Neuropsychological Validation Of Learning Disability Subtypes:

Neuropsychological Validation of Learning Disability Subtypes Byron P. Rourke, 1990-11-01 Building upon earlier attempts to create a scientific basis for subtypes of learning disabilities this volume continues to examine the extent to which various subtyping schemes are valid Like its predecessor *Neuropsychology of Learning Disabilities Essentials of Subtype Analysis* it seeks to define such subtypes within an explicitly neuropsychological framework Following an insightful overview of the dimensions and clinical applications of validity to learning disability subtypes it reports on a wide ranging series of investigations designed to designate the content concurrent predictive construct and clinical validity of various subtyping efforts

Neuropsychology of Learning Disabilities Byron P. Rourke, 1985-02-15 Building upon earlier attempts to create a scientific basis for subtypes of learning disabilities this volume continues to examine the extent to which various subtyping schemes are valid Like its predecessor *Neuropsychology of Learning Disabilities Essentials of Subtype Analysis* it seeks to define such subtypes within an explicitly neuropsychological framework Following an insightful overview of the dimensions and clinical applications of validity to learning disability subtypes it reports on a wide ranging series of investigations designed to designate the content concurrent predictive construct and clinical validity of various subtyping efforts

Learning Disability Subtyping Stephen R. Hooper, W. Grant Willis, 2013-11-11 The publication of this very important volume comes at a timely juncture in the history of learning disabilities The focus of this volume is on developing a multidisciplinary understanding of the complexities of the research on learning disabilities and its various subtypes It also will serve as an important compendium of the subtyping literature particularly with respect to pertinent issues of nosology specific subtyping models neuropsychological diagnosis and treatment As the authors so correctly suggest the differential diagnosis of learning disabilities subtypes is a critical first step in developing theoretically sound programs of psychoeducational intervention Clearly one must have some idea about the general abilities of a child before realistic expectations can be charted Also how can one plan a program of intervention without some knowledge of the deficient components of achievement within a domain Does it not make both conceptual and practical sense to identify an individual's relative strengths and weaknesses so that abilities or strengths can be utilized to optimize functioning in areas of deficit Although these all sound like reasonable precursors to assisting individuals in need of academic assistance there are those who would argue otherwise Importantly however the Director of the National Institutes of Health in a recent report to Congress advocates exactly what this volume proposes Indeed there are important needs to be addressed and the literature reviewed herein strongly supports the conclusions drawn by these authors

Handbook of Cognitive, Social, and Neuropsychological Aspects of Learning Disabilities Stephen J. Ceci, 2013-01-11 Recognized as the definitive reference in the field this book addresses a broad range of biologically based disorders that affect children's learning and development Leading authorities review the genetics of each disorder its course and outcome associated developmental cognitive and

psychosocial challenges and what clinicians and educators need to know about effective approaches to assessment and intervention Coverage encompasses numerous lower incidence neurodevelopmental disabilities as well as more frequently diagnosed learning and behavior problems with a genetic component *Cluster Analysis in Neuropsychological Research*

Daniel N. Allen, Gerald Goldstein, 2014-07-08 Cluster analysis is a multivariate classification technique that allows for identification of homogenous subgroups within diverse samples based on shared characteristics In recent years cluster analysis has been increasingly applied to psychological and neuropsychological variables to address a number of empirical questions This book provides an overview of cluster analysis including statistical and methodological considerations in its application to neurobehavioral variables First an introduction to cluster analysis is presented that emphasizes issues of relevance to neuropsychological research including controversies surrounding its use Cluster analysis is then applied to clinical disorders that do not have an associated prototypical neuropsychological profile including traumatic brain injury schizophrenia and health problems associated with homelessness In a second application cluster analysis is used to investigate the course of normal memory development Finally cluster analysis is applied to classification of brain injury severity in children and adolescents who sustained traumatic brain injury **Subtypes of Learning Disabilities** Lynne V. Feagans, Elizabeth J. Short, Lynne Vernon-Feagans, Lynn J. Meltzer, 2012-11-12

Although experts agree that various types of learning disabilities do exist few attempts have been made to classify learning disabled children into subtypes The editors of this collection feel that the lack of subcategorization has frustrated previous research efforts to obtain a generalizable body of knowledge in the field To meet this critical need for definitive information this book presents basic reviews and theoretical approaches used to subtype learning disabled children ranging from a behavior genetics approach to a dimensional approach It also demonstrates actual research methods utilizing theoretical approaches **Practice of Child-Clinical Neuropsychology** Byron Rourke, Sean Rourke, Harry van der Vlugt, 2002-01-01

The aim of this work is to provide a comprehensive treatment oriented introduction to the practice of child clinical neuropsychology focusing exclusively on the assessment of children and adolescents The book has been designed specifically for those who wish to pursue education and training in this area of professional endeavor The volume gives consideration to the following issues treatment oriented model of neuropsychological assessment specification of brain behavior relationships dimensions of neuropsychological assessment psychometric considerations validity issues modes of approach to neuropsychological interpretation influence of demands of the environment prediction of behavioral outcomes development of realistic remedial plans and availability of resources for effective implementation of remedial plan and continuing relationship between neuropsychological assessment and intervention principles and hypotheses concerning the remediation of brain impairments in childhood and early adolescence Variables related to the known or hypothesized brain lesion determination of the child's remedial needs and remediable capacities approaches to treatment general treatment strategies formats for intervention treatment styles and

techniques and implementation of the remedial plan learning disabilities empirically derived LD subtypes neuropsychological profiles psychosocial typologies and implications for treatment and case studies nonverbal learning disabilities and basic phonological processing disorder and neurological disease disorder and dysfunction approach to characterization of neurological disorders and case studies stroke Asperger syndrome traumatic brain injury brain tumor and Tourette syndrome This book will be of critical interest to child clinical psychologists neuropsychologists who specialize in the assessment and or treatment of adults with brain impairment and have some interest in childhood disorders pediatric neurologists child psychiatrists and a host of other professionals whose practice brings them in contact with children whose behavior may be affected by brain dysfunction Indeed for all of these professionals and those in training to become such this book will serve as a comprehensive introduction to a systematic approach to neuropsychological assessment and intervention for children and adolescents with suspected or established brain impairment

learning disabilities Direct relevance to practitioners researchers and trainers **Advances in Child Neuropsychology** Michael G. Tramontana, Stephen R. Hooper, 2012-12-06 In the foreword to Volume 1 of this series Byron Rourke noted that the field of child neuropsychology is still young He wrote It has no obvious birthdate Hence we cannot determine its age with the type of chrono metric precision for which our scientific hearts may yearn Be that as it may activity in the field has been growing steadily if not by leaps and bounds Although there is nowhere near the intensity of investigation of children from a neuropsychological standpoint as there is of adults there have been notable systematic investigations of considerable interest Some of the more important of these are presented in the current volume I am happy to say that the contents of Volume 2 likewise provide new insights across many important domains of developmental neuro psychology As the editors note this book consists of six chapters divided into four general areas including developmental neuropsychology one chapter abnormal neuropsychology three chapters assessment one chapter and treatment one chapter The first chapter is addressed to attention response inhibition and activity level in children In this chapter Jeffrey M Halperin Kathleen E McKay Kristin Matier and Vanshdeep Sharma provide a lucid and articulate review of research on this topic The authors correctly note by that attention response inhibition and activity level are mediated neurocircuits throughout the brain that interact with and modulate virtually all higher cognitive information processing domains **Neuropsychology of Malingering Casebook** Joel E. Morgan, Jerry J. Sweet, 2008-11-19 Clinical neuropsychologists frequently evaluate individuals within a forensic context and therefore must address questions regarding the possible presence of reduced effort response bias and or malingering This volume offers a wide range of instructive real world case examples involving the complex differential diagnosis where symptom exaggeration and or malingering cloud the picture Written by expert forensic neuropsychologists the scenarios described provide informed empirically based and scientifically derived opinions on the topic Issues related to malingering such as response bias and insufficient effort are discussed thoroughly with regard to a large number of clinical conditions and assessment instruments Test data and non test information are considered and integrated by the numerous experts Expert guidance for clinicians who must address the issue of malingering is provided in a straightforward and well organized format To date there has not been a comparable collection of rich case material relevant to forensic practice in clinical neuropsychology **Pathways to Prominence in Neuropsychology** Anthony Y. Stringer, Eileen L. Cooley, Anne-Lise Christensen, 2012-12-06 Captures the stories behind the work of the clinicians and scholars who have contributed significantly to neuropsychology's development Patterns of Learning Disorders David L. Wodrich, Ara J. Schmitt, 2006-06-12 Distilling what school practitioners really need to know this book is learning disorders made easy Empirically based the authors system complements the popular Response to Intervention approach This book features 12 case illustrations to show users how to link assessment directly to effective interventions for a wide range of problems It fills a key need within the framework of IDEA 2004 and NCLB **Advances in Clinical Neuropsychology** Ralph

Tarter,2012-12-06 This second volume of the series Advances in Clinical Neuro psychology addresses the neurological and neuropsychological disorders that are seen most frequently in children The book begins with a discussion of normal and abnormal brain development From there neurological and neuropsychological assessment methods are described and evaluated The main body of the text is concerned with reviewing the major childhood disorders and includes discussions of brain trauma dyslexia minimal brain dysfunction mental retardation and epilepsy These latter conditions adversely impact on psychosocial development and limit educational attainment Approaching these disorders from a neurobehavioral perspective therefore potentially has ramifications for improving detection and assessment procedures as well as for developing new intervention strategies This book continues the tradition of the first volume in that the contents include topics that address basic research as well as clinical problems It is hoped that this combination will encourage the professional to integrate research and clinical application in guiding their investigative activities or clinical endeavors Medical and Educational Perspectives on Nonverbal Learning Disability in Children and Young Adults Rissman, Barbara,2015-09-04 This book is a comprehensive reference source for emerging research in the identification diagnosis and intervention of nonverbal learning disabilities featuring in depth coverage on a variety of topics relating to intact nonverbal skills Nonverbal Learning Disability indicators disability manifestation and the dilemmas faced by caregivers and professionals Clinical Syndromes in Adult Neuropsychology Roberta Firnhaber White,1992 In the last few years the field of neuropsychology and expertise in the disorders covered in this book have developed and evolved enormously However despite the publication of handbooks textbooks case oriented descriptive works and specialized publications on neuropsychology the field has not yet produced a book in the model of a clinical handbook or manual This publication fills the gap Clinical Syndromes in Adult Neuropsychology is intended for both novice and experienced neuropsychologists who wish to have a reference work of this type to consult particularly when seeing patients from an unfamiliar diagnostic category or when faced with an unusual or difficult differential diagnostic question In addition it is aimed at providing knowledge on clinical findings and the contribution of neuropsychological expertise to the care and management of neuropsychiatric patients for students in training especially in the field of neuropsychology graduate students interns postdoctoral fellows The book is also informative to psychologists neurologists behavioral neurologists and psychiatrists by providing insight into the methods and diagnostic processes carried out by clinical neuropsychologists
