Consecrating Science Lisa H. Sideris, 2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these

movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe

The Learned Practice of Religion in the Modern University Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena

The Love Story of Creation Edward Ruetz, 2010 A man awakens one day in a land of brilliant light Unsure of his surroundings he sees another man woman and their child surrounded by a pure crimson energy of love He soon realizes that the Divine Beings intend to use their energy of love to give birth to new beings And so begins an expanding Universe fueled by diverse particles woven by gravity's power into a massive web The Divine Beings empower atoms to be agents of creativity The first beings Quarkie and Photie join twelve atom friends and quadrillions of other atoms who manage to create billions of suns in billions of galaxies After the Divine Beings take the atom pals on journeys back to the past to visit other atom families the atom friends living in the Milky Way Galaxy are jolted by an exploding supernova and land on planet Earth where they eventually create the first living beings During the next two billion years they engage in a crucial mission the conception of

the eukaryote cell which will determine all future creativity on Earth But just as they are certain of their success a momentous catastrophe threatens to end their creative journey *Jesus and the Cosmos* Denis Edwards, 2004-07-22 At the end of the twentieth century we began to understand that the earth is vulnerable that it is like a tiny garden in space under threat on all sides *Jesus and the Cosmos* is an attempt to think theologically about the ecological crisis we face in the light of the great Christian tradition Our theological tradition has been shaped within the worldview of a static universe By contrast we are told today that the universe began with a cosmic explosion called the Big Bang that we live in an expanding universe with galaxies rushing away from us at an enormous rate that we human beings are part of an evolutionary movement on the earth and that we are intimately linked with the health of delicately balanced life systems on our planet Not only has modern science given this age a new cosmology but contemporary historical studies have provided us with a new approach to the historical Jesus Critical biblical study has allowed us to know far more about the Jesus who brought joy and liberation into people's lives In *Jesus and the Cosmos* Denis Edwards tells the story of the cosmos the story of Jesus of Nazareth and shows their connections Ultimately he will assert Jesus of Nazareth risen from the dead IS the dynamic power at the heart of the cosmic process **David's Question** Edward Reaugh Smith, 2001-11 This collection of the astronomical writings by Dr Elisabeth Vreede is a fascinating compendium of scientific and spiritual knowledge Between September 1927 and August 1930 Dr Vreede wrote a monthly letter available by subscription about both modern astronomy and classical astrology in the light of spiritual science These letters include clear explanations of the fundamentals of astronomy and discussions on the role of astrology in the modern world They also include inspiring presentations of a worldview that sees the stars planets and all physical phenomena as manifestations of spiritual beings and spiritual activities A previous edition was published as *Anthroposophy and Astrology*
