. Strathern tells the fascinating story of how this Other Renaissance played as significant a role as the Italian renaissance in bringing our modern world into being      **The Western Humanities** Roy T. Matthews, F. DeWitt Platt, 1997-07      *The Renaissance* Jocelyn Hunt, 2005-08-08 The Renaissance presents the panorama of Europe in the fifteenth and sixteenth centuries exploring such themes as the origins and causes of humanism Renaissance monarchies the Reformation geographical exploration science artistic movements The book includes narrative introductions to each issue views of major historians interpretations analysis and evaluation of primary sources
