Rational Simplicity Setting Course To A Simpler Life:

Rational Simplicity Tim Covell, 2005 FINALLY A SIMPLE BOOK ABOUT SIMPLICITY Eighty one percent of Americans agree with the statement More and more I am looking for ways to simplify my life Yet in a world dominated by consumerism most don't know where to start Rational Simplicity offers a path It is a program with no rules steps or excessive paperwork Instead it provides a series of suggestions to help change your relationship with money At its core simple living is living on less than you earn But simple living has the final goal of escaping from paid work and pursuing what is really important to you The opposite of simple living is consumerism Consumerism is the belief that things will make you happy Simplicity is the acknowledgment that they will not With rational recommendations and sensible strategies this book encourages you to spend less time pursuing material goods and more time pursuing your dreams

Rationality and Epistemic Sophistication

Franz-Peter Griesmaier, 2015-03-06 What factors determine whether a person's beliefs are epistemically rational Many traditional accounts contend that those factors lie in the beliefs themselves For example a belief can fit with one's evidence it can originate in reliable or otherwise virtuous processes or it can cohere with other beliefs some of which may be self-justifying In this provocative book Franz Peter Griesmaier presents a new picture of epistemic rationality emphasizing the role of the agent rather than the belief The rationality of an agent's beliefs ultimately depends on her epistemic sophistication which is manifest in the stringency of her standards in the skill she has in accessing and evaluating evidence and in the wisdom she displays in choosing contextually appropriate standards To be epistemically rational means in this view that one has discharged one's epistemic duties by using the contextually proper standards for finding and evaluating the available evidence during the process of belief formation In the course of defending this view Griesmaier discusses a wide variety of topics from the perspective of a unifying framework These topics include the possibility of lucky justification the importance of error avoidance the problem of simplicity various forms of evidentialism doxastic voluntarism epistemic deontology the question of belief's aim contextualism and the connections between his account and formal models of justification and knowledge such as epistemic and justification logics

The contributors to this volume have provided brief notes describing specific experimental results. Reforms in Higher Education Keith Watson, Celia Modgil, Sohan Modgil, 1997-01-01 This text addresses the reforms in the financial and administrative structure of higher education, government intervention in introducing new managerial techniques and quality audits and the implications of these changes for both academics and administrators. It is one of a series of four volumes which look at the educational dilemmas facing governments, professional educators and practising administrators in the current climate in education. The issues are addressed from international and comparative perspectives.
