Lymphocytes A Practical Approach:

Lymphocytes, 1999-12-16 Cellular immunology is a rapidly moving field in which recent advances have made significant contributions to our understanding of the immune response to infection and malignancy. These in turn have given rise to new therapeutic opportunities in areas such as vaccines and immunotherapy. Many investigators have been discouraged by the complicated protocols involved in cellular immunological studies as illustrated by the meticulous care required for the generation of antigen specific T cells. *Lymphocytes A Practical Approach* second edition contains straight forward protocols for well established procedures in the study of lymphocytes including preparation and identification of lymphocytes, immortalization, cell and organ culture and quantification assays. It also covers the recent technological advances which have revolutionised the field such as the use of the Interferon gamma ELISpot assay and peptide HLA tetrameric assays to quantify antigen specific T cells directly from peripheral blood without the need for in vitro culture and molecular methods for accurate HLA typing. *Lymphocytes* Sarah Rowland-Jones, Andrew J. McMichael, This text contains practical protocols for procedures in the study of lymphocytes including preparation and identification of lymphocytes, immortalization, cell and organ culture and quantification assays. It also covers technological advances. *Endobronchial Ultrasound-Guided Transbronchial Needle Aspiration (EBUS-TBNA): A Practical Approach* S.E. Monaco, W.E. Khalbuss, L.

Pantanowitz, 2014-05-22 This high yield reference book focuses on the clinical, technical and pathological aspects of endobronchial ultrasound guided transbronchial needle aspiration (EBUS-TBNA). Its reviews cover all aspects of EBUS-TBNA including the clinical perspective, technical aspects of the procedure and cytomorphology of common and uncommon entities as well as highlights diagnostic challenges. Each chapter features a multitude of full color high resolution images and includes key references to the current literature in the field. Additionally, reference tables and informative figures highlight the salient points. The book is unique in that it is written by experienced thoracic surgeons, pulmonary medicine physicians and cytopathologists who use EBUS-TBNA in a large medical center. This publication is of interest to individuals learning and practicing cytopathology in addition to clinicians practicing pulmonary thoracic medicine or surgery. In short, it provides important pearls of wisdom to create a comprehensive reference for all physicians involved with EBUS-TBNA.
