Rival Capitalists Jeffrey A. Hart, 1992 Hart describes the global structure of production and consumption in the five major capitalist countries and offers a rich comparative history of their industrial policymaking. He concludes that variations in statesocietal arrangements and the impact these differences have on the creation and diffusion of new technologies provide the best explanation for divergences in international competitiveness. In Japan state and business are allied but labor is marginalized whereas in Germany labor and business are allied and the state is decentralized. Yet both countries have become increasingly competitive because they have developed institutional mechanisms for technology diffusion. France's state led system in contrast is linked with only moderate competitiveness. The decline of competitiveness in the United States and Britain Hart concludes may be attributed to state societal arrangements that have allowed one actor labor in Britain business in the United States to dominate policymaking. *The Politics of International Economic Relations* Jeffrey A. Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind Joan Spero's *The Politics of International Economic Relations* has been fully updated to reflect the sweeping changes in the international arena. With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies. A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy. Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart's *The Politics of International Economic Relations* continues to give students the breadth and depth of scholarship needed to understand the politics of world economy. US-Asia Economic Relations Justin Robertson, 2008-09-02 Pt 1 Towards a different approach pt 2 US economic behaviour in Asia after the financial crisis pt 3 Explaining divergent US economic interests International Production Networks in Asia Michael Borrus, Dieter Ernst, Stephan Haggard, 2003-09-02 This book addresses the changing nature of high tech industries in Asia particularly in the electronics sector. Its up to date findings will be invaluable to those involved in management production networks and corporate strategy. *Japan's Policy Trap* Akio Mikuni, R. Taggart Murphy, 2003-11-26 Until quite recently the Japanese inspired a kind of puzzled awe. They had pulled themselves together from the ruin of war built at breakneck speed a formidable array of export champions and emerged as the world's number two economy and largest net creditor nation. But today only the puzzlement remains. This book offers a provocative new analysis of the country's protracted economic stagnation. **Japanese Multinationals in Asia** Dennis J. Encarnation, 1999-11-25 This collection explores the expansion of Japanese multinational firms into Asia a process which paralleled the region's growth as a major economic region. The contributors discuss a wide range of topics including the reasons for moving manufacturing to other countries the flow of trade between Japan and these countries.

technology transfer within firms the impact of Japanese management practices in other Asian countries and competition between Japanese and American firms in Asia

Japan Remodeled Steven Kent Vogel, 2006 As the Japanese economy languished in the 1990s Japanese government officials business executives and opinion leaders concluded that their economic model had gone terribly wrong They questioned the very institutions that had been credited with Japan's past success a powerful bureaucracy guiding the economy close government industry ties lifetime employment the main bank system and dense interfirm networks Many of these leaders turned to the U S model for lessons urging the government to liberate the economy and companies to sever long term ties with workers banks suppliers and other firms Despite popular perceptions to the contrary Japanese government and industry have in fact enacted substantial reforms Yet Japan never emulated the American model As government officials and industry leaders scrutinized their options they selected reforms to modify or reinforce preexisting institutions rather than to abandon them In *Japan Remodeled* Steven Vogel explains the nature and extent of these reforms and why they were enacted Vogel demonstrates how government and industry have devised innovative solutions The cumulative result of many small adjustments is he argues an emerging Japan that has a substantially redesigned economic model characterized by more selectivity in business partnerships more differentiation across sectors and companies and more openness to foreign players

Norms in International Relations Audie Klotz, 2018-09-05 Applying a social constructivist approach to her richly detailed case history Audie Jeanne Klotz demonstrates that normative standards such as racial equality can serve as much more than a weak constraint on fundamental strategic concerns Norms can play a crucial role in the formation of global policy After forty years of protest against apartheid the world celebrated Nelson Mandela's inauguration as South Africa's first democratically elected president Klotz considers why racial discrimination in South Africa became a global concern and why in a remarkable change of practice nations and international organizations adopted sanctions against the Pretoria regime By explaining how the world community actively came to condemn apartheid *Norms in International Relations* contributes to broader debates on the role of norms in global politics Klotz rehearses a fascinating history combining the power politics of economic sanctions and the normative politics of racial equality She reenacts the events that resulted in the United Nations decision to oppose apartheid The author also analyzes anti apartheid activism in the British Commonwealth and in the Organization of African Unity and she documents changing attitudes toward South African racial separateness in the United States Britain and Zimbabwe

The Hidden Hand of American Hegemony David E. Spiro, 2019-06-30 Between 1973 and 1980 the cost of crude oil rose suddenly and dramatically precipitating convulsions in international politics Conventional wisdom holds that international capital markets adjusted automatically and remarkably well enormous amounts of money flowed into oil rich states and efficient markets then placed that new money in cash poor Third World economies David Spiro has followed the money trail and the story he tells contradicts the accepted beliefs Most of the sudden flush of new oil wealth didn't go to poor

oil importing countries around the globe Instead the United States made a deal with Saudi Arabia to sell it U S securities in secret a deal resulting in a substantial portion of Saudi assets being held by the U S government With this arrangement the U S government violated its agreements with allies in the developed world Spiro argues that American policymakers took this action to prop up otherwise intolerable levels of U S public debt In effect recycled OPEC wealth subsidized the debt happy policies of the U S government as well as the debt happy consumption of its citizenry Issues and Agents in International Political Economy Benjamin J. Cohen, Charles Lipson, 1999 This is the second of two anthologies on international political economy drawn from articles published in the journal International Organization The book is organized into four sections Trade Multinational Firms and Globalization Money and Finance and Emerging Issues Nationalism, Liberalism, and Progress: The dismal fate of new nations Ernst B. Haas, 1997 Has global liberalism made the nation state obsolete Or on the contrary are primordial nationalist hatreds overwhelming cosmopolitanism To assert either theme without serious qualification according to Ernst B Haas is historically simplistic and morally misleading Haas describes nationalism as a key component of modernity and a crucial instrument for making sense of impersonal rapidly changing and heterogeneous societies He characterizes nationalism as a feeling of collective identity a mutual understanding experienced among people who may never meet but who are persuaded that they belong to a community of kindred spirits Without nationalism there could be no large integrated state He explores nationalism in five societies that had achieved the status of nation states by about 1880 the United States Britain France Germany and Japan *Remapping East Asia* T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In *Remapping East Asia* T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly **Governing Ideas** J. Nicholas Ziegler, 2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal

about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups

The Paradox of Continental Production Barbara Jenkins, 2018-09-05 Should national governments regulate foreign investment The question is hotly contested in today's international trade debates Barbara Jenkins here addresses this complex issue in a timely account of market relationships among North American nations Jenkins provides up to date detailed analyses of foreign investment regulations and policies in Canada Mexico and the United States She identifies inherent contradictions in the general tactic that all three countries have pursued simply relying on the pressures of the market rather than planning active strategy and she assesses the likely effects on foreign investment of the recently concluded Canada U S Free Trade Agreement and the potential North American free trade agreement Free trade and the absence of adjustment policy she argues expose key political actors such as business and labor too broadly to market forces The result is a projectionist reaction on the part of these domestic actors which ultimately defeats efforts to liberalize trade and investment relations In current approaches to foreign investment regulation Jenkins detects divergent trends among the three countries while Ottawa and Mexico City continue to liberalize their investment strategies Washington is growing more interventionist She shows however that the interventionism of the United States reflects a nationalistic trend rather than a commitment to a coherent strategy Cautioning that the conclusion of a North American free trade agreement will only exacerbate the inadequacies of current policies Jenkins concludes by offering recommendations for future action The Paradox of Continental Production will be stimulating reading for policymakers political economists and other observers of Canadian Mexican and U S politics

Consumer Capitalism Gunnar Trumbull, 2018-07-05 The unfettered marketplace in which uncertainty rules and the admonition caveat emptor let the buyer beware dictates each consumer decision has today virtually disappeared Consumers have become the focus of intensive economic policymaking designed to protect them from the risks and disappointments of the market Today arguably no other economic actor in the advanced industrial countries not the investor not the worker not the welfare recipient enjoys a more thorough set of legal and institutional protections than the modern consumer when he or she enters the corner store from the Introduction Gunnar Trumbull investigates the origins of national systems of consumer

protection in France and Germany where in the early 1970s consumer groups and producers organized to advance their own ideas about the identity and interests of the affluent consumer Through a comparison of eight areas of policy product liability law product safety standards and recall misleading advertising comparative product tests product labeling quality standards consumer contracts and pricing Trumbull shows that different conceptions of the consumer interest emerged in the two countries The result was the development of distinctive national consumption regimes which have in turn influenced the market strategies of domestic producers Trumbull's findings help to clarify distinctive national approaches to recent product crises including cases of BSE and genetically modified foods His research suggests that in the age of consumer capitalism national competitiveness may hinge not only on endowments of labor and capital but also on the institutional forms of national consumption

The Currency of Ideas Kathleen R. McNamara, 2019-06-30 Why have the states of Europe agreed to create an Economic and Monetary Union EMU and a single European currency What will decide the fate of this bold project This book explains why monetary integration has deepened in Europe from the Bretton Woods era to the present day McNamara argues that the development of a neoliberal economic policy consensus among European leaders in the years after the first oil crisis was crucial to stability in the European Monetary System and progress towards EMU She identifies two factors rising capital mobility and changing ideas about the government's proper role in monetary policymaking as critical to the neoliberal consensus but warns that unresolved social tensions in this consensus may provoke a political backlash against EMU and its neoliberal reforms McNamara's findings are relevant not only to European monetary integration but to more general questions about the effects of international capital flows on states Although this book delineates a range of constraints created by economic interdependence McNamara rejects the notion that international market forces simply dictate government policy choice She demonstrates that the process of neoliberal policy change is a historically dependent one shaped by policymakers shared beliefs and interpretations of their experiences in the global economy

Nationalism, Liberalism, and Progress Ernst B. Haas, 2018-09-05 Far from being an inevitably aggressive and destructive force nationalism is for Ernst B Haas the primary means of bringing coherence to modernizing societies In the second volume of his magisterial exploration of this topic Haas emphasizes the benefits of liberal nationalism which he deems more progressive than other nation building formulas because it relies on reason to improve citizens lives The Dismal Fate of New Nations considers several societies that modernized relatively recently many of them aroused to nationalism by the imperialism of the old nation states The book probes the different patterns of development in emerging countries Iran Egypt India Brazil Mexico China Russia and Ukraine for insights into the possibilities and limitations of all nationalisms especially liberal nationalism Employing a systematic comparative perspective Haas organizes the book around the notion of change and its management by political elites in Asia Eastern Europe Latin America and the Middle East Haas particularly wants to understand how nationalism plays out in the politics of modernization within non Western cultures especially those

where religions other than Christianity predominate Where the hold of religion remains formidable he argues the mixture of traditional and secular modernist institutions and beliefs will challenge the victory of liberal nationalism and the very success of nation state formation

Polar Politics Oran R. Young, Gail Osherenko, 1993 Co recipient of the 1994 Harold and Margaret Sprout Award given by the Environmental Studies Section of the International Studies Association A region of critical environmental significance the Arctic continues to be the focus of international conflicts of interest How well have nations succeeded in creating regimes that establish international rights and responsibilities in the circumpolar North

The Nordic States and European Unity Christine Ingebritsen, 1998 The idea of European unity which the Nordic states have historically resisted has recently become the foremost concern of Sweden Denmark Norway Iceland and Finland Christine Ingebritsen provides a timely analysis of Nordic economic and security policies in the wake of the vast transformation of regional politics between 1985 and 1995 The Nordic States and European Unity addresses two central questions Why did all five Nordic states trade autonomy for integration after 1985 And why do some follow the British pattern resisting supranationalism while others prefer the German strategy of embedding their policies in a common European project Through extensive interviews with representatives of trade unions government ministries parliamentary committees social movements and military and industrial organizations Ingebritsen charts adjustments to the idea of a regional system of governance She highlights crucial differences among these nations as they seek to protect their borders against new security threats In particular Ingebritsen shows how the political influence of leading sectors affects each state's capacity to pursue an integrationist policy Economic sectors are not uniformly affected by European policy coordination and the experience of the Nordic states demonstrates this difference Her work shifts the focus of political economics away from enduring domestic institutions toward an understanding of institutions as sectoral and transnational
