Substance and Energy Metabolism Associated with Neuroendocrine Regulation in Tumor Cells Ruiqin Han, Xiaochen Yuan, Qingbin Wu, Chenyu Sun, Peixin Dong, 2023-12-05 An increasing number of studies suggest that the abnormality of substance and energy metabolism of tumor cells is among the unsolved complex pathological mechanism problems in malignant tumor The abnormal metabolism of substance and energy in tumor cells is not only the cause of occurrence and development of malignant tumors but also the concrete embodiment of their pathological changes Substance and energy metabolism of tumor cells largely depends on neuroendocrine regulation so it is of great scientific and clinical significance to analyze its regulatory mechanism The imbalance of material and energy metabolism of tumor cells is one of the major causes for the occurrence and development of tumors often regulated by neuroendocrine system Therefore neuroendocrine regulation plays an important role in tumorigenesis and development For example endocrine diseases such
