Rationale Of Beings:

Rationale Management in Software Engineering Allen H. Dutoit, Raymond McCall, Ivan Mistrik, Barbara Paech, 2007-02-02 Thirty years ago I first entered the dark realm of software engineering through a prior interest in documentation. In those days documentation pretty much meant functional specifications. The idea that stakeholders in a system its implementers its end users its maintainers and so forth might want something other than an alphabetic list of function definitions was just taking hold. There was an exciting to me vision of stakeholders accessing and contributing to explanations of how and why aspects of a system work as they do tradeoff analysis of concomitant downsides and perhaps even accounts of why other possible approaches were not followed. There were many challenges to overcome in achieving this vision. The most formidable is the belief that people do not like to create or use documentation. This negative image of documentation is unfortunately more than just the bias of a few incorrigible system developers. It is more like a deep truth about human information behavior about how human beings construe and act towards information. Humans are by default active users of information they want to try things out and get things done. When documentation is interposed as a prerequisite between people and a desired activity they try to skip through it circumvent it or undermine it. Designing information to suit the needs and interests of its users is an abiding challenge but we have come a long way from functional specifications as the only answer.

Consciousness and the World Brian O'Shaughnessy, 2002 Brian O'Shaughnessy presents a bold original theory of consciousness one of the most fascinating but puzzling aspects of human existence. He investigates what consciousness is and how it engages through perception with the world. Whatever mystery there may be about origins of consciousness O'Shaughnessy suggests that there is no mystery about what it is. It is his contention that consciousness consists in a closely knit complex of occurrent mental phenomena and powers with thinking and self knowledge at the centre and nothing else. He proceeds to give a philosophical elucidation of its nature analysing it into its constituent psychological parts. He argues that consciousness has a determinate character as an internal but world oriented phenomenon and that there exist logically necessary and sufficient conditions for its presence. Though consciousness is an internal state perception is its very foundation being the source of the material with which the mind develops and essential to the processes whereby it does so. O'Shaughnessy continues with an extended summary of the phenomena of perception and attention examining their component elements and their relations with consciousness and with the world. He demonstrates how close to the heart of consciousness is perception envisaged already in the very concept. Perception is portrayed as a journey of the attention from the raw data of the senses outwards into physical reality. The different modes of sensory perception are analysed in turn to give a full picture of how the mind opens out onto its environment and assembles for itself a representation of outer reality. So it is that the gap is closed between the mental and physical domains and the epistemological basis of mind is established. Consciousness and the World is a rich and exciting book a major contribution to our understanding of the mind.

Climate Ethics Stephen Gardiner, 2010-07-30 This collection gathers a set of seminal papers from the emerging area of ethics and climate change. Topics covered include human rights, international justice, intergenerational ethics, individual responsibility, climate economics, and the ethics of geoengineering. Climate Ethics is intended to serve as a source book for general reference and for university courses that include a focus on the human dimensions of climate change. It should be of broad interest to all those concerned with global justice, environmental science and policy, and the future of humanity.

Committee Prints United States. Congress. Senate. Committee on Finance, 1969 Adieu to God Mick Power, 2012-01-06 Adieu to God examines atheism from a psychological perspective and reveals how religious phenomena and beliefs are psychological rather than supernatural in origin. Answers the psychological question of why, in the face of overwhelming scientific evidence to the contrary, do religions continue to prosper. Looks at atheism and religion using a fair and balanced approach based on the latest work in psychology, sociology, anthropology, psychiatry, and medicine. Acknowledges the many psychological benefits of religion while still questioning the validity of its supernatural belief systems and providing atheist alternatives to a fulfilling life. **EU Administrative Law** Paul Craig, 2018-10-25 The third edition of EU Administrative Law provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered, including new case law, institutional developments, and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative regime. Thus, there are chapters dealing with the history and taxonomy of the EU administrative regime, direct administration, shared administration, committees, agencies, social partners, and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability, drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review, and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence, access, transparency, process, law, fact, and discretion, rights, equality, legitimate expectations, two chapters on proportionality, the precautionary principle, two chapters on remedies, and the Ombudsman.
