GIS in Land and Property Management Peter Wyatt, Martin Ralphs, 2003 Economists, geographers and surveyors are beginning to recognise the powerful tool which a Geographical Information System GIS offers in effective property management. It provides a means of managing land and property information digitally and in a geographical context and allows for rapid access to information and a means of analyzing that information in a geographical context. GIS in Land and Property Management shows how to use GIS both in principle and in practice. It introduces digital mapping and GIS along with a brief history of the development of GIS and LIS all with an emphasis on property. In presenting the spectrum of GIS applications in property management it gives a number of case studies from a variety of market sectors and it analyzes the issues to provide guidance and a number of recommendations for the implementation of GIS. At the same time common themes and issues are drawn out to present a coherent message for students and practitioners. The book is useful for undergraduate and postgraduate students on land management, built environment, economics and geography courses and for property professionals in both public and private sectors looking to GIS as a property management decision aid.

Green IT Strategies and Applications Bhuvan Unhelkar, 2016-04-19 Bhuvan Unhelkar takes you on an all encompassing voyage of environmental sustainability and Green IT. Sharing invaluable insights gained during two battle tested decades in the information and communication technologies industry, he provides a comprehensive examination of the wide ranging aspects of Green IT from switching off monitors, virtualizing.

Multilingual Information Management Ximo Granell, 2014-12-09 Multilingual information is in high demand in today's globalised economy. Industry and market globalisation intensified collaboration between European countries, technological developments, the advent and consolidation of the Internet, the rise of electronic business and the increased use of electronic documents are some of the factors that have fuelled this need. Multilingual Information Management draws on previous empirical research to explore how information and technologies are used within the community of translators as information facilitators among different languages and cultures to help them become more productive and competitive in today's market. The book consists of three parts including a literature review on information and technology needs among translators, a research framework to investigate the perceptions and use of information and technology within their working environment and a strategic proposal for an Information Systems approach to multilingual information professionals and information literacy training. Presents an interdisciplinary approach to

multilingual information and technology management among information professionals Analyses the community of practice of translators as multilingual information facilitators and ICT users Contributes to further develop Information Literacy to a strategic level among information professionals Provides a methodological contribution through an evidence based approach to practice Bridges the gap between the information related disciplines of Information Science Business Management and Translation Studies **Handbook of SCADA/Control Systems Security** Robert Radvanovsky, Jacob Brodsky, 2013-02-19
