Freitas, Peter J. Bentley, Colin G. Johnson, Jon Timmis, 2005-09-19 The Artificial Life term appeared more than 20 years ago in a small corner of New Mexico USA Since then the area has developed dramatically many researchers joining enthusiastically and research groups sprouting everywhere This frenetic activity led to the emergence of several strands that are now established fields in

themselves We are now reaching a stage that one may describe as maturer with more rigour more benchmarks more results more stringent acceptance criteria more applications in brief more sound science This which is the natural path of all new areas comes at a price however A certain enthusiasm a certain adventurousness from the early years is fading and may have been lost on the way The field has become more reasonable To counterbalance this and to encourage lively discussions a conceptual track where papers were judged on criteria like importance and or novelty of the concepts proposed rather than the experimental theoretical results has been introduced this year A conference on a theme as broad as Artificial Life is bound to be very diverse but a few tendencies emerged First fields like Robotics and Autonomous Agents or Evolutionary Computation are still extremely active and keep on bringing a wealth of results to the ALife community Even there however new tendencies appear like collective robotics and more specifically self assembling robotics which represent now a large subsection Second new areas appear

Philip Roth Considered Steven Milowitz, 2015-12-22 This book comprehensively surveys Philip Roth's published and unpublished works focusing on the thematic unity which binds them together the memory of the Holocaust and the altered universe born of that memory The Holocaust is understood as the orienting event for Roth's fiction and non fiction the force that surrounds the characters and the narratives at all times Roth's obsession with questions of the Holocaust questions of responsibility meaning and powerlessness explains his recurring discussion of entrapment dehumanization nihilism guilt and coercion The concentrationary universe of the title is defined in this work as not only the universe of camps but also the universe that exists after the devastation Moral and philosophical norms are revoked in this new world Roth's early works are presented on a desolate landscape The introduction explicates this landscape specifically by invoking an early play of Roth's a play which is set in a Jewish ghetto during the Holocaust This unpublished work introduces the historical period that shapes the visions of Roth's future protagonists The next three chapters study Roth's relentless excavation of the dilemmas of fathers mothers authority figures and the inner discord of need and purpose These seemingly quotidian problems are exacerbated and intensified by the Holocaust's shadowy presence No relationship no effort at fulfillment no action is untempered by history in Roth's varied fictions Chapters four and five look directly at Roth's allusions to the Holocaust They explore through each of Roth's works how the Holocaust thematic the play of ideology and nihilism and the Holocaust pattern the idea of the past encroaching upon the present work through Roth's career informing his readers not only of his fascination with the Holocaust but of his particularly human way of dealing with it The last chapter briefly summarizes the findings of the previous chapter and connects Roth's specific concentrationary universe to the larger world The linguistic clues of Roth's novels are revealed and investigated pointing to Roth's celebration of ambiguity and individuality as parts of an imperfect formula for writing and living in the debased aftermath of the Holocaust
